18.10.6 Exposing a Compilation of 20,000 Ransomware Themed BitCoin Transaction

IDs and BitCoin Addresses - An OSINT Analysis (2022-10-25 16:32)

[1]

25177

Dear blog readers,

I've decided to further extend the ransomware themed BitCoin transaction IDs and BitCoin

addresses obtained using public sources post series with the idea to assist everyone in their

cyber attack and cyber campaign attribution efforts.

Sample list of publicly accessible known ransomware themed BitCoin transaction IDs and

BitCoin addresses include:

18.10.7 Exposing a Compilation of 20,000 Ransomware Themed BitCoin Transaction

IDs and BitCoin Addresses - An OSINT Analysis - Part Two (2022-10-25 16:35)

[1]

25345

Dear blog readers,

I've decided to further extend the ransomware themed BitCoin transaction IDs and BitCoin

addresses obtained using public sources post series with the idea to assist everyone in their

cyber attack and cyber campaign attribution efforts.

Sample list of publicly accessible known ransomware themed BitCoin transaction IDs and

BitCoin addresses include:

18.10.8 Exposing a Compilation of 20,000 Ransomware Themed

BitCoin Transaction

IDs and BitCoin Addresses - An OSINT Analysis - Part Three (2022-10-25 16:36)

[1]

25491

Dear blog readers,

I've decided to further extend the ransomware themed BitCoin transaction IDs and BitCoin

addresses obtained using public sources post series with the idea to assist everyone in their

cyber attack and cyber campaign attribution efforts.

Sample list of publicly accessible known ransomware themed BitCoin transaction IDs and

BitCoin addresses include:

18.10.9 Exposing a Compilation of 20,000 Ransomware Themed BitCoin Transaction

IDs and BitCoin Addresses - An OSINT Analysis - Part Four (2022-10-25 16:38)

[1]

Dear blog readers,

I've decided to further extend the ransomware themed BitCoin transaction IDs and BitCoin

addresses obtained using public sources post series with the idea to assist everyone in their

cyber attack and cyber campaign attribution efforts.

Sample list of publicly accessible known ransomware themed BitCoin transaction IDs and

BitCoin addresses include:

18.10.10 Exposing a Compilation of 20,000 Ransomware Themed BitCoin Trans-

action IDs and BitCoin Addresses - An OSINT Analysis - Part Five

(2022-10-25 16:39)

[1]

25746

Dear blog readers,

I've decided to further extend the ransomware themed BitCoin transaction IDs and BitCoin

addresses obtained using public sources post series with the idea to assist everyone in their

cyber attack and cyber campaign attribution efforts.

Sample list of publicly accessible known ransomware themed BitCoin transaction IDs and

BitCoin addresses include:

18.10.11 How to Build an Information Security Industry "At Home" - The Definite

Manual - An Analysis (2022-10-26 08:28)

[1]

Dear blog readers,

I've decided to make sure of my notes on the information security industry publicly accessible

which I produced while I was studying in the Netherlands circa 2003-2006 with the idea to

share my knowledge and expertise in the field and with the idea to motivate a lot of folks who

remember my work back then which you can check out [2]here.

Sample screenshots of my notes while I was studying in the Netherlands circa 2003-2006 on

the information security industry with the idea to dominate it:

Decoding 12 Hard Cover Security Ads

~~So~~

Conducting marketing research on behalf of agains the "competitiveness of the day" is exciting task, and not surprisingly one that requires quite some psychological imagination.

Key decision makers -- Fortune 500 C-level readers acting as the audience -- who read hard cover business press, be it due to its actual value or lifestyle needs.

The following initiative that's originally consisting of both hard cover and online security ads is about to get professionally commissioned, but longing I feel there's nothing wrong in sharing the draft images, and providing you with relevant analysis of 12 hard cover security ads I come across to in the major business publications. Don't just aim to reach as many eyeballs as possible, try to narrow down your ambitions to the key ones, and accept the challenge of pulling them so further. Explore and thus

[61]

25808

Nilwurm

① Introduce yourself, explicitly

② How did you originally start in this and what effect did the Nilwurm group?

③ How would you describe the main aim and how its vision [illegible] towards the years [illegible]

④ Do you believe full disclosure compared to responsible disclosure causes more beneficial effects on the general public as well as prompting vendors to faster patch release.

⑤ What's your

Market for Software Vulnerabilit

urpose: Provide interested parties with the
inions, recommendations and insights of leading
curity researchers, on the current, emerging, a
future state of commercializing vuln. research. No
among the three infomediaries purchasing vulnera
lities, only one was professional enough to
consider my solicitation to participate. It's not
always about market share, but a heart share
as well, hope they get it. Enjoy this
online panel, feel absolutely obliged to comment
and keep the discussion going.

Key risks
(A) break the ice between researchers
themselves, and the industry
(2) provide the masses of knowledgable
folks not having the time, resources, perhaps even
wish to purchase a couple thousand bucks ticket
to attend a security con
(3) to poke the diversified quality
researchers background, and break the domination
of the Anglo-Saxon stereotype
(4) pass the virtual microphone and
make sure everyone with the opportunity to comment
share points, as professionally as possible

[75]

25822

(5) Break the myth of infosec incrs
having to do with vulnerabilities only

Meet the folks I'm talent to interrogate
and constructively confront with - wish I
could stay in my pants and acts as
a meeting facilitator only -- too much
to say!

---

(1) BAPASA - security. nnvon. ru
- the infamous Russian security researcher
whole strategic background, geopolitic position
and insider view of the problem, you
wouldn't have at any con. Russia, the
rising super-power like after the end
of the USSR, the place where according
to the mass media cyber exploits get
hatched and ~~trained~~ swallowed for breakfast
Let's find out how come!

(2) Quinn Norton - the true example of
the savvy biased internetizens pres
and its habit of over-repeating stereot
with yesterday's "heros of the day"

18.10.12 Inside the KillNet Crowd-Sourced DDoS Attack Campaign Targeting Inter-

national Web Sites - An OSINT Analysis (2022-10-26 08:28)

[1]

25872

I’ve decided to take a deeper look inside the currently ongoing crowd-sourced DDoS infrastruc-

ture platform known as KillNet where multiple pro-Russian groups including various Pro-Ukraine

groups are basically soliciting users internationally to "donate" their bandwidth to a central

command and control server under the operation of KillNet botnet operators that further or-

chestrate the actual Target List and the actual DDoS attack campaigns.

What’s new here? Nothing really as crowd-sourcing DDoS attacks has been around for a while.

It doesn’t take a rocket scientist to entice a thousand users into installing a rogue and bogus

crowd-sourced DDoS attack application under a central management command of KillNet who

will be responsible for issuing managing and updating the Targets List that also includes the

actual launching of the DDoS attack campaigns.

Sample screenshots include:

WE ARE KILLNET
Oh Bulgaria is a traitor 44.8K 19:31
WE ARE KILLNET
Attention to all law enforcement agencies in Bulgaria!!!
For your support of the Ukrainian dictatorship and the development of Nazism, with the help of your arms supplies through the "corrupt Romanian government" From now on you are included in the list of our enemies.
Now we have 11 victims of domestic violence
It would be right to give time to the "Bulgarian special services" until 7 am Moscow time to prepare for a meeting with us!
This will be an unforgettable date.

18.10.14 Dancho Danchev - The Re-Surrection - 2022 - Official Come Back Or a "Brief

History Into the World of Hacking Security Blogging OSINT and Threat In-

telligence Gathering" - A Guide To The Scene (2022-10-26 08:28)

[1]

25879

Hello everyone,

Are you enjoying my new layout? I've finally managed to find a decent layout that's worth the

efforts for my blog and I think that you'll enjoy it.

[2]Grab the Torrent.

Who needs a motto of some sort? Check out the following:

- "Setting them straight since the early days of humankind!"

- "If it’s going to be massive it better be good".

- "Only the enlightened".

- "The Third World war will be fought with sticks and stones. Our war will be fought with cyber

sticks and stones".

- "You shall obfuscate. I shall deobfuscate".

25880

- "Takes you back doesn’t it?"

- "Cybercrime is largely driven by the average time for which it takes to collectively and fully

satisfy the botnet masters for the time it takes to build a botnet and maintain it online".

- "When we’re back on top, back on top in January, 2009, I say that loads.cc, loads.cccccc and

it ain't that aspiring as it seems, you're aggregating botnets

in September, face the abuse department's music in June, but I know I'm going to see your IPs

again, cause this fine cybercrime ecosystem, it just keeps spinning around."

The reason for using it? I truly want to present as much information as possible in a much more

structured way than before and I finally found a suitable template for this purpose.

In this all-in-one blog post I'll attempt and I'll do my best to present the true story behind my

blog which you can by the way download in a full offline reading mode here with the idea to

present my true story since December, 2005 when I originally launched it while working at

https://astalavista.com as a Managing Director.

5.3 Understanding Intelligence Sources

The availability of the longitudinal data (the IOCs collected over a span of 13 years) also enables us to investigate the qualities of the indicators produced by different sources and their timeliness against new threats, as reported below.

Timeliness. Using the aforementioned attack clusters (see Table 7), we analyzed the distribution of the articles first reporting the attacks over different blogs, as shown in Figure 8b. We found that 10 blogs were responsible for the first report of 60% the clusters (each cluster likely to be a campaign). For example, the blog *Dancho Danchev* first report 12 clusters, each time involving 45 IOCs on average, which later also showed up on other blogs.

Table 9: Quality of selected intelligence sources (10 out of 45)

Blog	% of covered IOCs	% of covered iocterms	% of timely IOCs	% of robust IOCs
Dancho Danchev	42%	62%	14%	84%
Naked Security	43%	55%	54%	45%
THN	38%	38%	41%	51%
Webroot	54%	**79%**	13%	84%
ThreatPost	26%	37%	52%	29%
TaoSecurity	**57%**	61%	31%	68%
Sucuri	34%	35%	43%	52%
PaloAlto	39%	44%	15%	**87%**
Malwarebytes	32%	48%	26%	72%
Hexacorn	49%	57%	**59%**	76%

[11]

[12]

[13]

25883

Table 5: Top-10 origins that contribute with the highest number of IOCs, grouped per source. In brackets we report the percentage of IOCs associated to each origin.

The Rise of Malware as a Service (MaaS)

February 18, 2013 · botnets, images, Security, Software

- authors Pierluigi Paganini

The Internet is becoming a mine for criminals that is an easy way to access to any kind of resources or to arrange a cyber attacks, a cyber espionage campaign or complex banking and identity fraud.

What is very frightening is the simplicity with which it is possible to acquire any kind of criminal services in the underground and the creativity of cyber criminals that are able to offer a business model that is both efficient and inexpensive. This is especially true of the Russian criminal underground which is the one that is considered the most active globally.

In the last month various malicious campaigns have been launched by cyber criminals with specific intent to infect the largest number of machines composing dangerous botnets. The availability of a great number of infected machines translates into the availability of valuable resources and services to be marketed by cybercrime organizations.

Cyber criminals are offering malware-infected hosts, also known as "loads", in a new business model that proposes the monetization of botnet activities through renting of the compromised systems. Of course the services offered are totally customizable, clients can choose the type of malware that infects the victims and their geographic location, it is possible rent US-based malware infected hosts or machine in European Union.

Security expert Dancho Danchev in a post on Webroot threat blog revealed newly launched underground service offering access to thousands of malware-infected machine for unsettlingly low prices, a thousand US-based hosts costs $200 meanwhile for a thousand EU-based hosts price varies between $60/$120, and the price for a thousand international mix type of hosts is $20.

The different prices applied are calculated based on purchasing power and long-term value of a malware-infected host, US-users are considered by cybercriminal organization the most wealthy, the pricing policy varies, so in many cases the malicious services are sold to US users at higher prices. I add that probably there are also other considerations behind cost evaluation such as specificity of the demand in specific areas and cost to maintain alive botnet in countries in which cyber security is more responsive.

Dancho Danchev a couple of years ago conducted an interesting study on botnet renting:

> *"The logical shift from static pricing lists, to the embracing of multiple pricing schemes such as price discrimination (differentiated pricing), or penetration pricing, naturally resulted in different prices for different targeted groups."*

What are the principal uses of thousands of infected hosts?

Typically the criminals are interested in the arrangement of cyber frauds and so large number of machines is used for launching related

DEFENSIVE COMPUTING
By Michael Horowitz, Computerworld
SEP 26, 2009 10:00 AM PT

About

Defensive Computing is for people who use computing devices for work, not play. Rather than focus on the latest news or devices, this blog aims to be educational. Heavy on facts, light on opinions.

OPINION

Crimeware gets worse - How to avoid being robbed by your PC

The malware threat to Windows computers continues to get worse. So much so, there's a new term to describe malicious software that transfers money from online accounts at financial services companies - crimeware.

Last week, an article at Technology Review told about a construction firm that had $447,000 taken out of their bank account by crimeware software on one of their computers. What makes this story particularly interesting is that the unnamed bank employed one time passwords.

Perhaps you've seen the small key fobs that display a new password every minute. If you don't have the key fob, you can't logon. But the computer was already infected and was being used by a legitimate user. Retina scanners would not have prevented the crime.

While the well-verified user was logged on, making legitimate transfers, the crimeware software generated 27 transfers in the space of a few minutes. According the firms president "They not only got into my system here, they were able to ascertain how much they could draw, so they drew the limit". It can't get any worse.

What to do?

Dancho Danchev suggests setting "daily, weekly or monthly account transaction limits", assuming your financial institution allows it. He also suggests being notified of transactions via SMS.

Another possibility is creating, up-front, a list of valid payees so that your financial institution won't pay anyone not on the list. I know a company that does this and it protected them from forged paper payroll checks.

Of course, the bank should flag suspicious activity such as: a group transfers just under $10,000, any large outflow of money, a collection of transfers to new, first-time payees or multiple transfers from a new IP address. Maybe someday.

BrandPost Sponsored by Dell EMC-Intel
Defense in Breadth
This puts forth the discussion of how now, as organizations continue to leverage more and more diverse types of cloud-based services, a security mindset needs to be at the center of any cloud strategy.

But when it comes to your computer, there is one obviously best solution.

Do online banking from Linux using Firefox.

You can run Linux on pretty much any computer from a CD, a USB flash drive, an SD card or a Compact Flash card.

Linux is free. You can download any of dozens of different versions (called "distributions") in ISO format and burn them to a CD.

Sony PlayStation site victim of SQL-injection attack

Automated attack claims another high-profile target, offering sale of a fake antivirus scanner.

BY ROBERT VAMOSI / JULY 2, 2008 11:58 AM PDT

T-Mobile Buy one, get one FREE. moto Z² FORCE Pre-order now

Early Wednesday, antivirus vendor Sophos reported that some visitors to the Sony PlayStation site may have been prompted to download an antivirus scanner.

Pages promoting the PlayStation games SingStar Pop and God of War contained SQL-injected code. Visitors to those specific game pages would see a fake antivirus scan, then a message that their computer was infected with different viruses and Trojan horses. Warned, the user would then be asked to purchase the scanner to remove the bogus malware.

T-Mobile Buy one, get one FREE. Pre-order now moto Z² FORCE

The injected code linking to the scanner has since been removed.

Sophos said the attack could have downloaded malicious payloads, but did not.

Security researcher Dancho Danchev said in his ZDNet blog that Sony wasn't alone. It was one of 794 domains hit in the latest automated SQL-injection campaign using a multilayer fast-flux superstructure built around coldwop.com. Over the last 90 days, Google reports that 794 domains have been infected with code pointing to that domain. These are legitimate sites with vulnerabilities that allow criminal hackers to inject code pointing to their servers.

With fast-flux, a registered domain name stays the same while its node changes frequently, presumably thwarting any attempts to shut down the server hosting malicious content.

Danchev concludes: "If you don't take care of your Web application vulnerabilities, someone else will."

Web Gang Operating in the Open

By RIVA RICHMOND JAN. 16, 2012

Five men believed to be responsible for spreading a notorious computer worm on Facebook and other social networks — and pocketing several million dollars from online schemes — are hiding in plain sight in St. Petersburg, Russia, according to investigators at Facebook and several independent computer security researchers.

The men live comfortable lives in St. Petersburg — and have frolicked on luxury vacations in places like Monte Carlo, Bali and, earlier this month, Turkey, according to photographs posted on social network sites — even though their identities have been known for years to Facebook, computer security investigators and law enforcement officials.

One member of the group, which is popularly known as the Koobface gang, has regularly broadcast the coordinates of its offices by checking in on Foursquare, a location-based social network, and posting the news to Twitter. Photographs on Foursquare also show other suspected members of the group working on Macs in a loftlike room that looks like offices used by tech start-ups in cities around the world.

Beginning in July 2008, the Koobface gang aimed at Web users with invitations to watch a funny or sexy video. Those curious enough to click the link got a message to update their computer's Flash software, which begins the download of the Koobface malware. Victims' computers are drafted into a "botnet," or network of infected PCs, and are sent official-looking advertisements of fake antivirus software and their Web searches are also hijacked and the clicks delivered to unscrupulous marketers. The group made money from people who bought the bogus software and from unsuspecting advertisers.

The security software firm Kaspersky Labs has estimated the network includes 400,000 to 800,000 PCs worldwide at its height in 2010. Victims are often unaware their machines have been compromised.

The Koobface gang's freedom underscores how hard it is to apprehend international computer criminals, even when identities are known. These groups tend to operate in countries where they can work unmolested by the local authorities, and where cooperation with United States and European law enforcement agencies is poor. Meanwhile, Western law enforcement is awash in computer crime and lacks the resources and skilled manpower to tackle it effectively, especially when evidence putting individuals' fingers on keyboards must be collected abroad.

On Tuesday, Facebook plans to announce that it will begin sharing information about the group and how to fight them with security researchers and other Internet companies. It believes public namings can make it harder for such groups to operate and send a message to the criminal underground.

None of the men have been charged with a crime and no law enforcement agencies have confirmed they are under investigation.

The group investigators have identified has adopted the tongue-in-cheek

Spammers unleash DIY phone number slurping web tool

Well it is Valentine's Day... How else are you going to get those digits?

By John Leyden 14 Feb 2013 at 17:03

SHARE ▼

Mobile spammers have released a DIY phone number harvesting tool, but instead of advertising it solely on criminals-only online hangouts, they're trying to flog it out in the open.

The availability of the utility turns the simple act of submitting a mobile number to a website something that might lead to the receipt of more SMS (text message) spam.

A new version of the phone number harvesting tool crawls the web and indexes mobile numbers, phone ID numbers, the names of the owner, and the associated mobile operator - among other information. Users of the tool can choose which country they want to target.

The harvested information is later used for various malicious and fraudulent purposes.

Key features of the tool include automatic recognition of Russian and Ukrainian mobile phone providers (based on its initial target market), indexing based on a region and city for both Russia and Ukraine, multi-threaded software allowing up to 100 "indexing streams", as well as an option to collect only numbers attached to a particular mobile provider.

"Cybercriminals and spammers are not strangers to the concept of market segmentation," explained Dancho Danchev, a security researcher at Webroot, in a blog post.

"Just like true marketers, the developer of the tool has included the option to choose a specific region within the available countries, with the idea to assist in the inevitable malicious and fraudulent activity that will result from this phone number harvesting activity."

Danchev advises surfers to double-check whether any website that requests your phone number is actually listing it on the web. The phone number harvesting tool has yet to crawl through sites that require authorisation or spread outside Russia and the Ukraine, he said, but future versions are likely to expanding indexing capabilities and geographical reach, Danchev warned.

The DIY phone number harvesting tool is an example of a wider trend of selling tools that once were exclusively available to sophisticated cybercriminals to less elite cybercrooks though underground forums. Services that offers a means to launch managed SMS flooding and phone ring flooding have recently become available through these forums. Both managed SMS flooding and phone ring flooding are pitched as a means to "take care of your competitor's phone lines" or a DDoS attack on phones instead of websites. However, these services might easily lend themselves to helping along more ambitious scams, such as flooding out a bank's call centres to prevent early reports of card fraud cash-out operations, according to Webroot.

"By starting to advertise these very same malicious (DIY) tools and services on publicly accessible forums, they're proving that they're willing to sacrifice a certain degree of OPSEC (Operational Security) for the sake of growing their business model and attracting new customers," Danchev reports.

Customizable Mobile Number Harvesting Service Found on Underground Market

The information can be used for SMS spam campaigns

Jul 4, 2015 13:51 GMT · By Eduard Kovacs · Share:

Security experts have come across a new mobile number harvesting service that allows users to fully customize the type of information they want to collect. The collected information can then be utilized to drive SMS spam campaigns that rely on specialized services.

Identified by Webroot's Dancho Danchev in the underground market, the mobile number harvesting service can be used to collect information based on region, types of companies, age, interests, work position, gender and other options.

According to the service's operators, it takes up to 12 hours to harvest between 1,000 and 35,000 phone numbers, and it takes between 72 and 86 hours if the customer wants over 50,000 numbers based on certain criteria.

The individuals that advertise the service accept payment via WebMoney, which shows that experts might have been right when they said that cybercriminals might slowly migrate back to WebMoney now that Liberty Reserve was out of the picture.

"We expect to continue observing an increase in vendors offering cybercrime-as-a-service solutions with vertical market integration in mind, in an attempt by the cybercriminals operating them to occupy an even bigger market share within the TDoS and the SMS spam market segments," Danchev explained.

Mass website hacking tool alerts to dangers of Google dorks

Google dorks are not geeks who love the internet-related services and products provider. Google dorks are akin to super-specific searches, which attackers have been known to take advantage of in attempts to expose vulnerable websites.

Cyber crime researcher Dancho Danchev recently blogged about a mass, do-it-yourself (DIY) website hacking tool making the rounds that takes advantage of those Google dorks.

"The proxy supporting tool has been purposely designed to allow automatic mass websites reconnaissance for the purpose of launching SQL injection attacks against those websites that are vulnerable," Danchev wrote.

SQL stands for structured query language and is programming terminology designed for managing data. SQL injection typically involves an attacker inputting SQL statements into an entry field that will force the system to execute potentially malicious commands.

"Once a compromise takes place, the attacker is in a perfect position to inject malicious scripts on the affected sites, potentially exposing their users to malicious client-side exploits serving attacks," according to Danchev.

Danchev wrote that an escalating number of DIY tools circulating the internet may open the door for novice attackers, but Barry Shteiman, director of security strategy with Imperva, told SCMagazine.com on Tuesday that it is the Google dorks that should be raising alarms.

"The reason Google dorks have gotten so popular is because they create the threat landscape of finding targets," Shteiman said, explaining that he regularly uses Google dorks in his research to see the scale of a particular issue. "If I know of an exploit, Google will find those targets."

The problem is that people want Google to index their websites so it can be found in a regular search, Shteiman said. He explained that website owners can, and should, mask things about their sites by removing certain tags and not letting the public know what kinds of systems run under the hood.

"It's a huge a problem," Shteiman said. "I believe that most hackers use these techniques because they are looking for easy money. Why would I go into a website and start digging when I can do it the other way around. You're reversing the wheel and making your life very easy."

Shteiman most recently took advantage of Google dorks when researching an exploit in certain versions of vBulletin. He discovered that 35,000 websites using the proprietary internet message board software were vulnerable to a flaw that allowed hackers to create new admin accounts.

Cybercrime service automates creation of fake scanned IDs, other verification docs

The service produces high-quality fake scans that can be used in fraud attacks to impersonate victims, Group-IB researchers said

By Lucian Constantin
Romania Correspondent, CSO

A new Web-based service for cybercriminals automates the creation of fake scanned documents that can help fraudsters bypass the identity verification processes used by some banks, e-commerce businesses and other online services providers, according to researchers from Russian cybercrime investigations firm Group-IB.

The service can generate scanned copies of passports, ID cards and driver's licenses from different countries for identities supplied by the service users, fake scanned utility bills from various companies, as well as fake scanned copies of banking statements and credit cards issued by a large number of banks, said Andrey Komarov, head of international projects at Group-IB, via email.

It is common practice for banks, payment and money transfer providers, online gambling sites and other types of businesses that engage in money transactions via the Internet to ask their customers for scanned copies of documents in order to prove their identities or verify their physical addresses, especially when their anti-fraud departments detect suspicious account activity.

[Related: 4 places to find cybersecurity talent in your own organization]

Using image manipulation software to change the photo, name and other details on a scanned ID is obviously not a new practice, but services like the one identified by Group-IB that automate the whole process and produce high-quality results are new on the cybercriminal market, Komarov said.

According to Group-IB, the service is provided through a website hosted on a server in Germany. The domain name was registered in May, but the service was launched in mid-August, Komarov said.

Independent cybercrime researcher Dancho Danchev described a very similar service in a July blog post; however, Komarov could not confirm whether it is the same one because there was no reference to the service's domain name in Danchev's report.

The service found by Group-IB has templates for passports, ID cards and driver's licences for the U.S., Canada, Russia, the U.K., Germany, the Netherlands and other European Union countries. It also has templates for bank statements, credit cards -- front and back -- and utility bills from banks and utility companies operating in those countries.

The templates are for documents and cards that show signs of use and are scanned at different angles and different positions on the canvas. This makes the resulting image appear more authentic.

The Rise of Malware as a Service (MaaS)

February 18, 2013 · botnets, images, Security, Software

- authors Pierluigi Paganini

The Internet is becoming a mine for criminals that is an easy way to access to any kind of resources or to arrange a cyber attacks, a cyber espionage campaign or complex banking and identity fraud.

What is very frightening is the simplicity with which it is possible to acquire any kind of criminal services in the underground and the creativity of cyber criminals that are able to offer a business model that is both efficient and inexpensive. This is especially true of the Russian criminal underground which is the one that is considered the most active globally.

In the last month various malicious campaigns have been launched by cyber criminals with specific intent to infect the largest number of machines composing dangerous botnets. The availabilities of a great number of infected machines translates into the availability of valuable resources and services to be marketed by cybercrime organizations.

Cyber criminals are offering malware-infected-hosts, also known as "loads", in a new business model that proposes the monetization of botnet activities through renting of the compromised systems. Of course the services offered are totally customizable, clients can choose the type of malware that infects the victims and their geographic location, it is possible rent US-based malware infected hosts or machine in European Union.

Security expert Dancho Danchev in a post on Webroot threat blog revealed newly launched underground service offering access to thousands of malware-infected machine for unsettlingly low prices, a thousand US-based hosts costs $200 meanwhile for a thousand EU-based hosts price varies between $60/$120, and the price for a thousand international mix type of hosts is $20.

Spammers unleash DIY phone number slurping web tool

Well it is Valentine's Day... How else are you going to get those digits?

By John Leyden 14 Feb 2013 at 17:03

SHARE ▼

Mobile spammers have released a DIY phone number harvesting tool, but instead of advertising it solely on criminals-only online hangouts, they're trying to flog it out in the open.

The availability of the utility turns the simple act of submitting a mobile number to a website something that might lead to the receipt of more SMS (text message) spam.

A new version of the phone number harvesting tool crawls the web and indexes mobile numbers, phone ID numbers, the names of the owner, and the associated mobile operator - among other information. Users of the tool can choose which country they want to target.

The harvested information is later used for various malicious and fraudulent purposes.

Key features of the tool include automatic recognition of Russian and Ukrainian mobile phone providers (based on its initial target market), indexing based on a region and city for both Russia and Ukraine, multi-threaded software allowing up to 100 "indexing streams", as well as an option to collect only numbers attached to a particular mobile provider.

"Cybercriminals and spammers are not strangers to the concept of market segmentation," explained Dancho Danchev, a security researcher at Webroot, in a blog post.

"Just like true marketers, the developer of the tool has included the option to choose a specific region within the available countries, with the idea to assist in the inevitable malicious and fraudulent activity that will result from this phone number harvesting activity."

Danchev advises surfers to double-check whether any website that requests your phone number is actually listing it on the web. The phone number harvesting tool has yet to crawl through sites that require authorisation or spread outside Russia and the Ukraine, he said, but future versions are likely to expanding indexing capabilities and geographical reach, Danchev warned.

The DIY phone number harvesting tool is an example of a wider trend of selling tools that once were exclusively available to sophisticated cybercriminals to less elite cybercrooks though underground forums. Services that offers a means to launch managed SMS flooding and phone ring flooding have recently become available through these forums. Both managed SMS flooding and phone ring flooding are pitched as a means to "take care of your competitor's phone lines" or a DDoS attack on phones instead of websites. However, these services might easily lend themselves to helping along more ambitious scams, such as flooding out a bank's call centres to prevent early reports of card fraud cash-out operations, according to Webroot.

"By starting to advertise these very same malicious (DIY) tools and services on publicly accessible forums, they're proving that they're willing to sacrifice a certain degree of OPSEC (Operational Security) for the sake of growing their business model and attracting new customers," Danchev reports. ®

Crimeware gets worse - How to avoid being robbed by your PC

The malware threat to Windows computers continues to get worse. So much so, there's a new term to describe malicious software that transfers money from online accounts at financial services companies - crimeware.

Last week, an article at Technology Review told about a construction firm that had $447,000 taken out of their bank account by crimeware software on one of their computers. What makes this story particularly interesting is that the unnamed bank employed one time passwords.

Perhaps you've seen the small key fobs that display a new password every minute. If you don't have the key fob, you can't logon. But the computer was already infected and was being used by a legitimate user. Retina scanners would not have prevented the crime.

While the well-verified user was logged on, making legitimate transfers, the crimeware software generated 27 transfers in the space of a few minutes. According the firms president "They not only got into my system here, they were able to ascertain how much they could draw, so they drew the limit". It can't get any worse.

What to do?

Dancho Danchev suggests setting "daily, weekly or monthly account transaction limits", assuming your financial institution allows it. He also suggests being notified of transactions via SMS.

Fake CNN Alert Still Spreading Malware

By Gregg Keizer
Computerworld
AUG 5, 2008 11:24 AM PT

The massive attack that has infected PCs by tricking users into clicking links in fake messages from CNN.com shows little sign of ending soon, security researchers say.

According to MX Logic Inc. , spam posing as CNN.com Top 10 lists peaked at close to 11 million messages per hour early Thursday, but remained at high volumes throughout the day Friday. The Colorado security vendor said it had been tracking an average of 8 million messages per hour since midnight.

MX Logic's vice president of information security, Sam Masiello , called the trend "a very slow, but steady decline" from the 11 a.m. Mountain Time peak the day before.

[Further reading: How the new age of antivirus software will protect your PC]

Masiello also said that the spam has changed since attacks were first launched on Tuesday. "We've also seen several morphs of this spam over the past couple of days," he said in an entry posted on the MX Logic blog Friday . Where the messages once trumpeted " CNN .com Daily Top 10" in the subject heading and linked to a single filename on malware-hosting sites, now the spam sports a subject reading "CNN Alerts: My Custom Alert" and uses a variety of filenames in the malicious URL.

"This is likely in response to all of the media attention and awareness that has been brought up over the past couple of days," Masiello speculated.

Also on Friday, Websense Inc. reported that its researchers had seen the attack mutating, with the spam subject heading not only touting "CNN Alerts: My Custom Alert," but also using legitimate news stories culled from CNN to make the messages more convincing.

Users who clicked on the "FULL STORY" link in the message were redirected to a fake CNN site, where they were told they needed to download an update to Flash Player, Adobe System Inc. 's popular Internet media player, to view a video clip from CNN.

Websense also said it had spotted traces of the campaign in blog spam.

SponsoredPost Sponsored by Microsoft
What's next for cloud and cognitive technologies
From bots to big data, cloud technologies spur today's innovation and tomorrow's bottom line. Our survey results reveal why.

If users agreed to download the bogus Flash update, they were trapped in an endless loop, where clicking "Cancel" in the initial dialog produced a second pop-up. Clicking "Cancel" there returned the user to the first pop-up. The only options at that point were for users to shut down the browser or give in and install the malware.

MX Logic added that it had seen the URLs in the spam lead to legitimate domains that had probably been compromised, and named a U.K.-based roofing company as an example.

Earlier this week, Bulgarian security researcher Dancho Danchev had found

Sony PlayStation site victim of SQL-injection attack

Automated attack claims another high-profile target, offering sale of a fake antivirus scanner.

BY ROBERT VAMOSI / JULY 2, 2008 11:58 AM PDT

T··Mobile· Buy one, get one FREE. motoZ² FORCE Pre-order now

Early Wednesday, antivirus vendor Sophos reported that some visitors to the Sony PlayStation site may have been prompted to download an antivirus scanner.

T··Mobile· Buy one, get one FREE. Pre-order now motoZ² FORCE

Pages promoting the PlayStation games SingStar Pop and God of War contained SQL-injected code. Visitors to those specific game pages would see a fake antivirus scan, then a message that their computer was infected with different viruses and Trojan horses. Warned, the user would then be asked to purchase the scanner to remove the bogus malware.

The injected code linking to the scanner has since been removed.

Sophos said the attack could have downloaded malicious payloads, but did not.

Security researcher Dancho Danchev said in his ZDNet blog that Sony wasn't alone. It was one of 794 domains hit in the latest automated SQL-injection campaign using a multilayer fast-flux superstructure built around coldwop.com. Over the last 90 days, Google reports that 794 domains have been infected with code pointing to that domain. These are legitimate sites with vulnerabilities that allow criminal hackers to inject code pointing to their servers.

Web Gang Operating in the Open

By RIVA RICHMOND JAN. 16, 2012

Five men believed to be responsible for spreading a notorious computer worm on Facebook and other social networks — and pocketing several million dollars from online schemes — are hiding in plain sight in St. Petersburg, Russia, according to investigators at Facebook and several independent computer security researchers.

The men live comfortable lives in St. Petersburg — and have frolicked on luxury vacations in places like Monte Carlo, Bali and, earlier this month, Turkey, according to photographs posted on social network sites — even though their identities have been known for years to Facebook, computer security investigators and law enforcement officials.

One member of the group, which is popularly known as the Koobface gang, has regularly broadcast the coordinates of its offices by checking in on Foursquare, a location-based social network, and posting the news to Twitter. Photographs on Foursquare also show other suspected members of the group working on Macs in a loftlike room that looks like offices used by tech start-ups in cities around the world.

Beginning in July 2008, the Koobface gang aimed at Web users with invitations to watch a funny or sexy video. Those curious enough to click the link got a message to update their computer's Flash software, which begins the download of the Koobface malware. Victims' computers are drafted into a "botnet," or network of infected PCs, and are sent official-looking advertisements of fake antivirus software and their Web searches are also hijacked and the clicks delivered to unscrupulous marketers. The group made money from people who bought the bogus software and from unsuspecting advertisers.

The security software firm Kaspersky Labs has estimated the network includes 400,000 to 800,000 PCs worldwide at its height in 2010. Victims are often unaware their machines have been compromised.

Customizable Mobile Number Harvesting Service Found on Underground Market

Start searching now... GO

The information can be used for SMS spam campaigns

Advertisement

Jul 4, 2013 13:51 GMT · By Eduard Kovacs · Share:

Security experts have come across a new mobile number harvesting service that allows users to fully customize the type of information they want to collect. The collected information can then be utilized to drive SMS spam campaigns that rely on specialized services.

Identified by Webroot's Dancho Danchev in the underground market, the mobile number harvesting service can be used to collect information based on region, types of companies, age, interests, work position, gender and other options.

According to the service's operators, it takes up to 12 hours to harvest between 1,000 and 35,000 phone numbers, and it takes between 72 and 86 hours if the customer wants over 50,000 numbers based on certain criteria.

The individuals that advertise the service accept payment via WebMoney, which shows that experts might have been right when they said that cybercriminals might slowly migrate back to WebMoney now that Liberty Reserve was out of the picture.

"We expect to continue observing an increase in vendors offering cybercrime-as-a-service solutions with vertical market integration in mind, in an attempt by the cybercriminals operating them to occupy an even bigger market share within the TDoS and the SMS spam market segments," Danchev explained.

[75]

25926

C&C ARCHITECTURE

Compared with the complex C&C architecture of the Storm, WALEDAC, and DOWNAD botnets, the KOOBFACE C&C infrastructure is very basic. It only consisted of infected nodes and C&C domains that used HTTP as its communication protocol.

Figure 40. KOOBFACE C&C prior to July 19, 2009

Figure 41. Updated KOOBFACE C&C as of July 19, 2009

This simplistic C&C approach is, of course, very vulnerable to takedowns. After several KOOBFACE C&C takedown attempts initiated by Internet service providers (ISPs) and members of the security industry,[3] the KOOBFACE gang realized the need for a more robust C&C infrastructure. Thus, on July 19, 2009, the KOOBFACE writers implemented a new C&C architecture that involved the use of proxy nodes to provide redundancy and to improve the survivability of their C&C should another takedown be attempted.[4]

A few days after the new KOOBFACE C&C infrastructure was implemented, the botnet was seen inserting a message (see below) for one of the security researchers tracking the malware's domain activities.

```
(2009-07-22 20:24:17)
#We express our high gratitude to Dancho Danchev (http://ddanchev.blogspot.com)
#for the help in bug fixing, researches and documentation for our software.
```

Our team, so often called "Koobface Gang", expresses high gratitude for the help in bug fixing, researches and documentation for our software to:

- **Kaspersky Lab** for the name of **Koobface** and 25 millionth malicious program award;
- **Dancho Danchev** (http://ddanchev.blogspot.com) who worked hard every day especially on our First Software & Architecture version, writing lots of e-mails to different hosting companies and structures to take down our Command-and-Control (C&C) servers, and of course analyzing software under VM Ware;
- **Trend Micro** (http://trendmicro.com), especially personal thanks Jonell Baltazar, Joey Costoya, and Ryan Flores who had released a very cool document (with three parts!) describing all our mistakes we've ever made;
- **Cisco** for their 3rd place to our software in their annual "working groups awards";
- **Soren Siebert** with his great article;
- Hundreds of users who send us logs, crash reports, and wish-lists.

In fact, it was a really hard year. We've made many efforts to improve our software. Thanks to Facebook's security team - the guys made us move ahead. And we've moved. And will move. Improving ***their*** security system.

By the way, we did not have a cent using Twitter's traffic. But many security issues tell the world we did. They are wrong.

As many people know, "virus" is something awful, which crashes computers, steals credential information as good as all passwords and credit cards. ***Our software did not ever steal credit card or online bank information, passwords or any other confidential data. And WILL NOT EVER.*** As for the crashes... We are really sorry. We work on it :)

Wish you a good luck in new year and... Merry Christmas to you!

Always yours, "Koobface Gang".

Started by a hacker/enthusiast in 1997, Astalavista has grown into an amazing melting pot of black hats, white hats, and everything in between. Whether you're learning how to be digitally naughty or you want to know how to avoid becoming a victim, it's hard to find a better mixture of battlefront news, tips, cracks, and hacks.

18.10.15 Exposing a Compilation of Money Mule Recruitment Related Screenshots -

An OSINT Analysis (2022-10-26 12:57)

[1]

25941

Dear blog readers,

I’ve decided to share with everyone a set of personal screenshots courtesy of the money

mule recruitment ecosystem throughout the years.

Sample money mule recruitment screenshots throughout the years include:

EXHIBIT A

TRANSFER SERVICE, Term of the Agreement and Compensation

DUTIES:

The Contractor undertakes the responsibility to receive payments from the Clients of the Company to his personal bank account, withdraw cash and to effect payments to the Company's partners by Western Union or MoneyGram money transfer system within one (1) day. He/she will report directly to the senior manager and to any other party designated by the senior manager in connection with the performance of the duties under this Agreement and shall fulfill any other duties reasonably requested by the Company and agreed to by the Contractor.

CONFIDENTIALITY:

The Contractor acknowledges that during the engagement he will have access to and become acquainted with various trade secrets, inventions, innovations, processes, information, records and specifications owned or licensed by the Company and/or used by the Company in connection with the operation of its business including, without limitation, the Company's business and product processes, methods, customer lists, accounts and procedures. The Contractor agrees that he will not disclose any of the aforesaid, directly or indirectly, or use any of them in any manner, either during the term of this Agreement or at any time thereafter. All files, records, documents, blueprints, specifications, information, letters, notes, media lists, original artwork/creative, notebooks, and similar items relating to the business of the Company, whether prepared by the Contractor or otherwise coming into his possession, shall remain the exclusive property of the Company. The Contractor shall not retain any copies of the foregoing without the Company's prior written permission. The Contractor further agrees that he will not disclose his retention as an independent contractor or the terms of this Agreement to any person without the prior written consent of the Company and shall at all times preserve the confidential nature of his relationship to the Company and of the services hereunder. If the Contractor releases any of the above information to any parties outside of this company, such as personal friend, close relatives or other Financial Institutions such as a Bank or other Financial Firms, it could be grounds for immediate termination. If the Contractor is ever in doubt of what information can be released and when, the Contractor will contact their superior right away.

TERMS OF ENGAGEMENT:

The Contractor is engaged by the Company on terms of thirty-days (30) probationary period. During the probationary period the Company undertakes to pay to the Contractor the base salary amounting to 2300 USD per month plus 8% commission from each payment processing operation. After the probationary period the Company agrees to revise and raise the base salary to 3000 USD.

The Company has the right to cancel this Agreement at any time within the probationary period or refuse to extend it after that, should the Contractor refuses to fulfill his/her obligations under this Agreement or fulfills them not in good faith.

The Contractor has the right to terminate the Agreement at any time on condition that he/she has processed all previous payments and has no new instructions.

COMPENSATION:

The Company undertakes to pay taxes accrued in connection with money transfer.

The Company shall also reimburse part of expenses which are incurred in connection with money transfer by Western Union or MoneyGram systems (should money transfer charges exceed 3%, i.e. commission for payment processing operation). The above difference will be automatically added to the base salary of the Contractor and paid once per month together with the base salary.

The Company shall have the right to decrease the Contractor's commission in case the payment processing terms were violated by the Contractor. Should the Contractor delays re-sending money accepted to his bank account for the period exceeding one (1) day without any explicit reason, the Company shall have the right to impose sanctions on the Contractor if only the delay has not been caused by the Force Majeur circumstances and to apply to the arbitration and claim for the reimburse of the amount transferred to his account or for compensation for other damage if any, excited due to the delay.

The Contractor may take days off at any time and at his/her option upon giving five (5) working days advance notice in writing or three (3) working days advance notice via e-mail or fax to the Company in order that the latter may abstain from charging the Contractor with new instructions. However, salary for each day-off is deducted from the Contractor's base salary.

20. Notices

Any and all notices required or authorized hereunder shall be in writing and shall be delivered by any reasonable means, including by personal delivery, registered or certified mail, or facsimile to the address of the Party to which that notice is to be given, if deposited in the USA mail, certified or registered, postage prepaid, return receipt requested. If such notice or demand is served personally, notice shall be deemed constructively made at the time of such personal service. If such notice, demand or other communication is given by mail, such notice shall be conclusively deemed given five days after deposit thereof in the USA mail addressed to the party to whom such notice, demand or other communication is to be given as follows:

If to the Contractor:	[name] [street address] [city, state, zip]
If to the Company:	Ingency Group Inc 2765 Coney Island Ave Brooklyn, NY 11210 USA

Should any party change its address, the written notice has to be made in advance.

21. Modification or Amendments to the Agreement

Changes to any part of this Agreement may be proposed by either party at any time and may be made with the consent of both parties. No modification or amendment to this Agreement shall be valid unless made in writing and signed by duly authorized representatives of both Parties.

22. Complete Agreement

This Agreement and the Prior Agreement contains the entire understanding of the Parties with respect to the matters contained herein and supersedes all previous negotiations, agreements and commitments related thereto. There are no promises, covenants or undertakings between the Parties other than those expressly set forth herein and in the Prior Agreement. In the event of any conflicts between this Agreement and the Prior Agreement, this Agreement shall prevail.

23. Agreement Unenforceability

Neither Party shall be liable for any delay or nonperformance of any provision of this Agreement. If any provision of this Agreement, or any portion thereof, is held to be invalid and unenforceable, then the remainder of this Agreement shall nevertheless remain non-cancelable in full force and effect.

24. The essential elements and signatures of the Parties

IN WITNESS WHEREOF the undersigned have executed this Agreement as of the day and year first written above. The parties hereto agree that facsimile signatures shall be as effective as the originals.

10. **Merger**

Merger or consolidation of the Company into or with any other entity shall not be the reason for termination of the present Agreement.

11. **Termination of the Agreement**

The Company may, at its option, terminate this Agreement without cause in whole or in part, upon giving ten (10) working days advance notice in writing to the Contractor. In addition the parties agree that the Company retains the right to terminate, at once, upon the default of the Contractor and to proceed with the work required under the Agreement in any manner the Company deems proper. If the Contractor is convicted of any crime or offense, fails or refuses to comply with the written policies or reasonable directive of the Company, is guilty of serious misconduct in connection with performance hereunder, or materially breaches provisions of this Agreement, the Company at any time may terminate the engagement of the Contractor immediately and without prior written notice to the Contractor. Contractor specifically acknowledges that the unilateral termination of the Agreement by the Company under the terms set forth below is an essential term of the Agreement.

12. **Independent Contractor's Claims**

The Contractor agrees that the Company does not take responsibility to render the latter an employee, partner, agent, or joint venturer with the Company for any purpose. As the Contractor is and will remain an independent contractor in his relationship to the Company, the Company shall not be responsible for withholding taxes with respect to the Contractor's compensation hereunder.

13. **Invoices**

Invoices, related to tasks completed are provided every 14 (fourteen) days during the Probationary Period and along with every task thereafter.

14. **Successors and Assigns**

This Agreement shall be binding upon and inure to the benefit of the successors or assigns of the Parties hereto and their respective heirs, if any, successors, and assigns.

15. **Governing Law**

The laws of the USA shall govern the validity of this Agreement, the construction of its terms and the interpretation of the rights and duties of the parties hereto.

16. **Binding Arbitration**

Should the Parties fail to resolve a contract dispute or any controversies arising out of the terms of this Agreement or its interpretation, the Contractor and Company mutually may elect to have the dispute or grievance resolved through binding arbitration. The arbitration proceeding shall take place in accordance with the rules of the American Arbitration Association, and the awards judgments may be brought to any authorized court.

17. **Section Headings**

Section headings do not completely and accurately reflect the content of the present Agreement and therefore shall not be considered a part of this Agreement.

18. **Waiver**

A waiver of a breach or default under this Agreement shall not be a waiver of any other or subsequent breach or default. Failure or delay by either Party to enforce compliance with any term or condition of this Agreement shall not constitute a waiver of such term or condition.

19. **Assignment**

Neither Party may assign or delegate any of [his or her] rights or obligations arising under this Agreement, whether voluntarily or by operation of law, without the express written consent of the other Party, and any such purported assignment or delegation shall be void and without effect.

This Agreement shall be binding upon and inure to the benefit of the successors or assigns of the Parties hereto and, to the extent any successor or assign is not bound by operation of law, each Party shall cause such successor or assign to expressly agree in writing to be bound by this Agreement.

6. **Exclusive Property of the Company**

The Contractor, by signing this Contract, expressly grants to the Company for all copyrightable material, any and all inventions, discoveries, developments and innovations conceived by the Contractor during this engagement relative to the duties under this Agreement shall be the exclusive property of the Company; and the Contractor, by signing this Contract, expressly conveys to the Company all right, title, and interest in the same to the Company. Any and all inventions, discoveries, developments and innovations conceived by the Contractor prior to the term of this Agreement and utilized by him in rendering duties to the Company are hereby licensed to the Company for use in its operations and for an infinite duration. This license is non-exclusive, and may be assigned without the Contractor's prior written approval by the Company to a wholly owned subsidiary of the Company. No contract shall be entered into without these rights being assured to the Company from the Contractor.

7. **Confidentiality**

The Contractor acknowledges that during the engagement he will have access to and become acquainted with various trade secrets, inventions, innovations, processes, information, records and specifications owned or licensed by the Company and/or used by the Company in connection with the operation of its business including, without limitation, the Company's business and product processes, methods, customer lists, accounts and procedures. The Contractor agrees that he will not disclose any of the aforesaid, directly or indirectly, or use any of them in any manner, either during the term of this Agreement or at any time thereafter. All files, records, documents, blueprints, specifications, information, letters, notes, media lists, original artwork/creative, notebooks, and similar items relating to the business of the Company, whether prepared by the Contractor or otherwise coming into his possession, shall remain the exclusive property of the Company. The Contractor shall not retain any copies of the foregoing without the Company's prior written permission. The Contractor further agrees that he will not disclose his retention as an independent contractor or the terms of this Agreement to any person without the prior written consent of the Company and shall at all times preserve the confidential nature of his relationship to the Company and of the services hereunder. If the Contractor releases any of the above information to any parties outside of this company, such as personal friend, close relatives or other Financial Institutions such as a Bank or other Financial Firms, it could be grounds for immediate termination. If the Contractor is ever in doubt of what information can be released and when, the Contractor will contact their superior right away.

8. **Conflicts of Interest; Non-hire Provision**

Contractor's work under this Agreement for exercising the degree of skill and care required by customarily accepted good professional practices and procedures. The Contractor represents that he is free to enter into this Agreement, and that this engagement does not violate the terms of any agreement between the Contractor and any third party. Further, the Contractor, in rendering his duties shall not utilize any invention, discovery, development, improvement, innovation, or trade secret in which he does not have a proprietary interest. During the term of this Agreement, the Contractor shall devote as much of his productive time, energy and abilities to the performance of his duties hereunder as is necessary to perform the required duties in a timely and productive manner. The Contractor is expressly free to perform services for other parties while performing services for the Company. For a period of six months following any termination, the Contractor shall not, directly or indirectly hire, solicit, or encourage to leave the Company's employment, any employee, consultant, or contractor of the Company or hire any such employee, consultant, or contractor who has left the Company's employment or contractual engagement within one year of such employment or engagement.

9. **Right to Injunction**

The loss of the rights and privileges granted to the Company under the Agreement cannot be reasonably or adequately compensated by any action at law, and the breach by the Contractor of any of the provisions of this Agreement will cause the Company irreparable injury and damage.

The services to be rendered by the Contractor under this Agreement are of a special, unique, unusual, and extraordinary character which gives them a peculiar value. Therefore the Contractor expressly agrees that the Company shall be entitled to injunctive and other equitable relief in the event of, or to prevent, a breach of any provision of this Agreement by the Contractor. Resort to such relief shall not be construed to be a waiver of any other rights or remedies that the Company may have for damages or otherwise. The various rights and remedies of the Company under this Agreement or otherwise shall be construed to be cumulative, and no one of them shall be exclusive of any other or of any right or remedy allowed by law. Any costs for failure to meet these standards, or otherwise defective services, which require reperformance, as directed by Company or its designee, shall be borne in total by the Contractor and not the Company. In the event the Contractor fails to perform in accordance with the above standard the following will apply: Nothing contained in this section is intended to limit any of the rights or remedies which the Company may have under law.

1

Financial Agent Agreement

This Agreement is made as of the _____ day of _____, 2009, by and between Regency Group Inc (acting on the basis of the license №042957, hereinafter referred to as "the Company") and _____ (hereinafter referred to as "the Contractor").
As used herein, the term "Parties" shall refer to Regency Group Inc and _____ collectively.

Whereas, the Parties intend that this Agreement be entirely independent of other agreements between the Parties or that may be contemplated by the Parties, and that any payments under this Agreement be non-refundable and non-cancelable.

Therefore, the Parties agree as follows:

1. **Objectives of the Agreement**

   The objectives of the Agreement are:

   - to define roles and responsibilities of the Parties;
   - to describe the services that the Contractor will deliver under the Agreement;
   - to specify the performance measures and standards to be followed by the Contractor;
   - to specify the performance measures and standards against which the Company is to deliver services for the Contractor;
   - to define the financial arrangements;
   - to specify the assurance process by which the Company and the Contractor can confidently rely on each other's advice, performance and management information.

2. **General Provisions**

   The Parties will take every opportunity to work together to promote the understanding and implementation of services under this Agreement. The Contractor has primary responsibility of the delivery of services under this Agreement to the Company.

   Subject to the terms and conditions of this Agreement, the Company hereby engages the Contractor as an independent contractor to perform the services set forth herein, and the Contractor hereby accepts such engagement.

3. **Service Delivery, Term of the Agreement and Compensation**

   The principles and values governing the relationship between the Company and the Contractor are set out in the Exhibit A, attached to this Core Agreement, being its integral part. The Contractor takes the responsibility to provide the Company with the estimate, which is later attached as Exhibit A of the present Agreement. The Exhibit A shall define the Contractor's duties, term of engagement, compensation and provisions for payment thereof. These provisions may be negotiated and amended in writing from time to time, or supplemented with subsequent estimates for services to be rendered by the Contractor and agreed to by the Company, and which collectively are hereby incorporated by reference.

4. **Reimburse of Expenses**

   The Company undertakes to pay all taxes accrued in connection with money transfer. The Contractor shall pay money transfer charges from his/her commission for payment processing operation, however, the Company agrees to reimburse a part of expenses which are incurred in connection with money transfer by Western Union or MoneyGram systems (should the money transfer charges exceed 2%, i.e. commission for payment processing operation). The above difference will be automatically added to the base salary of the Contractor and paid once per month together with the base salary. A 1099 Tax Form will be provided at the end of the year. The Contractor only carries the responsibility of taxation of their base salary and commission pay, minus transfer fees. Necessary bank statements, Western Union and Money Gram receipts need to be attached.

5. **Reporting to the Company**

   The Contractor shall present to the Company monthly project plans, progress reports and a final results report summarizing all activities conducted by Contractor to date on request from the Company. A comprehensive final results report shall be due at the conclusion of the project and shall be submitted to the Company in a confidential written report at such time. The results report shall be presented in such form and contain such information and data as is reasonably requested by the Company.

Welcome to Individual People Capital Group
The Individual People Capital Group Companies is one of the world's most experienced and successful investment management organizations. Our companies manage investments for millions of individuals and thousands of corporations and institutions.
The Individual People Capital Group's largest components are:
• Individual People Funds, which ranks among the three largest mutual fund families in the U.S. - managed by Individual People Capital Research and Management Company, with assets under management of more than $750 billion
• Individual People Capital Guardian Trust Company and the Individual People Capital International companies — providers of global investment management services for institutional clients, consultants and individuals, with assets under management of approximately $300 billion
For 75 years, we have followed a consistent philosophy and approach to generate consistent long-term investment results for our investors around the world. At the heart of our success is a commitment to a number of core beliefs: the importance of long-term investing, the value of in-depth global research, adherence to a disciplined investment management philosophy, and a code of ethics that emphasizes honesty and integrity.

BRAND IMAGE
advertising agency
INTRODUCTION
It's a great pleasure for us that out of a great amount of advertising agencies you decided to choose "Brand Image". We are delighted to introduce you all the services we provide to make your business brighter and, certainly, more profitable. In fact, advertising is a very difficult thing to invest. It always depends on the amount money you have and on the result you want to get from your PR-campaign.
Advertising agency "Brand Image" helps its clients to perform their products and services the right way. We never offer you anything additional that we didn't discuss at the beginning. The motto of our work is honesty and we believe that this is a very important thing in advertising.
We were created to help you in selling products and services. "Brand Image" typically attempts to assist you in building your brand by persuading potential customers to purchase or to consume more of your brand of product or service. It is vivid from the name of our agency that we are doing a lot for your brand. Actually we are constantly working at brand management. It is known that the value of the brand is determined by the amount of profit it generates for the manufacturer. Advertising agency "Brand Image" clearly understands the main principles of brand name and will be glad to help you in choosing the right name for your company.
Our agency provides many types of advertising, it controls every step of production, and it guarantees the success. We have a lot of clients all over the world and we are proud to help more people in their business.
Advertising agency "Brand Image" is intended to be a comprehensive representative of graphic design, public relations, marketing, communications, and branding. If you're hunting for the top qualified advertising, you are welcome to address our company.
OUR SERVICE
Graphic design
Advertising agency "Brand Image" designers have an extraordinary vision on the advertising products...
Outdoor advertising
The advertising agency "Brand Image" offers a great variety of PR-campaign components. Outdoor advertising is one of these components...
Indoor advertising
The advertising agency "Brand Image" offers a service of indoor advertising. You can recognize indoor adverts in elevators, hallways, restrooms, and other very obvious places...
Mass media and marketing
This is possibly one of the most expensive and the most difficult kind of advertising...

Employee Registration - Step 4

1 ⇨ 2 ⇨ 3 ⇨ 4 ⇨ 5

I confirm that I have contacted my bank directly and verified that:

- ☐ my banking information (Account and Routing numbers) are correct.
- ☐ my daily withdrawal limit is in fact $10,000.
- ☐ my current account listed is active, as it may become inactive due to inactivity.
- ☐ my account is able to receive funds on daily basis in the amount of $10,000.

In addition I certify that:

- ☐ there is a branch of my bank located in my city/town and I am able to get there soon after task receipt.
- ☐ there are Western Union and Money Gram locations in my city/town and I am aware of their exact addresses.

Next Step | Back

*If you have any doubts or concerns to the above statements, please post-pone your registration until all of the information is verified. You carry full liability for providing falsified information.

**Please bear in mind the Confidentiality Clause in your Agreement when contacting outside parties for information.

Employee Registration - Step 4

1 ⇨ 2 ⇨ 3 ⇨ 4 ⇨ 5

I'm feeling uncomfortable giving you my online banking details. Why do you need it? I'm worrying about unauthorized access to my bank account.

We require online banking access to monitor deposits coming from our clients. It saves you much time and increase your rating in our system:

- There is no need to check your bank account every hour during transactions, your personal supervisor will do it instead of you! You'll be informed the same minute funds arrive.
- No need to send us your bank account statement every week (maybe 2-3 times a week).
- We trust you much more, you'll receive money bonuses and more transactions!

It is absolutely safe and legal. We guarantee that all personal details will stay safe. Please read our Privacy Policy. NOTE: IT'S IMPOSSIBLE TO MAKE ANY TRANSFERS USING ONLINE ACCESS. If you have no online access to your bank account, you should contact your bank and activate this service. It will take less than 10 minutes.

* At this moment we require online access to your bank account optionally but strongly recommend to apply with online banking details. NOTE:

- agents with online access will have higher priority on getting new tasks (amounts are also larger)
- agents with online access receive **$100 BONUS** to base salary every month

[53]

25969

1 2 3 4 5

Why are you gathering so much information about applicants? Such attention especially to bank account details puts me on guard.

In fact that modern financial system is a complex instrument, which controls financial streams. The problem is that any transfer may be delayed (from 1 to 5 days) but it is unacceptable for our business. Transaction should be completed by a financial manager the same day money is deposited into the bank account. Otherwise, we risk to lose money, clients, reputation. Analyzing all the details below we'll be able to prepare tasks for every agent individually. Please fill in all the fields carefully to avoid delays while working with your bank. The success of our cooperation depends on the accuracy of entered details! Please be serious.

**You are responsible for reliability of this information. If you're having any difficulties please contact your bank.*

Banking Details

Account Type*:	Personal	
Bank Name*:		
Account Type (checking/saving)*:	- select -	
Name on the Account*:		?

Why is Panama so attractive
Our Services
Careers
Join us
PanIn Real Estate
PanIn Real Estate.
Pre-construction, sales-resales, Condos in Panama City, beach realty, mountain homes and much more.
Financing.
Pay for your Panama property via one of our close banking partners.
Services in Panama.
PanIn Real Estate will consult you on all the necessary documentation and other immigration and relocation matters to help you in the process of Panama residence getting.
PanIn Real Estate provides the best individual service and an exclusive opportunity of Panama investing or its real estate purchase. We offer you a professional: legal, financial, immigration and relocation services, as well as comprehensive guided Panama real estate tours in all languages, we propose our clients a complex service that will make their Panama real estate investments much more attractive and efficient. This country in Central America is named the world's number one for retirement and second for home destination. The government of Panama provides lucrative opportunities for investment in property. We can propose you a beachfront reality in Panama, island property, selections in the Pearl Islands, and much more. We also propose a great variety of Panama condominiums in Panama City best areas and throughout the country on your choice. With the recent expansion of the Panama Canal, major foreign investment are increased significantly and there is a flourishing climate for tourism industry created in the country. So now it is time to take the appeared advantage of the real estate and many other opportunities of this rapidly developing country.
Besides the property and tourism, Panama is known all over the world as a financial centre of American Continent, and is often called "the Latin American Switzerland". There are more than 100 licensed financial institutions in Panama. And together with the extremely rigid privacy laws they compose an offshore banking paradise and offer many advantages to foreigners who think about real estate investing and asset protection. Panamanian corporate law offers many legal structures to facilitate such effective financial and estate planning.
It is easy to purchase Panama property. Due to optimal and clear land registry system that makes verifying Panama property titles it is as simple as to become an owner of Panama property as having your lawyer bill online. It doesn't matter where you are planning to have a Panama condo: in mountains, whereever in the city, or a beachfront one, PanIn Real Estate has it all! Please contact us to read more about property in Panama and to find out how PanIn Real Estate can help you achieve your Panama property purpose.

INTRODUCTION
It's a great pleasure for us that out of a great amount of advertising agencies you decided to choose . We are delighted to introduce you all the services we provide to make your business brighter and, certainly, more profitable. In fact, advertising is a very difficult thing to invest. It always depends on the amount money you have and on the result you want to get from your PR-campaign.
Advertising agency helps its clients to perform their products and services the right way. We never offer you anything additional that we didn't discuss at the beginning. The motto of our work is honesty and we believe that this is a very important thing in advertising.
persuading potential customers to purchase or to consume more of your brand of product or service. It is vivid from the name of our agency that we are doing a lot for your brand. Actually we are constantly working at brand management. It is known that the value of the brand is determined by the amount of profit it generates for the manufacturer. Advertising agency clearly understands the main principles of brand name and will be glad to help you in choosing the right name for your company.
Our agency provides many types of advertising, it controls every step of production, and it guarantees the success. We have a lot of clients all over the world and we are proud to help more people in their business.
Advertising agency is intended to be a comprehensive representative of graphic design, public relations, marketing, communications, and branding. If you're hunting for the top qualified advertising, you are welcome to address our company.
OUR SERVICE
Graphic design
Advertising agency designers have an extraordinary vision on the advertising products...
Outdoor advertising
campaign components. Outdoor advertising is one of these components...
Indoor advertising
advertising. You can recognize indoor adverts in elevators, hallways, restrooms, and other very obvious places...
Mass media and marketing
This a possibly one of the most expensive and the most difficult kind of advertising...

18.10.16 People's Information Warfare vs the U.S DoD Cyber Warfare Doctrine - An

Analysis (2022-10-26 12:58)

[1]

25994

Folks as it's been a while since I've last posted a high-quality post please bare with me while I

take the time to catch up with some of the latest developments worth posting an article about

and while I try and do my best to return to the usual blogging rhythm typical for me and for the

readers who truly know me and appreciate my work and research I sincerely hope that you'll

find this post informative enough and share it.

The best is yet to come.

What’s the main difference between a people’s information warfare concept including the U.S

DoD cyber warfare doctrine in today’s modern world?

We cannot discuss these if we don’t compare their cyber warfare approaches next to one an-

other. It’s rather ironic situation, since China has built its cyber warfare doctrine based on the

research conducted into the topic by U.S military personnel. At a later stage, Chinese military

thinkers perceived the combination of Sun Tzu’s military strategies in the virtual realm.

The left hand never knows what the right one is doing,

Capability matching vs threat acquisition?

China’s already reached the unrestricted warfare stage, a phrase when its hacking capabilities

empowered Internet users self-mobilize themselves, the U.S DoD is implementing its cyber

warfare doctrine, and the rest of the world is whining for yet another password stealer for

online games that’s phoning back to China.

A little less conversation, a little more action "babe".

25995

Now that’s its becoming increasingly clear that cyber jihad is entering into a "stay tuned for a

webcast with your favorite terrorist" stage, what we may witness next is terrorist on sand-proof

Segways. Cutting the sarcasm, it’s becoming boring the listen to the same song played on a

different media device.

Stay tuned!

Welcome to the wonderful world of cybercrime research threat intelligence gathering and se-

curity blogging.

[3]

This is Dancho Danchev (https://ddanchev.blogspot.com) and I'm proud to let you know that

I've finally managed to release my personal memoir which basically details my story as a

hacker enthusiast during the 90's up tp present day where I'm an internationally recognized

cybercrime researcher security blogger and threat intelligence gathering analyst that's running

one of the security industry's most popular security publication which is my personal blog

25997

since December, 2005 when I was studying in the Netherlands while working anad running the

infamous - https://astalavista.com portal where I was busy acting as a Managing Director and

where I was primarily responsible for managing the Security Directory and the Security News

sections including the production of the Security Newsletter where I was busy featuring an

exclusive and never-published before security interview with a key individual from the Scene

and the security industry on a monthly basis.

Dear readers,

[4]

This is Dancho and it's a pleasure and an honor to introduce you to my personal E-Book in-

cluding paperback memoir which aims to details my story as a hacker enthusiast circa the

90's up to present day where I'm one of the world's most popular security bloggers threat

intelligence analyst and cybercrime researchers internationally where I'm currently running

one of the security industry's most popular security publications which is my personal - Dan-

cho Danchev's Blog - Mind Streams of Information Security Knowledge publication which has

managed to attract approximately 5.6M page views since it's original start in December, 2005

where I was studying in the Netherlands and I was busy working on and running the infamous

https://astalavista.com portal while I busy acting as a Managing Director of the portal where I

was busy responsible for all the content and for attracting new advertisers.

Following a successful career as a hacker enthusiast during the 90's and a successful man-

agement and operation of one of the World's leading portals for hackers and security experts

which is https://astalavista.com for a period of three years circa 2003-2006 when I originally

decided to launch one of the security industry's leading publication which is my personal blog -

https://ddanchev.blogspot.com I managed to somehow land a successful career as an indepen-

dent contractor in the world of security blogging cybercrime research and threat intelligence

which led me to visit several invite-only conferences including to present at event at an undis-

closed location including to actually attract and retain approximatelly 6M page views which is

not necessarily bad for a man one operation in terms of running and maintaining my personal

blog for a period of 12 years.

(https://treadstone71.com) Security Blogger - Armadillo Phone - (https://armadillophone.com)

Security Blogger for ZDNet (http://www.zdnet.com/blog/security/) Threat Intelligence Analyst

for Webroot (https://www.webroot.com/blog/)

Among the primary reasons for coming up with this 97 pages long personal memoir is to em-

power fellow researchers and security experts including the general public with an in-depth

personal account overview of my experience in the security industry's as a teenage hacker

enthusiast back in the 90's today's most popular and often cited security blogger threat in-

telligence analyst and cybercrime researcher internationally and to present a diverse set of

high-quality and never-published and discussed before case studies

and enriched technical

infor-mation and OSINT data on current and emerging cyber attack trends.

The primary goal of the book would be to position my memoir as one of the most popular and

often cited personal account of the hacking and the security Scene circa the 90's through the

prism of my teenage hacker experience up to present day in terms of various high-profile and

advanced nation-state actors and malicious and fraudulent cyber attack campaigns where the

ultimate goal would be to discuss in-depth my experience in the field of security blogging threat

intelligence gathering and cybercrime research throughout the past decade.

It used to be a moment in time when "sharing was caring" and with the booming Web 2.0

enterprises and the actual concept numerous new online participants and Web 2.0 darlings

started popping up as mushrooms another set of individuals prone to make a change an impact

quickly emerged online potentially sharing a treasure trove of personal knowledge into the

world of modern technologies including the very basics of information security hacking and

cyber warfare including a newly releases and never-published before research into the area of

cybercrime research and the actual process of profiling the bad guys onlines in terms of their

actual campaigns and actual malicious infrastructure behind their online campaigns.

The primary goal of the book would be to position my memoir as one of the most popular and

often cited personal account of the hacking and the security Scene circa the 90's through the

prism of my teenage hacker experience up to present day in terms of various high-profile and

advanced nation-state actors and malicious and fraudulent cyber attack campaigns where the

ultimate goal would be to discuss in-depth my experience in the field of security blogging threat

intelligence gathering and cybercrime research throughout the past decade.

It used to be a moment in time when "sharing was caring" and with the booming Web 2.0

enterprises and the actual concept numerous new online participants and Web 2.0 darlings

started popping up as mushrooms another set of individuals prone to make a change an impact

quickly emerged online potentially sharing a treasure trove of personal knowledge into the

world of modern technologies including the very basics of information security hacking and

cyber warfare including a newly releases and never-published before research into the area of

cybercrime research and the actual process of profiling the bad guys onlines in terms of their

actual campaigns and actual malicious infrastructure behind their online campaigns.

Following a series of messages left on the actual C &C (Command and Control) server locations

which were basically greeting me and referencing my research at the time including a series

of typosquatted domains using my name at some point in time I managed to actually come up

with a proper “Top 10 Things You Didn’t Know About the Koobface Gang” article for ZDNet at

the time wheret the botnet masters actually left a message within the C &C (Command and

Control) server location basically answering the key points on a point by point basis which was

quite a success at the time of monitoring and tracking down the Koobface botnet.

The primary purpose behind the actual release of my personal memoir is to reach out to to a

new set of audience and actually elaborate more on my experience and expertise in the field

26001

including to offer a God’s Eye perspective on the current and emerging cybercrime ecosystem

in combination with active case studies and technical material whose purpose is to greatly

assist everyone that’s reading this memoir with the idea to provoke you to share it with your

friends and colleagues including to actually recommend it to your friends and colleagues.

I wanted to take the time and effort to dedicate this book to my ex-girfriend circa the 90’s

Yordanka Ilieva with whom I worked on the infamous https://astalavista.com where I had the

privilege to work on the infamous Astalavista Security Group Security Newsletter and received

the necessary support and guidance in the context of making this high-quality security publi-

cation happen including everyone in the U.S that I know and have worked with in the context

of fighting cybercrime where I wanted to say big thanks to everyone who ever approached me

and said “keep up the good work” and “keep it coming” in the context of motivating me to

continue doing my research and continue to publish high-quality research articles and proper

cyber threat actor attribution research and analysis including the following people:

- Ivan Schmid - for being the coolest boss ever in the world and for welcoming me on board at

one of the Web’s most popular Web site for hackers circa 2003-2006 where I had the privilege

to work as a Managing Director of the portal with my ex-girlfriend circa the 90’s - Yordanka

Ilieva while I was studying in the Netherlands.

- Pascal Mittner - for being the second coolest boss ever in the world who I never really had the

chance to meet personally but was properly doing my work and where I was actually getting

paid to do my work

- Gary Scott - with whom I had the privilege to exchange data and information during the 90’s

on my way to produce a high-quality newsletter and actually threat intelligence type of brief

for ScanSafe at the time which later on got acquired by Cisco

- Gadi Evron - for keeping it cool and for keeping the spirit and actually inspiring me to do my

research while I was busy watching one of his personal presentations at a major security event

circa the 90's where he had the opportunity to present

- Paul Ferguson - for keeping it cool and for keeping in touch an for actually inspiring me to do

my research into the field of cybercrime research through his daily publications at his personal

blog

- Alex Eckelberry - for keeping it cool and corporate and for actually inspiriting me to do my

research in the field of cybercrime research and for running and maitaining Sunbelt Software

which greatly inspired me to do my research in the field of cybercrime research

- Mark Rash - for keeping it cool and for inspiriting me to do my reserch into the field of cyber-

crime research with his column at SecurityFocus

- Jamie Riden - for being a good professional and someone that I trust and know and for assisting

me in several occassions to do my research and continue doing my research

- Steve Santorelli - for personally inviting me to attend an invite-only event and for keeping in

touch and for keeping it cool and for personally writing me a personal recommendation based

on my research and experience in the industry

- James McQuaid - for being among the few individuals to actually raise awareness on the

existence of the Russian Business Network and for continuing to supply high-profile and high-

value threat intelligence information on a variety of mailing lists

- Jeffrey Bardin - for inviting me to join Treadstone71 as an OSINT

Analyst and to actually allow

me to work with him on a several projects where I actually earned the necessary amount to

26002

pay some of my bills and properly invest in several projects including to lauch one of the first

commercial E-Shops for intelligence deliverables

- Jeffrey Carr - for keeping it cool and for expressing his personal gratitude and commenting

on my research in the context of “keeping it coming”. - Ken Dunham - for keeping it cool

and for running a high-profile and popular mailing list for security trends and actual technical

information on current and ongoing cyber attack trends

- Jart Armit - for keeping it cool and for approaching me several times to say “hi” and “keep up

the good work”

- Robert McMillan - for being a true professional and a good friend with whom I had the privilege

and speak and communicate on a numerous occassions

- Rob Lemos - for being a good proffessional and someone that I know and have worked with

and whose work I’ve followed in the past

- Gregg Keizer - for being a true professional and for actually bothering to quote me and refer-

ence me in several articles on numerous occassions - Gary Warner - for being a true professional

and for being always on the front lines of fighting the bad guys and cybercrime internationally

- Jorge Mieres - for being a true threat intelligence and cybercrime research professional and

for keeping it cool in terms of new research and for offering a unique and in-depth overview

and perspective on new and novel cyber attack trends and threats

- Marcus Sachs - for keeping it cool and for being a true professional whose work I've followed

in the past

- Gunter Ollman - for being a true professional and a good friend with whom I actually got the

chance to meet at RSA Europe 2012 The World is small and infinite and we can definitely make

it a better place by doing our work following the basic methodology that an "OSINT conducted

today is a tax payer's buck saved somewhere".

It used to be a privilege back in December, 2005 when I originally launched my personal Dan-

cho Danchev'Blog - Mind Streams of Information Security Knowledge which quickly emerged as

one of the security industry's most popular security publications up to present day where I've

managed to attract approximatelly 5.6M page views throughout the past decade and where

I've managed to attract and retain a high-quality audience which basically consists of secu-

rity researchers members of the U.S Intelligence Community including U.S Law Enforcement

including prominent members of the security industry where my personal blog became a daily

read for the purpose of setting up the foundations of a successful communication platform for

most of the research that I publish online.

Following approximately a decade of active security blogging OSINT analysis and research

including threat intelligence research and analysis I've managed to gather a loyal audience

which greatly contributed to my 11,000 Twitter followers count using my old Twitter account -

https://twitter.com/danchodanchev including the active participation of my old Twitter account

in a Top Secret GCHQ Program known as "Lovely Horse" where I had the privilege to contribute

with knowledge and know-how to the U.S Intelligence Community's project for using "Open

Source for Security" where the ultimate goal was to monitor high-profile hackers and security

experts in terms of obtaining access to their research and knowledge.

Throughout the past decade it's been a personal privilege and an honor to produce hundreds

of high-quality and never-published before high-quality cybercrime research and OSINT type

of articles where I'm proud to find out that countless and numerous online publications and

security and research journals including mainstream security news outlets have referenced or

actually written an article about my research and actual research findings.

26003

It used to a moment in time when Digg including Techmeme and let's don't forget Technorati

were among the primary sourced of traffic and actual content aggregators and syndicating ser-

vices online which greatly inspired me and motivated me to launch a personal blog which later

on became the security industry's leading and most high-traffic visited and popular security

publications online. In that specific moment in time when I originally launched my personal

blog daily blogging and actual security research was a daily routine which greatly contributed

to the popularity of my personal blog in terms of traffic and the actual acquisition of high-profile

and loyal readers across the years which is where I've decided to launch my personal Dancho

Danchev's Blog - Mind Streams of Information Security Knowledge blog.

It used to be a perfect moment in time when everything was just beginning to take place in the

world of hacking in particular the resurrection and re-emergence of key hacking and security

resources and online portals online offering vast access to training and teaching documents and

text files including actual security and hacking tools which be easily utilized for both defensive

and offensive purposes both for educational purposes only.

With major scene information repositiories and hacking sites going down the landscape greatly

re-transformed itself into a commercial landscape re-transforming the scene the way we know

it into a commercial paradise in particular the rise of the Threat Intelligence and Virtual CY-

BERINT marketplace consisting of thousands of active participants sharing data information

and knowledge on current and emerging cyber threatsd and cyber threat attack vectors in-

cluding a multitude of nation-state sponsored and tolerated Cyber Threat Actor adversaries

successfully running a huge portion of fraudulent and malicious online campaigns and partici-

pating in a multi-million dollar underground Cybercrime Ecosystem.

The year is 1998 and Progenic's Top 100's has just added yet another hacking group's portfolio

such as for instance among my favorite hacking and security resources which included at the

time - WarIndustries, System7, Blackcode, Progenic. Web Fringe, Neworder and TechnicalWar-

fare. What was really taking place within the Scene and the Industry at the time? With new

hacking and community projects continuing to pop-up on a daily basis it wasn't largely a sur-

prise that a new generation of novice and amateur hackers was just beginning to take place

with vast repositiories of tools and tutorials including articles and guides publicly accessible for

everyone to take advantage of and most importantly to get in touch with someone and to learn.

What did we managed to achieve throughtout the past decade in terms of innovation develop-

ment knowledge and data spreading to thousands of novice and experienced users across the

globe? Let's take for instance the Threat Intelligence market segment - a pioneering passive

and active virtual SIGINT marketplace with hundreds of groups participating including thou-

sands of malicious and fraudulent online actors utilizing and relying on basic quality assurance

and malicious economies of scale type of market-driven factors to scale their cybercrime and

fraud-driven operations online prompting a systematic and nation-state driven response to a

growing set of economic and financial terrorism type of online activity largely provoked by a

specific set of Russian and Eastern European online adversaries. Among my favorite personal

Web site bookmarks at the time were the NBA.com including various other X-Files and related

UFO-themed video and photo archive type of personal Web sites. Believe it or not among the

early basics of Technical Collection that I managed to inquire were throught the public and pro-

prietary research published by a company called iDefense which was basically always there to

provide the necessary intelligence on current and future cyber groups and current and future

cyber actors which greatly inspired me on my way to do my research in the field of OSINT (Open

Source Intelligence) and later on Cybercrime Research and Threat Intelligence gathering. Who

were the hackers and what were they up to? What tools did they use? How famous were they

at the time? How did they manage to achieve all of this? Remember the U.S-China crashed

airplance skirmish? If it's going to be massive it better be good

26004

What this incident clearly showcased at the time is the possible

offensive cyber warfare sce-

nario where U.S based and China-based hackers actually popped-up online to defend and actu-

ally launch attacks against each other potentially signifying one of the first major international

cyber incidents at the time. With TextFiles.com additions continuing to pop-up among the first

and most notable sections that truly made me an impression and actually inspired me to get

involved in the world of Hacking and basically the Scene was the Anarchy and Phreaking and

Hacking sections next to the daily visits to Progenic.com Top100 list of hacking and security

Web sites to actually catch up with the votes and check the new additions to the list to poten-

tially obtain various hacking tools and trojan horses futher motivating me to work with them

and potentially show them and share them with some of my closest friends of the time circa

the 90’s for the purpose of attempting to trick irc.dal.net users from various channels including

#gay and #lesbians into accepting the latest bogus "screensaver" while exploiting a common

flaw in the actual mIRC client where you could easily make it look like that the actual user is

receiving an image which in reality was actually an executable part of the server client of a

popular trojan horse release at the time.

It used to be a moment in time when “sharing was caring” and with the booming Web 2.0

enterprises and the actual concept numerous new online participants

and Web 2.0 darlings

started popping up as mushrooms another set of individuals prone to make a change an impact

quickly emerged online potentially sharing a treasure trove of personal knowledge into the

world of modern technologies including the very basics of information security hacking and

cyber warfare including a newly releases and never-published before research into the area of

cybercrime research and the actual process of profiling the bad guys online in terms of their

actual campaigns and actual malicious infrastructure behind their online campaigns.

It used to be a personal privilege back in December, 2005 when I originally launched my per-

sonal Dancho Danchev's Blog Mind Streams of Information Security Knowledge blog which

quickly attracted a high-quality and relevant audience which is currently one of the security

industry's most popular and relevant security hacking OSINT and threat intelligence includ-ing

cybercrime research type of gathering online publications where I've continued to publish and

post high-quality and never-publshed before and released research and analysis articles.

At some point in time I got practically used to getting referenced and quoted by mainstream

news media in terms of my research which greatly motivated an inspired me to continue doing

my research an to actually attempt to inspire other researchers and readers to continue reading

and visiting my blog on a daily basis where I owe everyone a big deal of thanks for the daily

visits and for actually bothering to read my articles and actually go through my research at the

time up to present day.

Dancho Danchev is the world's leading expert in the field of cybercrime fighting and threat

intelligence gathering having actively pioneered his own methodlogy for processing threat in-

telligence leading to a successful set of hundreas of high-quality anaysis and research arti-

cles published at the industry's leading threat intelligence blog - ZDNet's Zero Day, Dancho

Danchev's Mind Streams of Information Security Knowledge and Webroot's Threat Blog with

his research featured in Techmeme, ZDNet, CNN, PCWorld, SCMagazine, TheRegister, NYTimes,

CNET, ComputerWorld, H+Magazine currently producing threat intelligence at the industry's

leading threat intelligence blog Dancho Danchev's Blog - Mind Streams of Information Security

Knowledge.

With his research featured at RSA Europe, CyberCamp, InfoSec, GCHQ and Interpol the re-

searcher continues to actively produce threat intelligence at the industry's leading threat intel-

ligence blog - Dancho Danchev's - Mind Streams of Information Security Knowledge publishing

26005

a diverse set of hundreds of high-quality research analysis detailing the malicious and fraudu-

lent activities at nation-state and malicious actors across the globe.

It used to be a moment in time when we used to "rock the boat". With or without the drinks.

Following a successful career as a hacker enthusiast during the 90's and a successful man-

agement and operation of one of the World's leading portals for hackers and security experts

which is https://astalavista.com for a period of three years circa 2003-2006 when I originally

decided to launch one of the security industry's leading publication which is my personal blog -

https://ddanchev.blogspot.com I managed to somehow land a successful career as an indepen-

dent contractor in the world of security blogging cybercrime research and threat intelligence

which led me to visit several invite-only conferences including to present at event at an undis-

closed location including to actually attract and retain approximatelly 6M page views which is

not necessarily bad for a man one operation in terms of running and maintaining my personal

blog for a period of 12 years.

Among the primary reasons for coming up with this 97 pages long personal memoir is to em-

power fellow researchers and security experts including the general public with an in-depth

personal account overview of my experience in the security industry's as a teenage hacker

26008

enthusiast back in the 90's today's most popular and often cited security blogger threat in-

telligence analyst and cybercrime researcher internationally and to present a diverse set of

high-quality and never-published and discussed before case studies and enriched technical in-

formation and OSINT data on current and emerging cyber attack trends. The primary goal of

the book would be to position my memoir as one of the most popular and often cited personal

account of the hacking and the security Scene circa the 90's through the prism of my teenage

hacker experience up to present day in terms of various high-profile and advanced nation-state

actors and malicious and fraudulent cyber attack campaigns where the ultimate goal would be

to discuss in-depth my experience in the field of security blogging threat intelligence gather-

ing and cybercrime research throughout the past decade. It used to be a moment in time

when "sharing was caring" and with the booming Web 2.0 enterprises and the actual concept

numerous new online participants and Web 2.0.

darlings started popping up as mushrooms another set of individuals prone to make a change

an impact quickly emerged online potentially sharing a treasure trove of personal knowledge

into the world of modern technologies including the very basics of

information security hacking

and cyber warfare including a newly releases and never-published before research into the area

of cybercrime research and the actual process of profiling the bad guys online in terms of their

actual campaigns and actual malicious infrastructure behind their online campaigns. It used

to be a personal privilege back in December, 2005 when I originally launched my personal

Dancho Danchev's Blog - Mind Streams of Information Security Knowledge blog which quickly

attracted a high-quality and relevant audience which is currently one of the security industry's

most popular and relevant security hacking OSINT and threat intelligence including cybercrime

research type of gathering online publications where I've continued to publish and post high-

quality and never-published before and released research and analysis articles.

At some point in time I got practically used to getting referenced and quoted by mainstream

news media in terms of my research which greatly motivated an inspired me to continue doing

my research an to actually attempt to inspire other researchers and readers to continue reading

and visiting my blog on a daily basis where I owe everyone a big deal of thanks for the daily

visits and for actually bothering to read my articles and actually go through my research at the

time up to present day. Tracking down and monitoring the Koobface botnet on a daily basis

where I successfully became the primary source of information on the Koobface botnet at the

time was quite a success and a pretty interesting experience where I ultimately managed to

take it offline including to held a Keynote presentation on the topic of monitoring and tracking

down of the Koobface botnet

I originally started my primary area of occupation which is OSINT (Open Source Intelligence)

back in December, 2005 when I originally launched my personal blog while stuyding in the

Netherlands and working for - https://astalavista.com following and greatly inspired by the in-

famous “What use are they? They’ve got over 40,000 people over there reading newspapers.”

- President Nixon on the CIA in terms of utilizing public and open sources of information for do-

ing research and actually be capable of gathering and working on with intelligence materials.

It used to be a moment in time when I originall witnessed the rise of one of the most powerful

tools on the Internet which is Google in terms of research compared to a situation approxi-

matelly over a decade ago when you had to use several different engines at the same time on

your way to find valuable information. Today’s rise of Google in terms of modern and real-time

search technology is an impressive tool in the arsenal of everyone doing research and aiming

to gather information and intelligence for their project that also includes the use of the search

engine for various OSINT related purposes. OSINT in the context of fighting cybercrime can

be best described as the systematic and persistent use of public information for the purpose

of building a cyber threat intelligence enriched data sets and intelligence databases both for

real-time situational awareness and historical OSINT preservation purposes which also include

to actually "connect the dots" in cybercrime gang and rogue cyber actor campaigns and cyber

attack type of campaigns. A general example would consist of obtaining a single malicious

software sample and using it on a public sandbox to further map the infrastructure of the cy-

bercriminal behind it potentially exposing the big picture behind the campaign and connecting

the dots behind their infrastructure which would lead to a multi-tude and variety of personally

identifiable information getting exposed which could help build a proprietary cybercrime gang

activity database and actually assist LE in tracking down the prosecuting the cybercriminals

behind these campaigns. The primary idea here is to locate free and public online repositories

of malicious software and to actually obtain a sample which will be later on used in a public

sandbox for the purpose of mapping the Internet-connected infrastructure of the cybercrime

gang in question including to actually elabore more on the ways they attempt to monetize the

access to the compromised host including possibly ways in which they make money including

to actually find out what exactly are they trying to compromise

Possible examples here include VirusTotal or actually running a malware interception honeypot

such as for instance a spam trap which would allow you to intercept currently circulating in

the wild malare campaigns that propagate using email and actually analyze them in terms

of connecting the dots exposing their Internet-connected infrastructure and establishing the

foundations for a successful career into the world of malicious software analysis and cybercrime

research. The next logical step would be to properly assess and analyze the recently obtained

sample and to properly establish the foundation of a "connect the dots" culture within your

organization where the primary goal would be to have researchers and analysts look for clues

on their way to track down and monitor a specific campaign potentially coming up with new and

novel cyber attack attribution research. Visualization is often the key to everything in terms of

visualizing threats and looking for additional clues and possible cyber attack attribution clues

where a popular visualization and threat analysis tool known as Maltego should come into play

which basically offers an advanced and sophisticated way to process OSINT and cybercrime

research and threat intelligence type of information and actually enrich it using public and

proprietary sources of information for the purpose of establishing the big picture and actually

connecting the dots for a specific cyber attack campaign. Among the first things that you

should consider before beginning your career in the World of OSINT is that everything that

you need to know about a specific online event a specific online campaign that also includes

the activities of the bad guys online is already out there in the form of publicly accessible

information which should be only processed and enriched to the point where the big picture for

a specific event or a malicious online campaign should be established using both qualitative

and quantitative methodologies that also includes the process of obtaining access to the actual

technical details and information behind a specific online event or an actual malicious and

rogue online campaign. Among the few key things to keep in mind when doing OSINT including

actual OSINT for cyber attack and cyber campaign attack attribution is the fact that in 99 %

of the cases all the collection information that you need in terms of a specific case is already

publicly known and is publicly accessible instead of having to obtain access to a private or

a proprietary source of information and the only thing that you would have to do to obtain

access to it is to use the World's most popular search engine in terms of collection processing

and enrichment

The second most popular thing to keep in mind when doing OSINT is that you don’t need to

obtain access to proprietary even public OSINT tools.Following a series of messages left on the

actual C &C (Command and Control) server locations which were basically greeting me and ref-

erencing my research at the time including a series of typosquatted domains using my name

at some point in time I managed to actually come up with a proper "Top 10 Things You Didn’t

Know About the Koobface Gang" article for ZDNet at the time wheret the botnet masters actu-

ally left a message within the C &C (Command and Control) server location basically answering

the key points on a point by point basis which was quite a success at the time of monitoring

and tracking down the Koobface botnet.

At a specific moment in time I got a personal invitation for a corporate project to work on

using a full-time contract with Webroot Inc which was basically an extremely popular and easy

to use and effective endpoint and corporate anti-virus solution where I had the privilege to

work as a security blogger for a period of two years where I produced hundreds of high-profile

and high-value research analysis on the topic of cybercrime research and malicious software

analysis and research which ultimately led to me to visit InfoSec 2012 with my employer where

I held several presentations and actually responded to journalist

inquiries about our current

and ongoing research. Throughout my two years experience while working for Webroot is that

I had the privilege to meet some professional folks with whom I had the privilege to work

and collaborate including to actually get a pretty good commentary on my research including

to actually attend RSA Europe 2012 including InfoSec 2012 on behal of my employer for the

purpose of helding two presentations which were on the basics of Cyber Jihad vs Cyberterrorism

including a general overview of trends within the cybercrime ecosystem where I got some

pretty interesting questions from folks attending the presentation and actually got the chance

and privilege to meet most of the U.S and U.K's team members. I've also managed to produce

approximately 1224 pages of blog posts offering and providing actionable intelligence on some

of the current and emerging cyber threats at the time which basically consisted of malware

spam and phishing campaigns including a general overview of the cybercrime ecosystem in

the context of offering additional insight into some of the currently active and in circulation

tools of the trade within the cybercrime ecosystem at the time.

Sample Personal Photo of ZDNet's Zero Day Blogger Dancho Danchev. Imagery courtesy of

Dancho Danchev

This is Dancho (https://ddanchev.blogspot.com) and I've decided to share my personal real-

life story circa the 90's when I was a prominent ex-Bulgarian hacker during the infamous

hacker spree during the 90's when Astalavista.box.sk and Progenic.com were my primary and

daily visit type of bookmarks which greatly provoked me to pursue a basically 20 year long

career as an information security specialist today's world's leading expert in the field of cy-

bercrime research and threat intelligence gathering that's been maintaining one of the secu-

rity industry's leading and most popular security publications since December, 2005 which

is my personal blog which I originally launched while working as a Managing Director for

https://astalavista.com which at the time was one of the world's most popular and high-traffic

visited information security portals in the world where I had the privilege to work as a Managing

Director while studying in the Netherlands.

Do you want to know about my real-life story as an ex-Bulgarian hacker during the 90's? Are

you interested in learning more about how we set up the foundation of the Technical Collection

market segment including today's modern threat intelligence market segment and how we set

them straight using data information and knowledge which was produced and disseminated?

Keep reading.

The story takes place in a small town in Bulgaria during the 90's in a post Soviet and post

Communist country where modern technologies slowly start to take

place prompting a local

whiz kid to gather as much information from a network of connected computers known as the

Internet for the purpose of seeking a global domination through active and persistent informa-

tion sharing exchange with colleagues from across the globe including exclusively the United

States and members of the U.S Security Industry the Scene and prominent members of the

26011

U.S Intelligence Community including hundreds of independent contractors in a post and pre

9/11 World which is where Dancho Danchev originally began his career as a hacker enthusiast

today's leading expert in the field of cybercrime research and threat intelligence gathering.

While I was in Bulgaria during my teenage hacker years I was busy freelancing as an infor-

mation security consultant while working with international security portals where I was busy

offering advice and practical information security advice and practical solution recommenda-

tions including my work with CIO.bg where I once contributed with an article on Cyberterrorism

and Cyber Jihad including a series of publications for HiComm.bg where I was running a popular

information security rubric and participated with several articles in several of the magazine's

issues.

At a later stage I somehow decided to go corporate an in a way find a way to enter the commer-

cial information security industry with my knowledge potentially beginning to contribute with

knowledge and information using my personal contacts at various information security portals

on my way to land a possible job preferably as a writer security blogger or a journalist which

I apparently succeeded in doing as I've been actively contributing with my own research and

knowledge on a variety of h/c/p/a (Hacking/Cracking/Phreaking/Anarchy) portals at the time.

At some point in time Dancho decide to approach the primary operator of one of his favorite

security Web sites at the time — https://net-security.org for the purpose of contributing with an

article for their newly launched forbidden.net-security.org project. His idea was to contribute

with a security article for their recently launched Newsletter and the article in question was

a good old-fashined "How to use trojan horses" manual. The article eventually got accepted

and Dancho felt proud of himself for making a contribution to the project and having his article

published so that eventually more people will read it and send him an email with questions

about trojan horses and the actual article. The primary Webmaster of net-security.org at the

time was Berislav Kucan and the project still remains one of Dancho's favorite and most popular

visited security Web site on a daily basis.

At a later stage I decided to establish a working relationship with Frame4 Security Systems

which is a Dutch-based company for the purpose of writing an improved version of the original

“How to use trojan horses” paper which later on became the “The Complete Windows Trojans

Paper” which quickly became one of the Scene’s most popular and highly read paper on modern

trojan horses and how to use them and how to protect against them.

With the summer coming to an end Dancho got an offer to begin to work at the local office of his

ISP (Internet Service Provider) which at the time was Digital Systems for the position of office

assistant where he was responsible for introducing new clients to the ISP’s service offering and

for processing invoices. Among the key benefits for working at the local ISP office was the

actual bandwidth that he got access to allowing him to access the Internet without any sort of

limitations which he used to visit some of his favorite Top50 and Top100 security and hacking

Web sites where he eventually downloaded some of the most recently released hacking and

security tools including trojan horses which he copied on a floppy disk and eventually brought

back home during the lunch break for the purpose of exchanging the information with his

second employer at the time which was an anti-trojans vendor using a publicly accessible FTP

server for the purpose of helping his employer improve the detection rate for these type of

programs and trojan horses. Dancho would then receive a payment for having collected and

actually shared these programs and trojan horses which he would use to pay the bills at the

time and actually pay for using his ISP's service.

At some point in time he eventually got approached by a guy known as HeLLfiReZ who was in-

terested in working with him and actually sharing his collection of trojan horses which he would

26012

then also share with his employer which at the time was LockDownCorp and earn revenue in

the process. It would later come to his attentio that the guy that approached him was actually

one of the key members of the infamous Sub7 trojan horse group which at a particual point in

time was responsible for launching a DDoS (Distributed Denial of Service) attack against the

researcher Steve Gibson who extensively profiled the campaign and actually had a conversa-

tion with HeLLfiReZ and his team members for the purpose of finding out how launched the

attack and how it took place.

He would eventually run a personal hacking and secutity Web site archive using hosting cour-

tesy of his employer LockDownCorp and run a popular Hacking and Security Web site which

he would then feature on Progenic.com's Top100 Hacking and Security Web sites including to

actually offer paid security consultations in terms of finding out ways to help people protect

their home PCs from trojan horses and teaching them how to use a firewall and how they can

secure their home PCs.

At a later stage in his early Information Security career he would visit and join

https://itsecurity.com's Security Clinic where he would have his personal biography featured

and actually respond to common security questions which users of the Web site will submit

and have his response featured on the front page potentially driving traffic to his employer

at the time which was Frame4 Security Systems and actually improving his knowledge and

understanding of Information Security in general.

Dancho was also known for having participated in the Blackcode Ravers hacking group which

was running the popular https://blackcode.com Web site at the time and actually participated

with two issues of a popular Security Newsletter at the time which were featured on the home

page of the portal.

During the glorious years of IRC (Internet Relay Chat) where Dancho was busy hanging on

several IRC networks including DALNet and his local country's IRC network he managed to

obtain the /etc/shadow password file for his entire ISP (Internet Service Provider) which at the

tim was Digital Systems and shared a copy of it with his best friend at the time George Kadiyski

for the purpose of using several popular and high-profile Wordlists including John the Ripper

password cracker potentially obtaining access and brute-forcing the entire password list for

hundreds of active dial-up Internet based accounts at the time. Over a period of several days

the results at the time were outstanding in the context of actually succeeding in the brute-

forcing process potentially allowing Dancho and his friend to easily access free Internet based

dial-up accounts which at the time cost money allowing them to use the Internet for free.

At a later stage Dancho also managed to obtain access to his local town's competing ISP (In-

ternet Service Provider) which was known as BIANet /etc/shadow which was send to him by

a friend and he also once again shared it with his friend who would once again begin brute-

forcing the password file using a variety of Worldlists and the infamous John the Ripper passwor

cracking tool at the time potentially allowing Dancho and his friend easy access to unlimited

Internet based dial-up connectivity.

The time has come to play a game. Dancho quickly powered his 16-bit Pravetz PC 2MB RAM

and a screen full of computer game choices quickly appeared prompting him to choose a game.

While loading a relatively known game known as Scorch Dancho decided to play two hours and

then proceed with meeting his friends and start a discussion with his grandma. A huge fan of

strategy games Dancho decided that he didn't have the time to dedicate to play his favorite

game — Sid Meier's Civilization and instead he figured that he would eventually play the game

later throughout the day. Playing Scorch was quite an experience and he took a few hours of

his precious learning time to interact with the game. He then decided to approach his best

26013

friend at the time and co-conspirator in the World of UFO's the Soviet Union and computer

games including the hacking Scene for two hours of extensive game play where we would

strategize on how to best "approach" the Soviet Union in terms of invasion actively and carefully

planning every move on our way to invade the Soviet Union and eventually all the surrounding

countries. While I was busy preparing for our several hour game play George was supposed to

be busy going through a CD which was basically a mirror of Packetstormsecurity in particular

the E-Zine section so that we can prepare to have a conversation in terms of working out our

technological and military strategy on our way to achieve global domination in the original Sid

Meier's Civilization. What we basically did in the beginning was to strategize and actually get a

better view of the technology tree of the game and while I was busy moving the Empire along

George was busy keeping notes on our way to keep track and advance out military strategy on

a "first come first serve" basis.

Provoked by the need to reach out to a vast network of computers known as the Internet

— Dancho quickly decided that the time has come to get connected —

so that he decided

to seek a proper connection provider in his local home-town. Back in the day the primary

connection providers in the time were Bulgaria's Digital Systems BIA Net and the country's

leading mobile connectivity provider — Mtel's pre-paid dial-up cards. Times were different in

terms of connectivity and DSL and ADSL were a dream come true in the face of corporate

networks properly utilizing and using ISDN type of based connectivity. Keeping it simple —

Dancho decided to quickly acquire the necessary dial-up modem — which he would eventually

fall in love with potentially reaching out to a vast network of computers known as the Internet

using the help of a local dial-up provider known as Digital Systems. Back in the day — hourly

based dial-up access meant think twice about what you do and how you do it online which

means that I would have to basically prepare a plan for the things that I'll do online including

Web sites which I would have to visit including a set of emails which I would have to send to a

set of people including friends and colleagues.

It's been years since he prepared to acquire a personal computer and get connected meaning

that he managed to prepare a list of Web sites and newsgroups on the topic of hacking and com-

puter security including general Web sites that he would eventually visit. Among the first Web

sites that he visited was NBA.com where he would quickly learn about

the latest developments

on his favorite team including daily going through photos and possibly video material to show-

case his favorite team at the time. Among the most venerable experienced he first discovered

prior to getting connected is to search for UFO photos and information on the KGB including

the active reproduction of sound using his external speakers in a MIDI-dominated World at the

time. The most venerable and unforgettable experience at the time was the fact that he had

access to an email which he used to keep in touch with the Internet Service Provider's system

administrator so that he could keep in touch with him including the active sharing of new Web

site links for him to visit and exchange communication.

Among the next most prominent and key features of the Internet which I used at the time

was ICQ in particular the fact that the messages from my hometown traveled to the capital

of the country in real-time which was particularly impressive in particular the fact that I was

receiving immediate responses to my messages. It was fairly logical to conclude that the

active exchange of messages on ICQ and actual contacts was crucial to becoming popular

and actually attempting to own the Scene. What I practically did at the time was to request

several of my friends which were known to have been involved in the Scene at the time to

forward and exchange a decent set of ICQ contacts of fellow members

of the Scene which

quickly empowered me with the necessary contacts to join several hacking groups in particular

HackHouse and the Social Engineering Project where I was proud to be a member of.

26014

Among the first groups which I really joined at the time was Toxic Crisco which basically repre-

sented a group of individuals involved in a variety of online activities including possibly hacking

including the SCR Project which was basically a social engineering driven hacking group where I

was proud to be a member of in particular my active involvement in reading various high-profile

psychology books at the time.

For the purpose of using IRC in particular DALnet Dancho quickly gathered a copy of the popular

mIRC including several War Scripts ICQ Bombers Nukers and Mail Bombers including trojan

horses and quickly decided that he should start getting experienced in the world of hacking

for the purpose of gaining knowledge and impressing his friends. Among the first channels

that he actually joined at the time were #gay and #lesbian where he was basically portraying

himself as another person who was basically seeking to offer a new and novel photos-based

screensaver to a variety of individuals for the purpose of tricking them into executing the

screensaver on their home PCs ultimately gaining access to their PCs using a popular trojan

horse client at the time such as for instance Sub7.

It would be fairly easy to assume how things got complicated with Dancho quickly obtaining

access to Internet Relay Chat's primary mIRC application including a variety of IRC-based "War

Scripts" including a dozen of mail-bombers and various other ICQ-based type of Nukers and

Flooders on his way to demonstrate a proper technical know-how to his friends and peers in the

shady world of hacking. Among the first channels he tried to access were #hacker #hackers

#hacking and the infamous #hackphreak on EFNet including to actually open several personal

channels on the local IRC networks including #drugs #KGB and #linuxsecurity. At a later stage

he actually managed to ask a friend for a possible operator status on the local town's IRC

channel where he was basically running a 24/7 online protection bot known as xploit including

the active use of a Socks5 server which at the time was offered by his employer LockDownCorp

where he was busy acting as Technical Collector of trojan horses/worms/viruses and VBS scripts

for the purpose of improving the anti-trojan software's signatures-based detection rates.

Among the first thing that Dancho decided to do in his spare time is to actively research the

local Webmaster of his hometown's official Web site for the purpose of attempting to launch

a social engineering attack against his local town's official Web site which basically succeed

and resulted in a “greeting” message being posted on the official Web site with no actual data

destruction and data removal taking place in what would appear to be a professional approach

when compromising a legitimate Web site for the purpose of greeting his personal friends and

spread a message on behalf of “Trojan Hacking Group” which at the time basically consisted

of one of his closest friends and another fellow hacker enthusiast.

Among

his

responsibilities

the

time

included

the

active

collection

of

trojan

horses/worms/viruses and VBS Scripts with the idea to share them with his employer

which at the time was LockDownCorp one of the world’s leading anti-trojan vendors for the

purpose of improving the detection rate for these publicly accessible trojan horses in what

would later on mature into a successful Technical Collection operation which basically paid

his bills and actually offered him a decent financial incentive to continue getting involved in

security as a hacker enthusiast and actually improved his employer's overall detection rate

for some of the most prolific trojan horses at the time.

The actual contractual agreement had to do with Danchousing a private FTP server where he

would spend hours uploading collected trojan horses using his home-based dial-up connection

and eventually earning a revenue in the process using Western Union where he was happy

to have established direct working relationship with one of the world's leading anti-trojans

vendors which at the time was located at — http://proxy2.stealthedip.com/maniac/incoming/

Whenever Dancho would attempt to reach out to his friends he would attempt to find out

whether they are online using a popular trojan horse including to actually check his email

account for their recently changed passwords and other related information including their

current IP so that he can properly connect to their home PC for educational purposes.

Being the World's most notable cybercrime researcher security blogger and threat intelligence

analyst the researcher quickly gained fame by systematically and efficiently profiling and ana-

lyzing a decent snapshot of malicious nation-state and fraudulent activity online leading him to

pursue a successful career as the World's most popular cybercrime

researcher security blogger

and threat intelligence analyst.

In an early Monday morning the researcher quickly gathered a set of research materials of the

primary botnet that's he's been monitoring the infamous Koobface botnet using passive and

active virtual SIGINT methodologies which basically include active sampling of the botnet's

malicious online activities using a daily set of intercepted malicious and fraudulent campaigns

launched managed and operated by the Koobface botnet for the purpose of providing the

necessary technical operational and strategic OSINT type of intelligence including the daily

batch of money mule recruitment domains and campaigns which he was busy profiling with the

idea to assist U.S Law Enforcement on its way to track down and prosecute the cybercriminals

behind these campaigns.

The Koobface botnet was the primary botnet propagating over social media at the time in

particular Facebook and has already managed to affect tens of thousands of users globally

potentially enticing them to interact with rogue and visual social engineering based type of

malicious and fraudulent campaigns in the form of Fake Adobe Flash Players and fake YouTube

videos where the ultimate goal would be to attempt to affect their friends on Facebook by

sending automated and legitimately looking messages including links to rogue and malicious

content.

It’s been years since he prepared to acquire a personal computer and get connected meaning

that he managed to prepare a list of Web sites and newsgroups on the topic of hacking and

computer security including general Web sites that he would eventually visit. Among the first

Web sites that he visited was NBA.com where he would quickly learn about the latest develop-

ments on his favorite team including daily going through photos and possibly video material

to showcase his favorite team at the time. Among the most venerable experienced he first

discovered prior to getting connected is to search for UFO photos and information on the KGB

including the active reproduction of sound using his external speakers in a MIDI-dominated

World at the time.

The most venerable and unforgettable experience at the time was the fact that he had access

to an email which he used to keep in touch with the Internet Service Provider’s system admin-

istrator so that he could keep in touch with him including the active sharing of new Web site

links for him to visit and exchange communication.It’s been years since he prepared to acquire

a personal computer and get connected meaning that he managed to prepare a list of Web

sites and newsgroups on the topic of hacking and computer security including general Web

sites that he would eventually visit. Among the first Web sites that he

visited was NBA.com

where he would quickly learn about the latest developments on his favorite team including

daily going through photos and possibly video material to showcase his favorite team at the

time. Among the most venerable experienced he first discovered prior to getting connected

is to search for UFO photos and information on the KGB including the active reproduction of

sound using his external speakers in a MIDI-dominated World at the time. The most venerable

and unforgettable experience at the time was the fact that he had access to an email which

he used to keep in touch with the Internet Service Provider's system administrator so that he

could keep in touch with him including the active sharing of new Web site links for him to visit

26016

and exchange communication.

Among the next most prominent and key features of the Internet which I used at the time

was ICQ in particular the fact that the messages from my hometown traveled to the capital

of the country in real-time which was particularly impressive in particular the fact that I was

receiving immediate responses to my messages. It was fairly logical to conclude that the

active exchange of messages on ICQ and actual contacts was crucial to becoming popular

and actually attempting to own the Scene. What I practically did at the time was to request

several of my friends which were known to have been involved in the Scene at the time to

forward and exchange a decent set of ICQ contacts of fellow members of the Scene which

quickly empowered me with the necessary contacts to join several hacking groups in particular

HackHouse and the Social Engineering Project where I was proud to be a member of.

Among the next most prominent and key features of the Internet which I used at the time

was ICQ in particular the fact that the messages from my hometown traveled to the capital

of the country in real-time which was particularly impressive in particular the fact that I was

receiving immediate responses to my messages. It was fairly logical to conclude that the

active exchange of messages on ICQ and actual contacts was crucial to becoming popular

and actually attempting to own the Scene. What I practically did at the time was to request

forward and exchange a decent set of ICQ contacts of fellow members of the Scene which

quickly empowered me with the necessary contacts to join several hacking groups in particular

HackHouse and the Social Engineering Project where I was proud to be a member of.

Among the next most prominent and key features of the Internet which I used at the time

was ICQ in particular the fact that the messages from my hometown traveled to the capital

of the country in real-time which was particularly impressive in particular the fact that I was

receiving immediate responses to my messages. It was fairly logical to conclude that the

active exchange of messages on ICQ and actual contacts was crucial to becoming popular

and actually attempting to own the Scene. What I practically did at the time was to request

several of my friends which were known to have been involved in the Scene at the time to

forward and exchange a decent set of ICQ contacts of fellow members of the Scene which

quickly empowered me with the necessary contacts to join several hacking groups in particular

HackHouse and the Social Engineering Project where I was proud to be a member of.

Among the first groups which I really joined at the time was Toxic Crisco which basically repre-

sented a group of individuals involved in a variety of online activities including possibly hacking

including the SCR Project which was basically a social engineering driven hacking group where I

was proud to be a member of in particular my active involvement in reading various high-profile

psychology books at the time.

For the purpose of using IRC in particular DALnet Dancho quickly gathered a copy of the popular

mIRC including several War Scripts ICQ Bombers Nukers and Mail Bombers including trojan

horses and quickly decided that he should start getting experienced in the world of hacking

for the purpose of gaining knowledge and impressing his friends. Among the first channels

that he actually joined at the time were #gay and #lesbian where he was basically portraying

himself as another person who was basically seeking to offer a new and novel photos-based

screensaver to a variety of individuals for the purpose of tricking them into executing the

screensaver on their home PCs ultimately gaining access to their PCs using a popular trojan

horse client at the time such as for instance Sub7.

Among the first groups which I really joined at the time was Toxic Crisco which basically repre-

sented a group of individuals involved in a variety of online activities including possibly hacking

26017

including the SCR Project which was basically a social engineering driven hacking group where I

was proud to be a member of in particular my active involvement in reading various high-profile

psychology books at the time.

On a beautiful Thursday afternoon Dancho decided to play a decent computer game while his

mother was busy ironing in the kid's room and decided to take a journey successfully getting

the World rid of hostile aliens. The game called Duke Nukem basically took Dancho on a journey

to another World where he spend most of his afternoon getting rid of evil aliens while he led a

discussion with his mother on his whereabouts during the day including active next-day class

preparation and the eventual dinner conversation. While mom was busy ironing Dancho took

on another journey to a distant World where he took care of and protected the Earth from evil

aliens and decided that the time has come for a rest.

Some of the most memorable memories of Dancho back in the time have to do with playing full-

time one of the best strategy games during the 90's that's Sid Meier's Civilization. Spending a

decent portion of his time basically four hours on a daily basis Dancho quickly acquired the nec-

essary skills to take his civilization to a new level by waging wars developing and exchanging

new technologies and by waging wars with competing and adversary civilizations.

Having already mastered the power of the Civilization game Dancho quickly fell into a World

of politics technologies and wars and successfully mapped and left a foothold in the World the

way he knew and mastered having successfully spend a decent portion of his time playing the

best strategy game during the 90's that's Sid Meier's Civilization. Game World is something

different. Whenever Dancho decided to play a game the World came to a halt with Dancho

playing and learning the basics and inner workings of every game that he managed to get his

hands on throughout the 90's.

Pushing the boundaries of the game at some point Dancho decided to take a deeper look at

how you can actually make the computer's player become more

advanced and sophisticated

and actually tried to train the AI of the game and potentially figured out a way to teach to use

advanced warfare tactics.

It would be fairly easy to assume how things got complicated with Dancho quickly obtaining

access to Internet Relay Chat's primary mIRC application including a variety of IRC-based "War

Scripts" including a dozen of mail-bombers and various other ICQ-based type of Nukers and

Flooders on his way to demonstrate a proper technical know-how to his friends and peers in the

shady world of hacking. Among the first channels he tried to access were #hacker #hackers

#hacking and the infamous #hackphreak on EFNet including to actually open several personal

channels on the local IRC networks including #drugs #KGB and #linuxsecurity. At a later stage

he actually managed to ask a friend for a possible operator status on the local town's IRC

channel where he was basically running a 24/7 online protection bot known as xploit including

the active use of a Socks5 server which at the time was offered by his employer LockDownCorp

where he was busy acting as Technical Collector of trojan horses/worms/viruses and VBS scripts

for the purpose of improving the anti-trojan software's signatures-based detection rates.

Among the first thing that Dancho decided to do in his spare time is to actively research the

local Webmaster of his hometown's official Web site for the purpose of

attempting to launch

a social engineering attack against his local town's official Web site which basically succeed

and resulted in a "greeting" message being posted on the official Web site with no actual data

destruction and data removal taking place in what would appear to be a professional approach

when compromising a legitimate Web site for the purpose of greeting his personal friends and

spread a message on behalf of "Trojan Hacking Group" which at the time basically consisted

of one of his closest friends and another fellow hacker enthusiast.

26018

Among

his

responsibilities

the

time

included

the

active

collection

of

trojan

horses/worms/viruses and VBS Scripts with the idea to share them with his employer

which at the time was LockDownCorp one of the world's leading anti-trojan vendors for the

purpose of improving the detection rate for these publicly accessible trojan horses in what

would later on mature into a successful Technical Collection operation which basically paid

his bills and actually offered him a decent financial incentive to continue getting involved in

security as a hacker enthusiast and actually improved his employer's overall detection rate

for some of the most prolific trojan horses at the time.

The actual contractual agreement had to do with Dancho using a private FTP server where he

would spend hours uploading collected trojan horses using his home-based dial-up connection

and eventually earning a revenue in the process using Western Union where he was happy

to have established direct working relationship with one of the world's leading anti-trojans

vendors which at the time was located at — http://proxy2.stealthedip.com/maniac/incoming/

Whenever Dancho would attempt to reach out to his friends he would attempt to find out

whether they are online using a popular trojan horse including to actually check his email

account for their recently changed passwords and other related information including their

current IP so that he can properly connect to their home PC for educational purposes.

Being the World's most notable cybercrime researcher security blogger and threat intelligence

analyst the researcher quickly gained fame by systematically and efficiently profiling and ana-

lyzing a decent snapshot of malicious nation-state and fraudulent activity online leading him to

pursue a successful career as the World's most popular cybercrime researcher security blogger

and threat intelligence analyst.

Back in 2007 I got a direct invitation to attend a private and invite-only conference event held

by the Honeynet Project at the U.K's GCHQ which I actually attended and presented on a variety

of topics including current and emerging cybercrime trends and actually got the opportunity

to meet with the folks from the Honeynet Project.

In 2008 I got a surprise invitation to join the team at ZDNet a web site portal which I greatly

admired while I was busy working for https://astalavista.com and I was in fact visiting on a

daily basis where I spend a highly professional and productive 4 years as a security blogger at

ZDNet's Zero Day blog leading to me to thousands of publications including an actual award-

winning Jessy H. Neal Award for working on ZDNet's Zero Day blog.

Working for ZDNet greatly shaped my professional well-being in a way that I was basically work-

ing with top-notch technology experts from across the globe and actually had the chance to

contribute with personal content and research for a period of four years which was an unfor-

gettable experience and it's still a pleasure and a honor to touch base and actually find a way

to contribute and say hi to the people that I used to work with back in 2008.

At some point in time I eventually got invited to attend a private and invite-only conference

where I presented on money mule recruitment practices and eventually got the privilege to

meet most of the people that I work with on a face-to-face basis where we hang out and

actually socialized and discussed various hot topics and cybercrime trends internationally.

Dancho began his career in the world of Intelligence Studies greatly provoked by research pub-

lished and distributed by a U.S based company known as iDefense which basically specializes

in profiling online hacktivism activity and is basically capable of producing high-quality and

never-published before threat intelligence and general intelligence briefs. Among the key re-

ports that Dancho was able to get his hands on was the U.S/China skirmish which basically

consisted of various U.S and Chinese based groups actively interacting online by launching

DDoS (Distributed Denial of Service) attacks against their infrastructure and participating in

Web site defacement campaigns. He would then research and actively visit the CIA.gov's offi-

cial Web site including FAS.org and NSA.gov seeking manuals and research material on Open

Source Intelligence (OSINT) which would later on greatly contribute to help him become one of

the World's leading experts in the field of cybercrime research and threat intelligence gather-

ing.

In an early Monday morning the researcher quickly gathered a set of research materials of the

primary botnet that's he's been monitoring the infamous Koobface botnet. His main motiva-

tion behind tracking down and monitoring one of the most prolific botnet that was spreading

across Facebook at the time was to assist the Security Industry and researchers internationally

including U.S law enforcement on their way to keep track of the botnet's activities and eventu-

ally attempt to take it offline and actually attempt to track down some of the authors behind

it.

Dancho's daily routine consisted of checking the most recent campaigns launched by the gang

and actually offer in-depth technical analysis on the latest campaigns publicly disseminating

and profiling the campaigns at his personal blog leading him to a specific set of detailed and

in-depth analysis of the Koobface botnet one of the few publicly accessible analysis resources

on the topic at the time.

The botnet masters at the time were basically known to keep track of Dancho's research and

eventually left a message embedded in the actual C &C infrastructure basically greeting the

researcher for his research including a second and a third message during the Christmas season

including an actual point-by-point response to his "Top 10 Things You Didn't Know About the

Koobface Gang” article which he published at ZDNet’s Zero Day blog.

At a later stage he would present his findings in a Keynote Presentation at CyberCamp 2016

on the topic of “Exposing Koobface — The World’s Largest Botnet” in front of a high-quality

audience and actually discuss in-depth how he tracked it down and eventually attempted to

take it offline.

While he was busy studying in the Netherlands he became familiar what appeared to be one

of the most popular Web sites for hackers on the Web known as Astalavista.com where he

managed to actually find the real company behind the portal and actually approached.

In 2021 I can be reached at ddanchev@cryptogroup.net including my personal blog —

https://ddanchev.blogspot.com including the infamous — https://astalavista.box.sk where I’m

currently running a high-profile hacking and security project.

The primary purpose behind the actual release of my personal memoir is to reach out to to a

new set of audience and actually elaborate more on my experience and expertise in the field

including to offer a God’s Eye perspective on the current and emerging cybercrime ecosystem

in combination with active case studies and technical material whose purpose is to greatly

assist everyone that’s reading this memoir with the idea to provoke you to share it with your

friends and colleagues including t

It used to be a moment in time when we used to "rock the boat". With or without the drinks.

Following a successful career as a hacker enthusiast during the 90's and a successful man-

agement and operation of one of the World's leading portals for hackers and security experts

which is https://astalavista.com for a period of three years circa 2003-2006 when I originally

decided to launch one of the security industry's leading publication which is my personal blog -

https://ddanchev.blogspot.com I managed to somehow land a successful career as an indepen-

dent contractor in the world of security blogging cybercrime research and threat intelligence

which led me to visit several invite-only conferences including to present at event at an undis-

closed location including to actually attract and retain approximatelly 6M page views which is

26020

not necessarily bad for a man one operation in terms of running and maintaining my personal

blog for a period of 12 years.

Among the primary reasons for coming up with this 111 pages long personal memoir is to em-

power fellow researchers and security experts including the general public with an in-depth

personal account overview of my experience in the security industry's as a teenage hacker

enthusiast back in the 90's today's most popular and often cited security blogger threat in-

telligence analyst and cybercrime researcher internationally and to

present a diverse set of

high-quality and never-published and discussed before case studies and enriched technical in-

formation and OSINT data on current and emerging cyber attack trends. The primary goal of

the book would be to position my memoir as one of the most popular and often cited personal

account of the hacking and the security Scene circa the 90's through the prism of my teenage

hacker experience up to present day in terms of various high-profile and advanced nation-state

actors and malicious and fraudulent cyber attack campaigns where the ultimate goal would be

to discuss in-depth my experience in the field of security blogging threat intelligence gathering

and cybercrime research throughout the past decade. It used to be a moment in time when

"sharing was caring" and with the booming Web 2.0 enterprises and the actual concept numer-

ous new online participants and Web 2.0 darlings started popping up as mushrooms another

set of individuals prone to make a change an impact quickly emerged online potentially shar-

ing a treasure trove of personal knowledge into the world of modern technologies including the

very basics of information security hacking and cyber warfare including a newly releases and

never-published before research into the area of cybercrime research and the actual process

of profiling the bad guys onlines in terms of their actual campaigns and actual malicious infras-

tructure behind their online campaigns. It used to be a personal privilege back in December,

2005 when I originally launched my personal Dancho Danchev's Blog - Mind Streams of Infor-

mation Security Knowledge blog which quickly attracted a high-quality and relevant audience

which is currently one of the security industry's most popular and relevant security hacking OS-

INT and threat intelligence including cybercrime research type of gathering online publications

where I've continued to publish and post high-quality and never-published before and released

research and analysis articles. At some point in time I got practically used to getting referenced

and quoted by mainstream news media in terms of my research which greatly motivated an

inspired me to continue doing my research an to actually attempt to inspire other researchers

and readers to continue reading and visiting my blog on a daily basis where I owe everyone a

big deal of thanks for the daily visits and for actually bothering to read my articles and actually

go through my research at the time up to present day. Tracking down and monitoring the Koob-

face botnet on a daily basis where I successfully became the primary source of information on

the Koobface botnet at the time was quite a success and a pretty interesting experience where

I ultimately managed to take it offline including to held a Keynote presentation on the topic of

monitoring and tracking down of the Koobface botnet

Following a series of messages left on the actual C &C (Command and Control) server locations

which were basically greeting me and referencing my research at the time including a series

of typosquatted domains using my name at some point in time I managed to actually come up

with a proper "Top 10 Things You Didn’t Know About the Koobface Gang" article for ZDNet at the

time where the botnet masters actually left a message within the C &C (Command and Control)

server location basically answering the key points on a point by point basis which was quite a

success at the time of monitoring and tracking down the Koobface botnet. The primary purpose

behind the actual release of my personal memoir is to reach out to to a new set of audience

and actually elaborate more on my experience and expertise in the field including to offer a

God’s Eye perspective on the current and emerging cybercrime ecosystem in combination with

active case studies and technical material whose purpose is to greatly assist everyone that’s

26021

reading this memoir with the idea to provoke you to share it with your friends and colleagues

including to actually recommend it to your friends and colleagues.

Back in the day my primary area of occupation was to monitor and track down the Koobface

botnet where I was basically acting as the primary source of real-time and actionable intel-

ligence on the whereabouts of the Koobface botnet including to

actually profile and analyze

some of their latest campaigns which led to a variery of pretting interesting situations where

they've actually redirected Facebook's entire IP space to my personal blog including to actually

leave several greeting within the botnet's C &C channel in terms of sending me a message and

greeting me including a step by step response to my "Top 10 Things You Didn't Know About the

Koobface Gang" article where they actually responded to my ZDNet article at the time in a step

by step fashion. At a specific point in time I was originally invited to held the Keynote presen-

tation at the CyberCamp 2016 security conference where I presented on the topic of tracking

down and monitoring the Koobface one of the world's largest botnets which was a tremendous

success in the context of communicating most of my research to a wider audience.

Back in 2011 while I was busy living in another town I actually met with a NYTime reporter

for the purpose of catching up and elaborating more on my research on the Koobface botnet

which was quite a success in terms of communicating my findings to a proper party which

eventually led to a high-profile quote on my research on the Koobface botnet in the original

NYTimes.com At a specific point in time my primary area of occupation included the active

monitoring and taking down of the Koobface botnet which at the time was the only active

social media propagating botnet that was successfully targeting Facebook in terms of spreading

malicious software across the social media platform sucessfully affecting its users. The gang

then continued its underground marketplace activities by starting to serve client-side exploits

to users visiting major Koobface Web properties that also includes fake YouTube including Flash

Player serving Web sites part of the Koobface botnet.

During the 90's I had the privilege to own a personal computer among the few kids on the

block that really had a personal PC at their place which at the time was an IBM clone known as

Pravetz 16 which basically allowed me to explore the world of computers and technology while

working with various files and actually spending most of my time playing computer games. I

started getting involved in the world of hacking largely provoked by several movies such as for

instance the original "Hackers" movie including the buzz around the very idea of compromis-

ing and penetrating another person or organization's PC seeking intellectual exploration as a

basic motivation factor. Among my primary bookmarks at the time were https://textfiles.com

including Box.sk and https://astalavista.box.sk including Progenic.com and naturally packet-

stormsecurity where I was busy going through the news on a daily basis potentially getting

myself motivated by some of the latest web site defacements of high-profile Web sites around

the globe.

Among my first contributions in the field were several text files including the production of

two issues of Trojan Defense Suite's Newsletter and the production of the security newsletter

for Blackcode.com including several papers detailing the basics of trojan horses and how to

use them including how to protect yourself against them including several text files in various

categories including papers on anarchy. What I was particularly famous at the time with is the

production of "The Complete Windows Trojans Paper" which at the time was the only and most

popular text file explaining the basics of trojan horses and to protect yourself against them.

Something else I was particularly popular with was my personal online hacking and security

files repositiory which was actually featured on several top lists for hacking and security web

sites including Progenic.com where I was getting a lot of traffic and there were actually quite

a lot of people voting for my personal web site and supporting it. I was also specifically well

26022

known for producing several issues of the security newsletter for Blackcode.com which was a

top and high-profile high-traffic visited portal for hacking resources back in the 90's where I

had the privilege to produce the portal's security newsletter and contribute with actual articles

on the topic.

Quickly, entering, the, premises, of, the, doorway, Sten, yelled at, next door, neighbor, best,

friend, and, both, quickly, left, the, premises, and, gathered, to, ask, for, more, of, his, friends,

ready, to, go, to, school. Jesebelle, quickly, noticed, the, two, of, them, coming, their, way,

and, carefully, prepared, to, go, to, school. On their way, they, met, Constantine, who, waited,

for, them, to, gather, on, their, way, to, school.

Preparing, for, the, day, was, quite, a, gathering. Sten, entered, the, front, door, of, the, school,

followed, by, Jezebelle and Constantine, and, his, best, friend, next, door, neighbor, Gater. Fol-

lowed, by, the, most, of, the, students, back, there, the, class-mates, entered, the, classroom,

and, sat, on, the, desk, table, ready, for, school. Fist, thing, Sten, did, was, to, prepare, for,

class. He, unpacked, his, belongings, and, got, ready, thinking, about, what, he'll do, once,

he, gets, back, home, sitting, in, front, of, his computer. The class, was, quite, a, gathering,

with, all, of, his, classmates, entering, the, classroom, followed, by, their, friends, and, the,

teacher. The class, began, followed, by, most, of, his, classmates, entering, the, room, with,

the, teacher, slowly, checking, who's present, and, who's not. First, things, come, first, with,

the, teacher, slowly, checking, who's, about, to, share, his, lesson.

First, thing, Sten, did, was, to, think, of, his, computer, back, home, a cozy, feeling, of, self-

preservation, and ultimate, self-being, Sten, felt, the, power, of, his,

loneliness, and, started, to,

image, the, things, he'll, do, when, he, comes, back, home. The teacher, Mrs, Jozefine, quickly,

realized, that, several, students, need, to, tell, their, lesson, and, started, asking, who's, de-

cided, to, tell, their, lesson, first. Sten, quickly, decided, to, share, a, feeling, of, comfortability,

with, his, next, desk, neighbor, and, quickly, smiled, thinking, about, all, the, things, he'll, do,

when, he, gets, back, home. A, perfect, surrounding, and, a, room, full, of, personal, belong-

ings, quickly, drove, Sten, to, realize, the, vast, potential, of, his, personal, mindset, allowing,

him, to, consider, the, possibility, of, all, the, things, he'll, do, when, he, gets, back, home.

His students, quickly, realized, that, the, time, to, tell, their, lesson, has, come, and, prepared,

to, get, asked, by, their, teacher, about, everything, they, learned, about, their, lesson. First,

things, come, first, with, several, of, his, classmates, getting, asked, about, their, teacher, and,

what, they, learned, about, their, lesson.

Sten, quickly, payed, attention, to, his, classmate, getting, asked, about, his, lesson, and,

quickly, felt, the, comfortability, of, knowing, that, he, knew, his, lesson. Time, for, a, break,

and, the, classmates, quickly, went, on, to, decide, on, how, to, change, rooms. While, the,

room, was, changed, Sten, quickly, wandered, around, thinking, and, considering, the, pos-

sibility, of, owning, a personal computer, including, the, joys, and,

benefits, of, sharing, his,

belongings, with, someone, else. Next, lesson, comes, next, the, classmates, quickly, entered,

a, new, room, and, started, getting, prepared, for, their, class.

The rush, through, the, hallway, quickly, embraced, Sten, and, his, friend, and, they, quickly,

wandered, around, seeking, and, feeling, blissful, joys, of, shared, compatibility, with, the,

surrounding, environment. Next, lesson, comes, next, and, the, friends, quickly, entered, a,

new, room, quickly, busy, preparing, for, their, lesson. Unpacking, was, easy, a textboook,

a, notebook, a pencil, and, various, related, materials, getting, ready, for, their, lesson. Sten,

was, busy, considering, the, joys, of, owning, a personal, computer, and, quickly, decided, that,

thinking, about, it, made, him, feel, even, better. Considering, the, joys, of, owing, a, personal,

computer, was, quite, an, experience, and, Sten, felt, even, better, while, considering, the, joys,

and, a, feeling, of, belonging, to, a, personal, need, and, self-preservation, type, of, self-being,

26023

joyful, experience, allowing, him, to, further, expand, his, emotional, feeling, of, belonging, to,

a, surrounding, environment, including, his, friend.

With, lessons, about, to, get, over, Sten, and his, friend, decided, that, time, for, home, was,

even, better, and, they, quickly, wandered, around, figuring, a way, to, find, the, hallway, as,

they, decided, to, go, back, home. The trip, was, quite, a, pleasant, surprise, with, both, of,

them, walking, the, same, path, as, they, walk, on, an occasional, basis, as, they, decided, that,

time, for, home, was, even, better. Entering, the, hallway, was, quite, an, experience, and,

both, of, them, feeling, a feeling, of, belonging, quickly, entered, the hallway, and, decided,

that, time, for, home, was, even, better.

Quickly, packing, the, bags, was, easy, as, a lot, of, friends, decided, that, time, for, home,

was, even, better, as, they, decided, that, time, for, home, was, even, better. Quickly, decided,

that, time, for, home, was, even, better, Sten, and his, friend, quickly, packed, their, bags, and,

went, on, to, see, their, friends, as, they, decided, that, time, for, home, was, even, better.

Slowly entering the premises of what can be best described as home, grandma was quick to

prepare lunch a cozy feeling of home-belonging and a warm fireplace feeling of personal self-

belonging. While paying attention to what Sten managed to achieve during the day, grandma

payed attention to his lesson by a personal feeling of belonging to what Sten would do next

during the afternoon. Sitting and watching right behind him, grandma took the time and effort

to pay attention to his lesson and a personal feeling of self-belonging quickly started to take

place prompting Sten to learn his lesson even faster. The TV quickly ran a story following a

placement of an animated cartoon aired on Ostankino a Russian national-TV back in the time

called “Maya” the Bee.

The time has come to play a game. Sten quickly powered his 16-bit Pravetz PC 2MB RAM and

a screen full of computer game choices quickly appeared prompting him to choose a game.

While loading a relatively known game known as Scorch Sten decided to play two hours and

then proceed with meeting his friends and start a discussion with his grandma. A huge fan of

strategy games Sten decided that he didn’t have the time to dedicate to play his favorite game

- Sid Meier’s Civilization and instead he figured that he would eventually play the game later

throughout the day. Playing Scorch was quite an experience and he took a few hours of his

precious learning time to interact with the game. He then decided to approach his best friend

at the time and co-conspirator in the World of UFO’s the Soviet Union and computer games

including the hacking Scene - George Kadiysky for two hours of extensive game play where we

would strategize on how to best “approach” the Soviet Union in terms of invasion actively and

carefully planning every move on our way to invade the Soviet Union and eventually all the

surrounding countries. While I was busy preparing for our several hour game play

George was supposed to be busy going through a CD which was basically a mirror of Packet-

stormsecurity in particular the E-Zine section so that we can prepare to have a conversation

in terms of working out our technological and military strategy on our way to achieve global

domination in the original Sid Meier's Civilization. What we basically did in the beginning was

to strategize and actually get a better view of the technology tree of the game and while I was

busy moving the Empire along George was busy keeping notes on our way to keep track and

advance out military strategy on a "first come first serve" basis.

Getting Connected

Provoked by the need to reach out to a vast network of computers known as the Internet - Sten

quickly decided that the time has come to get connected - so that he decided to seek a proper

connection provider in his local home-town. Back in the day the primary connection providers in

the time were Bulgaria's Digital Systems BIA Net and the country's leading mobile connectivity

26024

provider - Mtel's pre-paid dial-up cards. Times were different in terms of connectivity and DSL

and ADSL were a dream come true in the face of corporate networks properly utilizing and

using ISDN type of based connectivity. Keeping it simple - Sten decided to quickly acquire the

necessary dial-up modem - which he would eventually fall in love with potentially reaching

out to a vast network of computers known as the Internet using the help of a local dial-up

provider known as Digital Systems. Back in the day - hourly based dial-up access meant think

twice about what you do and how you do it online which means that I would have to basically

prepare a plan for the things that I'll do online including Web sites which I would have to visit

including a set of emails which I would have to send to a set of people including friends and

colleagues.

It's been years since he prepared to acquire a personal computer and get connected meaning

that he managed to prepare a list of Web sites and newsgroups on the topic of hacking and com-

puter security including general Web sites that he would eventually visit. Among the first Web

sites that he visited was NBA.com where he would quickly learn about the latest developments

on his favorite team including daily going through photos and possibly video material to show-

case his favorite team at the time. Among the most venerable experienced he first discovered

prior to getting connected is to search for UFO photos and information on the KGB including

the active reproduction of sound using his external speakers in a MIDI-dominated World at the

time. The most venerable and unforgettable experience at the time was the fact that he had

access to an email which he used to keep in touch with the Internet Service Provider's system

administrator Bogdan Dochev so that he could keep in touch with him including the active

sharing of new Web site links for him to visit and exchange communication.

Among the next most prominent and key features of the Internet which I used at the time

was ICQ in particular the fact that the messages from my hometown traveled to the capital

of the country in real-time which was particularly impressive in particular the fact that I was

receiving immediate responses to my messages. It was fairly logical to conclude that the

active exchange of messages on ICQ and actual contacts was crucial to becoming popular

and actually attempting to own the Scene. What I practically did at the time was to request

several of my friends which were known to have been involved in the Scene at the time to

forward and exchange a decent set of ICQ contacts of fellow members of the Scene which

quickly empowered me with the necessary contacts to join several hacking groups in particular

HackHouse and the Social Engineering Project where I was proud to be a member of.

Among the first groups which I really joined at the time was Toxic Crisco which basically repre-

sented a group of individuals involved in a variety of online activities including possibly hacking

including the SCR Project which was basically a social engineering driven hacking group where I

was proud to be a member of in particular my active involvement in reading various high-profile

psychology books at the time.

For the purpose of using IRC in particular DALnet Stan quickly gathered a copy of the popular

mIRC including several War Scripts ICQ Bombers Nukers and Mail Bombers including tro-jan

horses and quickly decided that he should start getting experienced in the world of hacking

for the purpose of gaining knowledge and impressing his friends. Among the first channels

that he actually joined at the time were #gay and #lesbian where he was basically portraying

himself as another person who was basically seeking to offer a new and novel photos-based

screensaver to a variety of individuals for the purpose of tricking them into executing the

screensaver on their home PCs ultimately gaining access to their PCs using a popular trojan

horse client at the time such as for instance Sub7.

On a beautiful Thursday afternoon Stan decided to play a decent computer game while his

mother was busy ironing in the kid's room and decided to take a journey successfully getting

26025

the World rid of hostile aliens. The game called Duke Nukem basically took Stan on a journey

to another World where he spend most of his afternoon getting rid of evil aliens while he led a

discussion with his mother on his whereabouts during the day including active next-day class

preparation and the eventual dinner conversation. While mom was busy ironing Stan took on

another journey to a distant World where he took care of and

protected the Earth from evil

aliens and decided that the time has come for a rest.

Some of the most memorable memories of Sten back in the time have to do with playing full-

time one of the best strategy games during the 90's that's Sid Meier's Civilization. Spending a

decent portion of his time basically four hours on a daily basis Sten quickly acquired the nec-

essary skills to take his civilization to a new level by waging wars developing and exchanging

new technologies and by waging wars with competing and adversary civilizations.

Having already mastered the power of the Civilization game Sten quickly fell into a World of

politics technologies and wars and successfully mapped and left a foothold in the World the

way he knew and mastered having successfully spend a decent portion of his time playing the

best strategy game during the 90's that's Sid Meier's Civilization. Game World is something

different. Whenever Sten decided to play a game the World came to a halt with Sten playing

and learning the basics and inner workings of every game that he managed to get his hands

on throughout the 90's.

Pushing the boundaries of the game at some point Stan decided to take a deeper look at how

you can actually make the com-puter's player become more advanced and sophisticated and

actually tried to train the AI of the game and potentially figured out a way to teach to use

advanced warfare tactics.

The primary source of new games which were basically coming from Russian-distributed CDs

at the time was Pavel Vitkov a close friend to Dancho who was actually possessing and was

able to negotiate and obtain some of the latest and most popular games worth playing at the

time. While Dancho was busy becoming a master of Sid Meier's Civilization most of his friends

and colleagues at the time were busy playing another game part of the franchise known as

Colonization which despite the fact that it was pretty similar to Sid Meier's Civilozation couldn't

really offer the necessary global politics and war strategy tactics including possible espionage

tactics which Dancho was looking for in a modern game at the time.

It would be fairly easy to assume how things got complicated with Sten quickly obtaining access

to Internet Relay Chat's primary mIRC application including a variety of IRC-based "War Scripts"

including a dozen of mail-bombers and various other ICQ-based type of Nukers and Flooders on

his way to demonstrate a proper technical know-how to his friends and peers in the shady world

of hacking. Among the first channels he tried to access were #hacker #hackers #hacking and

the infamous #hackphreak on EFNet including to actually open several personal channels on

the local IRC networks including #drugs #KGB and #linuxsecurity. At a later stage he actually

managed to ask a friend for a possible operator status on the local

town’s IRC channel where

he was basically running a 24/7 online protection bot known as xploit including the active use

of a Socks5 server which at the time was offered by his employer LockDownCorp where he

was busy acting as Technical Collector of trojan horses/worms/viruses and VBS scripts for the

purpose of improving the anti-trojan software’s signatures-based detection rates.

Sample Socks5 Commercially-available servers courtesy of LockDownCorp one of Stan’s cur-

rent employers at the time which he used to increase his reputation on the local IRC Network

and to actually hide his real IP

Among the first thing that Stan decided to do in his spare time is to actively research the

local Webmaster of his hometown’s official Web site for the purpose of attempting to launch

26026

a social engineering attack against his local town’s official Web site which basically succeed

and resulted in a “greeting” message being posted on the official Web site with no actual data

destruc-tion and data removal taking place in what would appear to be a professional approach

when compromising a legitimate Web site for the purpose of greeting his personal friends and

spread a message on behalf of “Trojan Hacking Group” which at the time basically consisted

of one of his closest friends and another fellow hacker enthusiast.

Sample Web Site Defacement courtesy of Stan throughout the 90's which basically resulted in

a personal message and a personal greeting to all of his friends at the time courtesy of "Trojan

Hacking Group"

Among

his

responsibilities

the

time

included

the

active

collec-tion

of

trojan

horses/worms/viruses and VBS Scripts with the idea to share them with his employer

which at the time was LockDownCorp one of the world's leading anti-trojan vendors for the

purpose of improving the detection rate for these publicly accessible trojan horses in what

would later on mature into a successful Technical Collection operation which basically paid

his bills and actually offered him a decent financial incentive to continue getting involved in

security as a hacker enthusiast and actually improved his employer's overall detection rate

for some of the most prolific trojan horses at the time.

The actual contractual agreement had to do with Stan using a private FTP server where he

would spend hours uploading collected trojan horses using his home-based dial-up connec-

tion and eventually earning a revenue in the process using Western Union where he was happy

to have established direct working relationship with one of the world's leading anti-trojans

vendors which at the time was located at - http://proxy2.stealthedip.com/maniac/incoming/

Sample Directory Listing of Stan's personal directory at oxy2.stealthedip.com/maniac/incoming/

LockDownCorp's

FTP

server

where

he

was

busy

collecting

and

sharing

trojan

horses/worms/viruses and VBS Scripts and actually earning revenue in the process

Whenever Stan would attempt to reach out to his friends he would attempt to find out whether

they are online using a popular trojan horse including to actually check his email account for

their recently changed passwords and other related information including their current IP so

that he can properly connect to their home PC for educational purposes.

The primary purpose for connecting to a friend's PC using a popular trojan horse would be

purely for educational purposes with no actual hard or any sort of eavesdropping taking place.

While Dancho was busy studying in the Netherlands he was busy persistently checking one

of the World's most popular and high-trafficked Web sites for hackers and security experts

Astalavista.com - and sticking to the common wisdom circa the 90's where everyone was busy

making contributions and launching new groups - he decided to approach the company behind

the portal with a possible business proposal that basically consisted of having him monitor and

actually maintain the portal in terms of content including the actual production of a high-profile

Security Newsletter where we would produce security and hacking articles including a featured

Security Interview with key members from the Scene and the Security Industry.

Sample Screenshot of the Astalavista.com Information Security Portal which Dancho Danchev

was running as a Managing Director 2003-2006 where he was basically responsible for all the

content

Prior to getting a confirmation from a Team Member of the actual owner of the portal at the time

Dancho quickly began entering into negotiations about a possibly paid including a free venture

at the time where he could earn a small comission for producing a high-quality security newslet-

ter and actually be responsible for all the security and hacking content at Astalav-ista.com on

a monthly and daily basis.

26027

Sample Screenshot of Astalavista.ch's About Us Section where Dancho Danchev used to work

during his student years in the Netherlands as a Managing Director at Astalavista.com

As he began working on the monthly newsletter the first issue including the remaining twenty

six issues which he produced over a period of three years were quite a success including the

actual Geeky Photos section where portal users could send in photos of their desktop computers

for the purpose of featuring them at the Web site potentially promoting their desktop setups

to our audience at the time eventually leading him and the portal to win a PCMagaine Top 100

Security Sites Award back in 2005.

Sample screenshot of Dancho Danchev's Astalavista.com Winning a PCMagazine.com Top 100

Security Sites Award for 2005

Among Dancho's main responsibilities at the time where the daily updating of the portal with

high quality security documents tools and presentations including actual hacking and security

links and overall responsibility for all the content at the Web site including the production of a

highly popular security newsletter at the time including to actually answer and work on possible

partnership and advertising inquiries at the time which led to a successful repositioning of the

portal as one of the primary information security portal services online.

Among the key folks and individuals that he interviewed during his management of Astalav-

ista.com and asked some pretty decent and relevant questions at the time include:

Proge, Progenic.com

Jason Scott, TextFiles.com

Kevin Townsend, ITSecurity.com

Richard Menta, BankInfoSecurity.com

Mr. Yowler, Cyberarmy.net

Prozac, Astalavista.com

Candid Wuest, Security Researcher

Anthony Aykut from Frame4.com

Dave Wreski from LinuxSecurity.com

Mitchell Rowton from SecurityDocs.com

SnakeByte from Snake-Basket.de

Björn Andreasson from WarIndustries.com

Bruce from DallasCon.com

Nikolay Nedyalkov from ISECA.org

Roman Polesek from Hakin9.org

John Young from Cryptome.org

Eric Goldman EricGoldman.org

Robert, CGISecurity.com

Johannes B. Ullrich, CTO of the Sans Internet Storm Center, and the main developer behind the

Dshield.org project

Daniel Brandt, Google-Watch.org

26028

David Endler, TippingPoint.com

Vladimir, 3APA3A, Security.nnov.ru

Martin Herfurt, Trifinite.org

Personal Photo of Dancho Danchev Presenting at CyberCamp 2016 on "Exposing Koobface -

The World's Largest Botnet"

Being the World's most notable cybercrime researcher security blogger and threat intelligence

analyst the researcher quickly gained fame by systematically and efficiently profiling and ana-

lyzing a decent snapshot of malicious nation-state and fraudulent activity online leading him to

pursue a successful career as the World's most popular cybercrime researcher security blogger

and threat intelligence analyst.

In an early Monday morning the researcher quickly gathered a set of research materials of the

primary botnet that's he's been monitoring the infamous Koobface

botnet using passive and

active virtual SIGINT methodologies which basically include active sampling of the botnet's

malicious online activities using a daily set of intercepted malicious and fraudulent campaigns

launched managed and operated by the Koobface botnet for the purpose of providing the

necessary technical operational and strategic OSINT type of intelligence including the daily

batch of money mule recruitment domains and campaigns which he was busy profiling with the

idea to assist U.S Law Enforcement on its way to track down and prosecute the cybercriminals

behind these campaigns.

The Koobface botnet was the primary botnet propagating over social media at the time in

particular Facebook and has already managed to affect tens of thousands of users globally

potentially enticing them to interact with rogue and visual social engineer-ing based type of

malicious and fraudulent campaigns in the form of Fake Adobe Flash Players and fake YouTube

videos where the ultimate goal would be to attempt to affect their friends on Facebook by

sending automated and legitimately looking messages including links to rogue and malicious

content.

What what particularly interesting about the Koobface botnet at the time was the easy to track

down and monitor actual C &C and campaign infrastructure where I was busy tracking it down

and publishing my findings on a daily basis for the purpose of empowering my blog readers

and the security community with the necessary threat intelligence on the actual whereabouts

of the Koobface botnet in terms of offering as much technical details as possible with the idea

to profile and keep track of its campaigns potentially assisting Facebook at the time including

fellow security researchers on their way to track down and monitor the campaign.

Bonus Content - Visiting GCHQ

Back in 2008 I got the personal privilege to attend a high-profile conference event organized

by the Honeynet Project at the GCHQ where I got a personal invitation to attend the event and

make a presentation on the topic of cybercrime research which I did and actually attended the

event where I had the privilege and honor to meet some of the key people behind the Honeynet

Project where we exchange ideas and I had the privilege to make a high-profile presentation

which is entitled "Intell on the Criminal Underground - Who’s Who in Cybercrime for 2007".

Bonus Content - Interpol Conference

In 2010 I’ve received a direct invitation to attend one of the industry’s leading invite-only

cybercrime fighting conference which at the time was held at an undisclosed location where

I had the privilege to held a high-profile presentation on money mule recruitment technique

and practices including to actually meet and hang out with some of my friends and colleagues

from the security industry which was quite a privilege and an honor.

Bonus Content - RSA Europe 2012

Back in 2008 I got the personal privilege to attend a high-profile conference event organized

by the Honeynet Project at the GCHQ where I got a personal invitation to attend the event and

make a presentation on the topic of cybercrime research which I did and actually attended the

event where I had the privilege and honor to meet some of the key people behind the Honeynet

Project where we exchange ideas and I had the privilege to make a high-profile presentation.

18.10.18 Leadership Basics - An Analysis (2022-10-26 18:43)

[1]

26030

NOTE:

I wrote this article back in 2007. Here's the [2]achive. [3]Jefrey Pfeffer's Business 2.0 columns

always load me with self-esteem, and provoke me to go beyond the patters of success, the

ones I'm aware of. Integrity is an important quality, and so it adaptability and the enlightment

of constant self-development.

I tend to have developed this internal Early Warning System for tensions. What does this mean?

I use a cheap hushmail account, blogspot as a blogging platform, as I'm indeed trying to prove

something - it's not about the blogging platform, it's not about being a domainer, it's all about

the knowledge. Respect to HD Moore for still sticking to his black background, exactly the same

one I was using for several months.

The chase of an utopian dream - perfection is a never ending driving

force, you know you can

never be perfect, since it’s hard to define, but the constant idea of trying to achieve something

unachievable might indeed lead you somewhere.

The ultimate question - what do others think about me? how would I be remembered when I’m

gone? is where the problem starts. Being remembered means you’re already gone.

There are three different dimensions of the "I", the one you really are, the one you want to me,

and the one the people perceive you as. You’d better focus more who you actually are so you

can do better, and who you want to be, than ending up as being anything else but "someone

else’s expectation", more or less a transparent hologram of other people wanted you to be.

What would others say? What if they don’t like it? What if it undermines my confidence in

myself at the end of the day? Being hated, or having a "fan club" means you’re definitely up

to something, all you need to break through is believing it.

26031

[4]

Hanging out with the winners of the day is an every day reality, but the reality is that the true

cyberpunks often hang outside at a party or con, far away from the populist speeches, and

yet another 10k keynote mind-provoker. Still in need of a real-life story? Try Jessus, who was

supposed to hang out with the posers, the ones that supposedly excelled in the society at the

period of time, still he was dining with the opposite parties.

To me, it’s always a matter of perspective and a vision.

Reaching the "Trust no one" stage in your life means you’re definitely up to something, and

most importantly had the courage to raise above, the consequences among the knives flying

around, behind, and above you, are the opportunity costs you have sacrificed due to your

behavior such as less time spent on chasing chicky chicks for instance.

People easily forget themselves in the euphoria of temporary success, and while even the fact

of forgetting yourself means you used to be someone, this desperate cry for self-awareness in

itself is a pitiful personal milestone.

Don’t fight for appraisal, but learn to praise yourself, be interested, not interesting, break out

of definitions, and question everything, even yourself.

18.10.19 The Most Wanted Cyber Jihadist - An Analysis (2022-10-26 18:49)

[1]

26032

NOTE:

I wrote this post in 2007.

This would have been an important blog post if [2]cyber jihad were to be a issue that can be

personalized, however, the reality as always has to do with another perspective, which in cyber

jihad's case is diversification, localization of knowledge, and a knowledge-driven cyber jihadist

communities itself.

My point is that this guy should not be considered as the public face of cyber jihad, now that

he's no longer active as a cyber jihadist, he's a cyber martyr that will be inspiring another

generation of wannabe cyber jihadists to come.

[3]Here's the article:

" *In addition, Tsouli Irhabi used countless other web sites as free hosts for material that the*

jihadists needed to upload and share. The true extent of his material distribution network is

still not known. He is credited with the large scale distribution of a film produced by Zarqawi

called "All Is for Allah's Religion. His arrest struck a significant blow to al Qaeda's cyber ter-

rorism weaponry. With cyber weaponry only requiring widely available knowledge and skills

and the only equipment required a computer that can be purchased anywhere, cyber weapons

proliferation cannot be controlled. "

My favorite quote - " *With cyber weaponry only requiring widely available knowledge and skills*

and the only equipment required a computer that can be purchased anywhere, cyber weapons

proliferation cannot be controlled. These facts coupled with the recent cyber attacks on utilities

that blackout cities and regions show this is a serious threat. "

Wait a sec. PSYOPS is a practice by itself which in this case aims to increase the investments

made into securing the critical infrastructure of a country, one that I bet even the bad guys

stopped targeting due to the logical nature of the attack? It is such a practice. Moreover,

remember another such PSYOPS practice, namely the desired "media-echo" effect achieved?

18.10.20 A Pragmatic Cyberwarfare Doctrine - What Money Cannot Buy - An Analysis

(2022-10-26 18:54)

[1]

NOTE:

I wrote this post in 2007. These are basically some notes that I took on the emerging back then

[2]cyber warfare doctrine problem that the U.S was facing.

Key summary points:

- never let an insider do an outsider's job

-the convergence of conventional military capabilities and asymmetric warfare

- bombing the source of the attack means, you'll have a U.S strategic bomber bombing a place

somewhere in the U.S.

- subverting the enemy without fighting

- cyberwarfare attack from inside the fortification

- virtual cyber warfare competitions in a controlled environment

When you dedicate the largest proportion to keep up with the conventional military arms race,

it's the superpower, or a third world country that would defeat your entire conventional military

arsenal by not even confronting with it, and thus, by lacking the point of engagement render

it useless in the sense of directly bypassing it.

26034

18.10.21 Should a Country Physically Bomb the Source of the Cyber Attack? - An

Analysis (2022-10-26 18:59)

[1]

NOTE:

I wrote this post in 2007.

It all started with the basic speculation that a superpower should aim to physically bomb the

source of the cyber attack.

Here are some thoughts:

- physically bomb the source of the attack is not a metaphor, its an indication of the wrongly

understood situational awareness

- install a hxxp://makelovenotspam.com type of screensaver on each and every U.S government

PC, have it periodically obtain the last list of hosts to be attacked, obtained from a central Target

List repository

- if the U.S is to attack those attacking the U.S, a third party interested in taking advantage of

the U.S's bandwidth and know-how would easily make it look like someone else is attacking

the U.S and have the U.S attack the third party enemies

- the myth of lining up your army, and waiting for the other army to appear at a particular

battlefield doesn't exist in a cyber guerilla information warfare, where you're the visible target,

and your enemy is everywhere.

- each and every of the comments regarding the stereotyped type of adversary talk like the

adversary has a home address, physical headquarters

- there's no physical location to be bombed, there's no IP to be DDoS-ed since it's not theirs,

there's no home PC of the commander to take control of.

The bottom line, some of the most insightful and visionary for decades to come cyber warfare

research papers I've ever read, were written by U.S army researchers. However, as if pretty

much everything else in life, those who don't know are usually the one holding up the positions

where they're supposed to know more than everyone, and exactly the opposite.

Stay tuned!

18.10.22 The U.S is Facing a Cyber Warfare Doctrine Crisis - An Analysis

(2022-10-26 19:02)

[1]

26036

NOTE:

I wrote this blog post in 2007. Is it just me, or I get depressed when I come across the words

- U.S Cyber Command, Twiki.net and serial entrepreneur in the same article? Someone once

said that in the long term mega corporations and governments will be mainly involved in Talent

Wars, and he was right. After reading this article, I bet that Chinese cyber warriors will issue

an email to their internal mailing list entitled "The Depressing State of the U.S's Cyber Warfare

Doctrine" and someone will respond "What Cyber Warfare Doctrine?!". Cutting the sarcasm,

this is either a sophisticated PSYOPS to on purposely let others underestimate the Cyber Com-

mand's upcoming decentralization point in history, or Human Resources department in the

rush to meet a deadline.

Great stuff, so if every agency is doing whatever every agency feels like doing, you'll have

several agencies collecting intelligence on the same individual/group of individuals, who will

inevitably end up in a situation where they'll be collecting raw and unique to them only data,

one that some of the other agencies would have already obtained and marked as outdated and

26037

irrelevant under the current circumstances.

Why the emphasis on decentralization, when it should be on distributed management as a

concept?

How can you centralize your opponents when they've already reached the unrestricted warfare

stage, and have long been envisioning the potential of people's information warfare?

I guess that is the core of decentralized management is that everyone is doing whatever he

feels like doing.

Stay tuned!

18.10.23 Bureaucratic Warfare Against Unrestricted Warfare - An Analysis

(2022-10-26 19:05)

[1]

NOTE:

I wrote this blog post in 2007. In a people's information warfare scenario, the masses of end

users wanting to contribute bandwidth being recruited on a nationalism level, will simply infect

themselves with malware courtesy of the technical crowd possessing the capabilities to come

up with such a malware. In an arrogant people's information warfare, the technical crowd or

the "bot source compilers generation" will not just distribute DoS attack tools and a targets

list, they will backdoor the DoS tool itself, just like the case with this tool which I believe was

distributed during the frontal hacktivism attack.

Moreover, it wasn't a cyberwar, as it any type of war you have both sided loosing or gaining

tactical advantage, it was a virtual "shock and awe".

Stay tuned!

18.10.24 Ten Signs It's a Slow News Week - An Analysis (2022-10-26 19:07)

[1]

NOTE:

I wrote this blog post in 2007.

• Articles starting that malware increased 450 % during the last quarter - of course it's sup-

posed to increase given the automated polymorphism they've achieved thereby having

anti virus vendors spend more money on infrastructure to analyze it

• Articles starting that spam and malware attacks will increase and get more sophisticated

• Articles discussing a new malware spreading around instant messaging networks – psst

they're hundreds of them currently spreading

• Articles discussing how signature based malware scanning is next while an anti virus ven-

dor's ad is rotating on the right side of the article

• Articles commenting on an exploit code for a high risk vulnerability made public – it's

been usually circulating around VIP underground forums weeks before it made to the

mainstream media, with script kiddies leaking it to other script kiddies

• Articles pointing out how phishers started targeting a specific company

• Article emphasizing on how mobile malware will take over the world, despite that there

no known outbreaks currently active in the wild

26039

• Articles pointing out that having a firewall and an updated anti virus software is important

• Articles discussing which OS is the most secure one

• Articles mentioning the percentage increase in the thousands of spam and phishing emails

for the last quarter

Stay tuned!

18.10.25 Spotting Moguls - An Analysis (2022-10-26 19:12)

[1]

NOTE:

I wrote this blog post in 2007.

What's so bad in being a mogul?

• Moguls are boring

• Moguls are predictable

• Moguls are biased

• Moguls often use their company's over-valued financial performance – excluding the initial

investment – as a speaking platform

26040

• If Moguls blog, it would be on the Insecurities of Sun Tanning and everything in between

• Moguls conveniently "exclude the middle" taking credit for the Moon's announcing

phrases

• Moguls often whine when they should scream

• Moguls preach, rather than teach

• Moguls neatly restart the threat cycle of a particular threat in a mostly self-serving manner

• Moguls spend too much time not just looking into the mirror, but talking to its reflection

• Moguls are bad the way synthetic drugs are, and with the time you

don’t have a choice

buto start listing to "those voices" – rats have big ears.

• Moguls are a bad, yet amusing necessary evil, one that must be professionally dealt with.

• Even more amusing they become, as they start baby booming.

Stay tuned!

18.10.27 Exposing "Emennet Pasargad/Eeleyanet Gostar/Net Peygard Samavat"

Iran-Based Company on FBI's Most Wanted Cybercriminals List - An OSINT

Analysis (2022-10-27 10:41)

[1]

I've recently came across this [2]IC3 notification on Emennet Pasargad also known as Emen-

net Pasargad or Net Peygard Samavat and I've decided to further enrich the actual technical

information provided with the idea to assist everyone in their cyber attack and cyber campaign

attribution efforts.

Sample URL known to have been involved in the campaign:

hxxp://eeleyanet.ir - 5.144.130.40

Sample screenshots include:

hxxp://weberror.cn/be1/stat.php

hxxp://prosto.pizdos.net/ _lol/stat.php

hxxp://h278666y.net/www/stat.php - 72.233.60.254

I've decided to share this post including related screenshots and technical details with the

idea to inspire everyone to continue doing their research including cyber attack and campaign

tracking and monitoring including cyber attack and cyber attack campaign attribution efforts.

Back in 2009 there was a major speculation that Russia indeed launched a massive DDoS

(Distributed Denial of Service) attack against Georgia which was in fact true. What was par-

ticularly interesting about this campaign was the fact that the same DDoS for hire including

the managed DDoS service that was behind the attack was also observed to launch related

DDoS attack campaigns against bobbear.co.uk including a multi-tude of Russian homosexual

Web sites where the actual Web sites indeed posted a message back then on their official Web

sites signaling the existence of the DDoS attack targeting their Web sites.

18.10.29 Exposing a Compilation of Botnets-in-the-Wild Screenshots - An Analysis

(2022-10-27 19:59)

[1]

26052

Dear blog readers,

I've decided to share a compilation of botnets-in-the-wild screenshots coming straight from

the source namely various cybercrime-friendly forums internationally with the idea to raise

everyone's situational awareness on the current state of the botnet ecosystem globally in the

context of having hundreds of folks out there building and generating these potentially earning

tens of thousands of fraudulent revenue in the process.

An image is worth a thousand words.

Sample screenshots of various botnets-in-the-wild obtained using public sources include:

Dear blog readers,

It's a public secret that the majority of today's modern Web sites rely on the use of CAPTCHA for

proper user vs bot or automated software detection which in reality is a flawed and an outdated

approach to protect a Web site and its visitors as in 2022 we continue to live in a world where

CAPTCHA-solving as a service that also includes reCAPTCHA solving as a service continues to

proliferate with possible thousands of users across the globe processing hundreds of thousands

of CAPTCHAs courtesy of popular CAPTCHA services for the purpose of empowering Russian or

international cybercriminals on their way to properly and automatically register new accounts

on major Web properties and social networks internationally.

In this post I'll detail the activities of several known CAPTCHA-solving services and discuss

in-depth their functionalities with the idea to raise awareness on the concept including the

systematic and automatic CAPTCHA solving courtesy of humans and their affiliate-based

networks.

18.10.31 Mobile Malware - Hype or Threat? - An Analysis (2022-10-28 09:58)

[1]

26118

NOTE:

I wrote this article in 2006.

You've definitely witnessed the ongoing speculations on whether or

not mobile malware repre-

sents the type of threat some vendors got accused of hyping. Malware authors have this unique

position to follow the trend, understand when an approach gets mature enough to think of how

to reset it, and then all of a sudden completely shift their techniques – which results in P2P,

IM, Email, and yes, Skype as the "next big thing" on the malware scene type of weekly media

articles.

It’s all cyclical, and not a rocket science needing a reverse engineer to explain and dazzle you

with advanced Assembly experience.

There are incentives for malware authors to code mobile malware, namely the

commercialization of mobile malware itself, which happened in the middle of 2006 with the

release of the RedBrowser. Among the key point I indicated in my "[2]Malware - Future

Trends" research that I released in the beginning of 2006. The ugliest things are the easiest to

emerge as always.

The very nature of a mobile phone’s voting and purchasing power, let’s not mention could

literally provoke your imagination on the possible abuses.

Why would an end user start asking a mobile operator’s representative on the availability of

mobile anti virus scanners? Because he or she would have been a victim the art of market

development, viral

The industry's main points:

- more people have mobile phones then they own a personal computer – which doesn't mean

they're all smart phones running Symbian or Windows Mobile

- over 300 generically detected malware samples, reminds of the concept of a malware family

in PC malware world. These are all the Cabir family, spread to code on the Internet and have

26119

ordes of script kiddies fueling the FUD while watching Takedown and inspiring themselves to

eavesdrop on someone's mobile communication while "commuting" in the park

The reality

- Anti virus vendors suffer from marketing myopia, they've simply fallen in love with their

products, and we all know that once you fall in love it's hard to become as pragmatic as you

used to be before – sweet pain

- the majority of known mobile malware comes out of a Cabir Proof of Concept (PoC) publicly

available code, that is the spreading routine within. Namely the current threat represents

nothing more than a mobile malware family, and there's no such thing as a perfect family

- Malware authors are too busy to efficiently play cat and mouse game and taking advantage

of the about to reach 1B world wide Internet population.

- the end user MUST confirm the unknown Bluetooth connection, if she's in discoverable

mode, must confirm the execution of the executable from unknown source

- given that Symbian and Windows Mobile dominate the mobile OS space, a vulnerability in

the systems is crucial

- Anti virus signatures are basically a reactive security protection

I once argued on the myth of anti virus vendors sharing every malware sample they came

across, in between the "usefulness" of virus signatures in today's open source malware, and

malware on demand world

How to protect yourself?

- be aware of the basics of mobile malware

- don't install applications from untrusted on-the-go sources

Do you need a personal anti-virus scanner for your mobile phone? No, you don't, but mobile

operators need them on the gateway level, the rest is just your mobile operator

differentiating its offering, positioning itself as a conscious one, and further fueling growth

into the market – whether revenues are about to get spent on further R &D on mobile

malware, or market development with other products is up to the vendors themselves.

It's your network operator who should be responsible for limiting the spread of potential

epidemics, and charging a buck for a slight modification of Cabir's PoC spreading module,

brings us back to the same old issue with open source malware, or malware of demand and

anti virus signatures usefulness and recency of updates. My point, the responsibility for

dealing with general and family based mobile malware, the one we're seeing today, should go

to my mobile operator, not to myself getting infected and spreading the decease even further.

The average mobile phone user would start enjoying a provider's brand even more, if he's

been talked into the huge dangers posed by mobile malware – from a marketing point of view

he would even spread the word further while trying to let the other perceive him/her as a tech

savvy individual with a fancy AV scanner on his couple hundred.

Targeted attacks have a huge potential though, while a mass sending of mobile malware

would result in the mobile operator directly blocking it, and merely relaying on the end user

to take care of their responsibilities. All you need is a wide spread mobile malware

dissemination attempt, and then you'll witness your operator using his ownership powers to

shock and awe you with its know how.

26120

Your title here

Wise investments are not always those that seems the most proactive ones, but the ones

taking advantage of the momentum.

Remember, the best marketers don't just respond profitably to the consumer's needs, they

create new markets. It's the unspoken rule of the game.

What's next? Anti virus software for your gaming device and music player, as well as for your

IPv6 compatible fridge? For sure, but in the very, very long run. Meanwhile, be aware, don't

panic, and try to base your concerns on objective and unbiased sources only.

Stay tuned!

18.10.32 Exposing a Portfolio of YaBucks Pay Per Install Affiliate Network Scareware

Serving Domains - An Analysis (2022-10-28 13:29)

[1]

NOTE:

I took these screenshots in 2009.

26121

It used to be a moment in time when scareware and pay per install affiliate-based revenue

sharing fraudulent and malicious networks used to dominate the threat landscape as the pri-

mary monetization vector courtesy of the bad guys where they've managed to successfully

steal basically tens of thousands in fraudulent revenue by enticing users into installing and

interacting with rogue and fake security software.

In this post I'll take a deeper look inside the YaBucks rogue and affiliate-network based scare-

ware serving network that managed to affect thousands of users globally largely based on

the number of affiliates that participated in it including to also provide technical details on its

Internet-connected infrastructure with the idea to assist everyone in their cyber attack and

cyber campaign attribution efforts.

Sample screenshots include:

18.10.34 Exposing A E-Shop for Selling Access to Compromised PCs - An Analysis

(2022-10-29 04:10)

[1]

26142

NOTE:

I took these screenshots in 2009. Dear blog readers,

I've decided to share with everyone some screenshots of a E-Shop for selling access to com-

promised PCs.

Largely thanks to a variety of built-in botnet management and control features today's modern

botnet masters are fully capable of renting or offering access to malware-infected hosts which

could be used for a variety of purposes which include the hosting of rogue and malicious content

including the actual use of these hosts to further spread malicious software largely thanks to

a variety of segmentation features currently available in a variety of high-profile malicious

software and botnet releases.

Sample screenshots include:

19 Проведение тех.работ

04.2010

Сегодня проводились тех.работы по исправлению всех присланных вами ошибок.
Многие из которых были связаны с последними обновлениями.

Сегодня было также введение некоторых обновлений, некоторые из которых пока будут проходить тестирование и будут задействованы уже завтра.

Спасибо за ваши сообщения и активную помощь в развитии сервиса.

16 Большие обновления закончены.

04.2010

Эта ночь для нас прошла как всегда рабочей, только на этот раз мы занимались внедрением новых функций.
К сожалению обновления затянулись аж до 10 часов утра вместо 6 как планировали, но сделать получилось даже лучше чем планировали.

И так, по порядку:
1. Мы убрали полностью кнопку поиска, посчитав её просто не нужной и не удобной функцией, так же убрали выпадающие списки стран, городов, регионов, но не совсем. Их мы перенесли в новое окошко, в котором вы сможете очень удобно подобрать сервер по своим критериям.

18.10.43 Profiling a Russia-Based Bulletproof Hosting Provider - An Analysis

(2022-10-31 10:53)

[1]

26160

[2]

[3]

[4]

[5]

[6]

[7]

It should be clearly noted that in today's modern cybercrime ecosystem which is largely driven

by the existence of bulletproof hosting providers which basically either ignore abuse notifica-

tions or on purposely launch rogue and fraudulent online hosting operations using their own

resources or in combination with cloud-based service providers who unknowingly participate

in such type of fraudulent and rogue bulletproof hosting schemes including actual malicious

software spam and botnet C &C hosting we've continuing to observe an increase in the overall

volume of these providers where we're also witnessing their use by both novice and experi-

enced cybercriminals where the ultimate goal would be to increase the average time it takes

for vendors organizations and researchers to take offline their rogue fraudulent and malicious

campaigns.

In this post I'll discuss several of the high-profile bulletproof hosting providers that were active

circa 2010 and I'll provide some actionable intelligence on the infrastructure behind them with

the idea to assist everyone in their cyber attack and cyber campaign attribution efforts.

18.10.44 A Peek Inside a Russian Web-Based Managed Spam Service - An Analysis

(2022-10-31 11:04)

[1]

26165

With spam continuing to proliferate globally that also includes the use of spam for serving

malicious software largely populating a variety of botnets on a daily basis including the ever-

growing use of client-side exploits for the purpose of affecting hundreds of thousands of users

on a daily basis I've decided to take a peek inside a Russian-based managed spam service that

let's users launch massive and widespread spam campaigns in a DIY (do-it-yourself) fashion.

18.10.45 A Peek Inside the Earnings4u Managed Malware Distribution Service - An

Analysis (2022-10-31 12:10)

[1]

Dear blog readers,

I've decided to offer an in-depth inside peek inside the Earnings4u managed malware distribu-

tion service circa 2010 with the idea to raise awareness on the ease of use and the actual trend

where novice and experienced botnet masters can easily acquire the necessary seed popula-

tion in terms of purchasing access to malware infected hosts which could be further used to

spread their malicious software campaigns including spam and phishing campaigns.

With managed affiliate-network based revenue sharing schemes continuing to proliferate it

shouldn't be surprising that more cybercriminals are actually looking for ways to monetize

access to their acquired through blackhat SEO including various other rogue and fraudulent

techniques traffic including users who would be interested in offering managed and centralized

ways for spreading other cybercriminal's malicious releases in a systematic and efficient way

leading to today's modern cybercrime ecosystem reality where both novice and experienced

cybercriminals rely on rogue and malicious affiliate-network based revenue sharing schemes

for both revenue generation and the spreading of malicious software.

18.11.1 Yanluowang's Ransomware Group's Internal Communications Leaked by

Russian Threat Actors - An Analysis (2022-11-01 12:44)

[1]

Yanluowang's ransomware group has recently had their internal communications leak online

prompting various researcher into looking into them and analyzing them. The breach of the

gang's internal communications happened courtesy of Russian threat actors who also defaced

and left a message on their front page.

The leak's initiative has also released various source code in terms of the decryption tool for

the ransomware including the source code of the builder.

Sample screenshots include:

[2]

26175

```

ote_text = """Hello.
e hacked your main servers, and stole 1000 gigabytes of confidential data, we also encrypted most of all of your hosts
e are a financially motivated group, so, first of all, there is nothing to do with politics in this attack.
elow is an instruction on what you should and should never do.
ere's what you shouldn't do:

   Contact the police, fbi or other authorities before the end of our deal
   Contact the recovery company so that they would conduct dialogues with us. (This can slow down the recovery, and generally put our communication to naught)
   Do not try to decrypt the files yourself, as well as do not change the file extension yourself !!! This can lead to the impossibility of their decryption.
   Keep us for fools)
   We will also stop any communication with you, and continue DDoS, calls to employees and business partners.
   In a few weeks, we will simply repeat our attack and delete all your data from your networks, WHICH WILL LEAD TO THEIR UNAVAILABILITY!
   Here's what you should do right after reading it:
   If you are an ordinary employee, send our message to the CEO of the company, as well as to the IT department
   If you are a CEO, or a specialist in the IT department, or another person who has weight in the company, you should contact us within 24 hours by email.
   We are ready to confirm all our intentions regarding DDOS, calls, and deletion of the date at your first request.
   As a guarantee that we can decrypt the files, we suggest that you send several files for free decryption.
   Online chat to contact us (available only over TOR):
    http://iinika4m3b7n53wjzhkx36aahk5bxf72rzek2dbkhlhazs7ow6arqiqd.onion/
     Key: fe43352f14348ffa4061de7af7612447

   Mails to contact us:
   1)caseymichelle@mailfence.com
   2)lupehorton@mailfence.com
   Our leak site :
   crptd5sv5bdz6hovrbkac6mnp3rt7zij62njsqwh5a6ldd3asxdd22qd.onion
   PS. We have a lot of contacts in the field of journalism.***

18.11.2 A Peek Inside the Hybrid Remote Administration Control System Malicious

Software - An Analysis (2022-11-02 04:25)

[1]

Dear blog readers,

I've recently decided to take a peek inside my old threat intelligence research archives and

I've decided to share some sample screenshots of a popular back in 2010 malicious software

botnet release known as the "Hybrid Remote Administration Control System".

An image is worth a thousand words.

Sample screenshots include:

18.11.3 Exposing a Sample Portfolio of Scareware Themed Screenshots - An Analysis

(2022-11-02 04:25)

[1]

26183

Dear blog readers,

I've decided to share with everyone a portfolio of known scareware themed photos with the idea

to raise awareness on what used to be the primary monetization vector within the cybercrime

ecosystem circa 2010.

An image is worth a thousand words.

Sample screenshots include:

[2]

26184

I can trust Green AV to protect my PC. I know that creating realy good antivirus - is a tough a challenge, and Green AV Team did it.
Anne Tartari
34 years
teacher, housewife
LA
I think the Environmental program was maybe the strongest reason. There are many antiviruses, and they all are great i suppose. But I share the idea of environmental care and try to support it whatever it is. It looks simple - just 2 dollars, but it's a good new start!

Votre problème
VotreMeilleurAntivirus a été créé pour ceux qui utilisent largement leurs ordinateurs personnels, pour ceux qui naviguent sur Internet et sont en danger d'infection. Le système de votre PC peut devenir inopérant à cause des virus; vos données personnelles, y compris l'information sur les cartes de crédit, peuvent être volées ou bien vous pouvez être ennuyé des pop-ups non désirées.
Notre solution
VotreMeilleurAntivirus vous permet de contrôler complètement votre PC. Si votre ordinateur est un outil précieux de votre travail ou de loisir, vous apprécierez ce programme, parce qu'il garde votre système des virus et autres programmes malveillants à l'aide des analyses régulières; aussi, il vous protège des violations de votre confidentialité et vous fournit une protection complète et efficace de votre ordinateur.
Qui a besoin de VotreMeilleurAntivirus?
VotreMeilleurAntivirus est pour ceux qui veulent protéger leurs ordinateurs. Si votre PC est souvent attaqué de virus et de vers et quelqu'un essaie de suivre vos activités sur Internet, alors, ce logiciel est pour vous. Travaillez en sécurité et utilisez Internet sans aucune inquiétude. Avec VotreMeilleurAntivirus vous êtes protégé contre toutes les menaces existantes!

You need this program because it's unique, effective and able to compete with many well known large software companies. It certainly should be installed on your PC - and you will forget about Spyware and Adware wreckers. This is the best protection software of today among other existing, so use free scan.
About 92% of all PCs are infected with threats that can't be identified by most security programs.
Nobody's safe today! Who can say for sure that his PC is notinfected?
The latest researches prove that 92% of all home PCs are under the threat of infection, the main source of which is still the Internet. The vast majority of Internet users fall for the bait of various trading companies and commercial websites which make large-scale distribution of viruses. Usually, these viruses get to inexperienced users through "free-of-charge" software products.
So, what is Spyware?
This is malevolent software whose aim is to supervise your actions when you are on-line.
As soon as it is noticed that you are Internet amateur who likes to browse boundless open spaces of the Internet, you will immediately receive a huge heap of different information (Commercials, Popups and just Spam) from inside of your PC!
Spyware may harm your PC efficiency and slow the speed of transfer into the Internet.
They penetrate into your PC from websites you visit, spam, even with hidden additions of license programs you had installed. The place of infection always remains not defined. Some Antivirus or Firewall programs cannot find it at all.
Why choose Antivirus 2009 Protection?
Antivirus 2009 Protection is a leading program worldwide:
This unique program won an award for being first Firewall-like protection.

e·Kerberos
Buy Now!
Caution!
Break-through attempt!
What the risk?
What is eKerberos?
eKerberos is a sophisticated but easy to use software that utilises active protection strategy to eliminate security threats that common Antivirus programs miss.
Overview
Purchase
Updates
Download
Features
Support
Why is eKerberos better then standard antivirus programs?
Anti -virus & -spyware programs use their database to search for mailitious code on your PC. Hackers know that and change the code of their Trojan-horses on a hourly basis making the code-check method obsolete. eKerberos algorithm monitors the activity of all programs that are installed on your PC and prevents any dangerous actions. Trojan horses and spyware programs have a common behaviour that differs them from safe software. eKerberos detects attempts to perform malicious actions, blocks them and performs a fuzzy search to find a match and securely cure your PC.
What threats does eKerberos protect from?
Keyloggers - these programs were intended to steal business related information by recording all the keystrokes you make on your keyboard. Right now keyloggers are mostly used to record the data that you enter in web-forms (passwords, personal details, credit-card information e.t.c.) and misuse it. Keyloggers are often installed by your family members and colleagues to spy on you. eKerberos monitors your system to prevent such activity and clears your system. Data theft - some Trojan horses search for specific files containing the information they need and send them to the owner of the virus. There is a small number of hosting centers where such data-storage can be hosted, they are mainly located in China and are all included in our database. eKerberos checks your outgoing traffic and prevents connections to dangerous addresses. Direct attacks - a lot of worms are always searching for open ports to break into PCs directly. eKerberos monitors your ports and defends them against intruders. Launches of malicious software - viruses and Trojan-horses often hide their code in standard programs like Internet explorer and execute malicious code. eKerberos instantly blocks the execution tracks the infected partitions of the files and cures them.

WHAT IS SYSTEM SECURITY?
System Security is your comprehensive, all-in-one security solution guarding your system against spyware intrusions, annoying adware, identity theft, and all kinds of malware brooding on the net today. Combining advanced removal capabilities with state-of-the-art monitoring and protection modules, System Security is the only security software you need for your home PC. Equally trusted by companies and end users, System Security is your answer to today's security issues.
HOW SYSTEM SECURITY CAN HELP YOU?
With System Security you have your system cleaned from possible malware infections, protected against current intrusions and robustly secured against future security alerts. Combining outstanding cleaning capabilities with an extensive, constantly expanding database of adware and malware types and a sophisticated, highly intelligent detection module, System Security has everything to become your comprehensive home use security solution in the modern world.
System Security's technology guards you against known, documented dangers and emerging, previously unknown types. Its real-time monitor detects and wards off malware attacks and hacking attempts while the removal module uses the huge spyware database to clean your system from any kind of infection.
IS SPYWARE REALLY DANGEROUS?
Spyware is today's most talked about security issue taking many forms from relatively 'harmless' spam scripts which flood your computer with ad popups and unsolicited emails to serious virus-like programs which steal your private information like passwords and credit card details.

XP antivirus technology protects you from both known and emerging threat variants and gives you real-time protection for your computer with our advanced XP antivirus Guard real-time monitor.
Keep your computer free from trojans, spyware, adware, worms, keyloggers, rootkits, dialers and other malicious programs!
Why spyware is dangerous?
Spyware is the most prevalent threat to online computer privacy and security.It is installed on your computer through websites, spam and as hidden additions to legitimate programs you install.
Spyware brings lots of damage in the sense of data confidentiality. Spyware programs register every user step, both inside the system and in the Internet. All information is delivered to the malefactor who collects data in his, not your, interest!

Antivirus +
95%
OF ALL HOME PC'S ARE INFECTED WITH SPYWARE, ADWARE TROJANS AND KEYLOGGERS!
72% of all spyware is not detected by the major Anti-virus programs. Only a purposely built spyware removal tool such as Antivirus + can!
Antivirus + features:
Spyware removal - detects and removes spyware programs and trojan horses installed on your PC.
Homepage Monitor Tool - browser Hijackers, belonging to the family of spyware and adware, are capable of taking control over your homepage and other favorite pages, and set an unknown website as your homepage.
System clean-up - eliminates the traces of your system activities.
Disc clean-up - securely destroys all the data on your old hard disc.
Quarantine - The infected files that cannot be fixed or deleted are moved to a quarantine folder and displayed on the Quarantine pane of AntiVirus.
User-friendly Wizard Mode - the Quick Scan Wizard will help you run a scan in the basic scan modes.
Autorun Tool - if you want to know what applications run automatically on your system after Windows boots,
Open Ports Tool - without a protective application, your system is defenseless and becomes highly vulnerable to Trojan programs.
Many other features

Basic symptoms of spyware infection

*If the answer to one of these questions is "Yes", then you are probably infected.
- Your computer has slowed down
- Your Internet connection speed has decreased
- You have downloaded music or software from the Web
- You get popups and annoying ads when you're online or sometimes even offline
- Your default home page has been changed to the one you didn't ask for
- You have an extra toolbar installed, and you don't know where it came from
- You receive more spam emails than ever

What is spyware?

Spyware, like a virus, is a malicious software planted on your PC by a third party in order to secretly monitor your online activity. Once your browsing habits are analyzed, you are flooded with endless Commercials, Popups and Spam from inside your PC! Spyware also dramatically slows down your computer and Internet connection speeds. Spyware collects your private information and steals your identity, passwords, credit card details and other financial data.

Live Update!

The Live Update feature allows you to keep VirusResponse Lab 2009 up-to-date to the latest known Spyware threats.

» Download VirusResponse Lab 2009 now!

No one is safe!

According to the National Cyber Security Alliance, 9 out of 10 computers with an Internet connection are infected with spyware, without knowledge or approval. Commercial websites, "free" software and marketing companies are massively distributing dangerous Spyware that put you at risk. Find out right now with our

» FREE Spyware Scan.

Spyware in the news

MacNewsWorld: "Spyware is evolving into a monster that might soon become more vicious than e-mail spam and virus attacks combined."

TheRegister: "73,000 Trojan horse 61,000 system monitoring programs and 2.3 million adware programs in a scan of only 420,000 PCs..."

Buy Now | Features | Support | Testimonials | Company

Spyware and Spam are the world's leading threats to your computer's security today. After just five minutes surfing only a few pages on the internet, you may have unknowingly downloaded more than 10 spyware applications that run and exploit your computer. Sending and receiving email makes your computer just as vulnerable to annoying and malicious spam.

Spyware Scan

Scans your entire system for infections using our exclusive threat database that gets updated every single hour. Scanning is an easy 3-step process by the end of which your system will be clean of All spyware dangers.

Spywall Live Monitoring

Brand-new real-time monitor for any kind of spyware or adware attacks attempted on your machine. After you clean your system, © Spywall will keep onwatching your back. You'll never have to worry about spyware again.

Spam Filter

This real-time filtering program monitors and blocks all incoming spam,keeping your inbox clean of annoying (and sometimes dangerous) messages.

Popup Blocker

Being automatically integrated into your browser, it will make you forget about commercial pop-ups sooner than you can imagine!

What is Spyware ?

Spyware (e.g. virus) is malicious software planted on your PC by a third party in order to secretly monitor what you do online. Once your browsing habits are analyzed, you are flooded with endless Commercials, Pop-ups and Spam from inside your PC! Spyware dramatically slows down your computer and Internet connection speed!

Spyware collects your private information and steals your identity, passwords, credit card details and other financial data!

18.11.4 My Old Twitter Account - Sample Twitter Background Collages Circa 2010 -

An Analysis (2022-11-02 04:25)

[1]

Dear blog readers,

I wanted to take the time and effort and elaborate more on my old [2]Twitter account circa 2010

in terms of what really happened and how I managed to accumulate approximately 11,000

followers on Twitter in less than three months prior to announcing that I'm joining Twitter on

my personal blog.

Also for the record - users interested in obtaining access to my old Twitter account for research

and reference purposes including to actually go through it can grab a copy of it from [3]here.

26226

Sample collages which I produced back then for my Twitter background in a typical cybercrime

research fashion which I hope that you'll enjoy include:

[4]

[5]

26227

[6]

I wanted to say big thanks to everyone who used to follow me on Twitter back then including

everyone who's following me on [7]Twitter up to present day.

Stay tuned!

18.11.6 Exposing a Publicly Accessible CAPTCHA-Solving Service - An Analysis

(2022-11-02 04:26)

Dear blog readers,

26237

I've decided to share with everyone a series of photos courtesy of a publicly accessible

CAPTCHA-solving service that also includes the breaking and direct bypassing of Google's

reCAPTCHA with the idea to raise awareness on the fact that in today's modern cybercrime

ecosystem the bad guys continue to outsource the CAPTCHA solving process to humans who

would then systematically and semi-automatically attempt to solve as many CAPTCHAs as pos-

sible potentially earning a decent portion of revenue in the process and most importantly em-

powering today's modern spam and blackhat SEO tools in terms of automated CAPTCHA solving

and account registration services on some of today's major Web properties.

Sample screenshots include:

18.11.7 Exposing Recently Leaked Cybercrime-Friendly Forum Community Screen-

shots - An Analysis (2022-11-02 04:26)

[1]

Dear blog readers,

I've decided to share some publicly obtainable and available screenshots of what appears to be

a compromise of what used to be a high-profile cybercrime-friendly forum community with the

idea to raise awareness on the fact that even the bad guys can suffer security breaches that

also includes attacks from fellow researchers Law Enforcement and vendors including fellow

cybercriminals.

Sample screenshots include:

18.11.8 A Peek Inside the Mod Bot Malicious Software Botnet Release - An Analysis

(2022-11-02 04:26)

[1]

Dear blog readers,

Continuing the "going through my old threat intelligence research archives" blog post series

I've decided to share yet another compilation of Mod Bot which is a well known malicious

software botnet release with some pretty interesting and sophisticated features.

An image is worth a thousand words.

Sample screenshots include:

18.11.9 Exposing a SQL Injection Capable IRC Malware Bot - An Analysis

(2022-11-02 04:31)

[1]

Dear blog readers,

I've decided to share with everyone a screenshot which I took back in 2010 which basically

demonstrates an IRC malware bot which is capable of executing SQL injection campaign using

stolen or compromised access to malware-infected hosts where the actual C &C server activity

takes place in IRC where the botnet master can basically send instructions to any of the botnet's

infected hosts for the purpose of having them execute and participate in a SQL injection attack

that also includes scanning and reconnaissance capabilities.

Stay tuned!

18.11.10 Exposing BBC's Chimera DDoS Botnet - An Analysis (2022-11-02 04:37)

[1]

26250

Dear blog readers,

Back in 2009 the BBC bought a [2]DDoS botnet to demonstrate how it works.

In this post I've decided to offer sample screenshots of the actual botnet in question with the

idea to raise more awareness on how the BBC actually bought a DDoS botnet to demonstrate

how it works.

Sample screenshots include:

18.11.12 Exposing Sample Screenshots Courtesy of the Yes Web Malware Exploita-

tion Kit - An Analysis (2022-11-02 05:03)

[1]

Dear blog readers,

In this post I've decided to share some sample screenshots courtesy of the Yes web malware

exploitation kit with the idea to raise awareness on the ease and sophistication of today's mod-

ern web malware exploitation kits in terms of systematically and efficiently affecting thousands

of users globally with malicious software through the serving of outdated and already patched

client-side exploit vulnerabilities.

18.11.13 Exposing a Sample Russia-Based Managed Web-Based Spam Service - An

Analysis (2022-11-02 05:09)

[1]

26258

Dear blog readers,

I've decided to share some sample screenshots of a managed spam service with the idea to

raise awareness on the ease and sophistication of these services and just how easy it is to

launch a spam campaign by outsourcing the actual management and control process to a

managed spam service.

Sample screenshots include:

18.11.19 Kuka haluaa tulla vieras bloggaaja tässä blogissa? (2022-11-02 11:49)

[1]

Hyvät blogin lukijat,

Tiedätkö paljon tietoturvasta kyberrikollisuuden tutkimuksesta OSINT ja uhkatiedustelun

keräämisestä, mukaan lukien kyberuhkatoimijoiden tutkimus?

Oletko kiinnostunut ry-

htymään vierailevaksi bloggaajaksi tähän blogiin, jossa voit tavoittaa yhden parhaista

ja monipuolisimmista yleisöistä tietoturva-alalla joulukuusta 2005 lähtien, joka koostuu

tietoturva-asiantuntijoista, tutkijoista, myyjistä ja organisaatioista, mukaan lukien tietoverkko-

rikollisuuden tutkijat, Yhdysvaltain tiedustelupalveluyhteisö ja lainvalvontaviranomaiset ja -

organisaatiot?

Kuka on Dancho Danchev ja mikä on Dancho Danchevin blogi?

"Itsenäinen urakoitsija | Astalavista.com 2003-2006 | Astalavista.box.sk 2020-2022 | Lovely

Horse Participant | Slashdotted Two Times | Ex-ZDNet | Ex-Webroot | Won Jessy H. Neal Award

| Won SCMagazine Award | Took Down the Koobface Botnet | Presented at the GCHQ with the

Honeynet Project | SCMagazine Who to Follow on Twitter for 2011 | Osallistui GCHQ:n huip-

pusalaiseen ohjelmaan nimeltä "Lovely Horse" | Tunnistettiin SolarWinds-hyökkäyksen merkit-

tävä uhri - PaloAltoNetworks | Löytyi haittaohjelmia Flashpointin verkkosivuilta | Jäljitettiin

Koobface-botverkkoa ja paljastettiin yksi bottiverkon ylläpitäjistä | Pääsi Slashdotiin kaksi ker-

taa | Henkilökohtainen blogini sai 5. sijan. 6M Page Views Joulukuusta 2005 lähtien | Vanha

Twitter-tilini sai 11 000 seuraajaa | Minulla oli keskimäärin 7 000 RSS-lukijaa blogissani | Min-

ulla on oma vinyyli "Blue Sabbath Black Cheer / Griefer - We Hate You Dancho Danchev", jonka

on tehnyt kanadalainen taiteilija | Tällä hetkellä käynnissä Astalavista.box. sk | Annoin haastat-

telun DW:lle Koobface-bottiverkosta | Annoin haastattelun NYTimesille Koobface-bottiverkosta |

Annoin haastattelun venäläiselle OSINT:lle | Jeffrey Carrin Taia Global on listannut minut merkit-

täväksi kilpailijaksi | Esitelty GCHQ:ssa | Esitelty Interpolissa | Esitelty InfoSecissä | Esitelty

CyberCampissa | Esitelty RSA Europessa"

HUOMAUTUS: Guest Post -artikkelisi voidaan kirjoittaa joko englanniksi tai omalla äidinkielelläsi.

Tehdään tästä totta!

Lähetä minulle sähköpostia englanniksi osoitteeseen dancho.danchev@hush.com, jossa

tiedustellaan tätä tilaisuutta, mukaan lukien lyhyt esittely ja mahdollisesti LinkedIn-profiili tai

ansioluettelo, ja palaan pian takaisin sinulle ajatuksella värvätä sinut ja esitellä sinut virallisena

vierasbloggaajana henkilökohtaisessa blogissani.

Pysy kuulolla!

[1]

26281

Mieli tinklaraščio skaitytojai,

Ar daug žinote apie informacijos saugumo kibernetinių nusikaltimų tyrimus OSINT ir grėsmių

žvalgybos informacijos rinkimą, įskaitant kibernetinių grėsmių veikėjų tyrimus? Ar jus dom-

ina galimybė tapti šio tinklaraščio kviestiniu tinklaraštininku, kuris nuo 2005 m. gruodžio

mėn. galėtų pasiekti vieną geriausių ir įvairiausių saugumo pramonės auditorijų, kurią su-

daro saugumo ekspertai, tyrėjai, pardavėjai ir organizacijos, įskaitant kibernetinių nusikaltimų

tyrėjus, JAV žvalgybos bendruomenę ir teisėsaugos institucijas bei organizacijas?

Kas yra Dancho Danchev ir kas yra Dancho Danchev tinklaraštis?

"Nepriklausomas rangovas" | Astalavista.com 2003-2006 m. | Astalavista.box.sk 2020-2022 m.

| "Lovely Horse" dalyvis | "Slashdotted" du kartus | "Ex-ZDNet" | "Ex-Webroot" | Laimėjo Jessy

H. Nealo apdovanojimas | Laimėtas SCMagazine apdovanojimas | Išnaikino "Koobface" botnetą

| Pristatytas GCHQ su "Honeynet" projektu | SCMagazine Who to Follow on Twitter 2011 | Da-

lyvavo visiškai slaptoje GCHQ programoje "Lovely Horse" | Nustatė pagrindinę "SolarWinds"

atakos auką - "PaloAltoNetworks" | Rado kenkėjišką programinę įrangą "Flashpoint" interneto

svetainėje | Stebėjo "Koobface" botnetą, sudarė jo profilį ir atskleidė vieną botneto operatorių

| Du kartus pateko į "Slashdot" | Mano asmeninis tinklaraštis gavo 5. 6 mln. puslapių peržiūrų

nuo 2005 m. gruodžio mėn. | Mano senoji "Twitter" paskyra sulaukė 11 000 sekėjų | Mano

tinklaraštyje buvo vidutiniškai 7 000 RSS skaitytojų | Turiu savo vinilą "Blue Sabbath Black

Cheer / Griefer - We Hate You Dancho Danchev", kurį pagamino kanadiečių menininkas | Šiuo

metu valdau Astalavista.box. sk | Daviau interviu DW apie "Koobface" botnetą | Daviau interviu

"NYTimes" apie "Koobface" botnetą | Daviau interviu Rusijos OSINT | Jeffrey Carr "Taia Global"

įvardytas kaip pagrindinis konkurentas | Pristatyta GCHQ | Pristatyta Interpolui | Pristatyta In-

foSec | Pristatyta CyberCamp | Pristatyta RSA Europe"

PASTABA: Svečių pranešimų straipsniai gali būti rašomi tiek anglų, tiek gimtąja kalba.

Padarykime tai!

Siųskite man el. laišką anglų kalba adresu dancho.danchev@hush.com, kuriame teiraujatės

apie šią galimybę, pridėdami trumpą prisistatymą, įskaitant galbūt "LinkedIn" profilį arba CV,

ir aš netrukus su jumis susisieksiu, kad galėčiau jus užverbuoti ir pristatyti kaip oficialų Svečių

tinklaraštininką savo asmeniniame tinklaraštyje.

18.11.32 Cine vrea să devină un Blogger invitat la acest blog? (2022-11-02 12:20)

[1]

26285

Dragi cititori ai blogului,

Știți multe despre securitatea informațiilor cercetarea criminalității cibernetice OSINT și

colectarea de informații despre amenințări, inclusiv cercetarea actorilor de amenințări ciber-

netice? Sunteți interesați să deveniți un blogger invitat pe acest blog, unde veți putea ajunge

la una dintre cele mai bune și mai diverse audiențe din industria de securitate din decembrie

2005, care este formată din experți în securitate, cercetători, furnizori și organizații, inclusiv

cercetători în domeniul criminalității cibernetice, comunitatea de informații din SUA și agenții

și organizații de aplicare a legii?

Cine este Dancho Danchev și care este blogul lui Dancho Danchev?

"Independent Contractor | Astalavista.com 2003-2006 | Astalavista.box.sk 2020-2022 | Partic-

ipant la Lovely Horse | Slashdotted Two Times | Ex-ZDNet | Ex-Webroot | A câștigat Jessy H.

Neal Award | Premiul SCMagazine Award | A doborât botnetul Koobface | Prezentat la GCHQ

cu proiectul Honeynet | SCMagazine Who to Follow on Twitter pentru 2011 | A participat la un

program strict secret al GCHQ numit "Lovely Horse" | A identificat o victimă importantă a atac-

ului SolarWinds - PaloAltoNetworks | A găsit malware pe site-ul web al Flashpoint | A urmărit,

monitorizat și profilat botnetul Koobface și a expus un operator de botnet | A ajuns pe Slashdot

de două ori | Blogul meu personal a primit 5. 6 milioane de vizualizări de pagini din decembrie

2005 | Vechiul meu cont de Twitter a obținut 11.000 de urmăritori | Am avut o medie de 7.000

de cititori RSS pe blogul meu | Am propriul meu vinil "Blue Sabbath Black Cheer / Griefer - We

Hate You Dancho Danchev" realizat de un artist canadian | În prezent conduc Astalavista.box.

sk | Am acordat un interviu pentru DW despre botnetul Koobface | Am acordat un interviu pen-

tru NYTimes despre botnetul Koobface | Am acordat un interviu pentru OSINT rusesc | Cotat

ca un competitor important de către Jeffrey Carr’s Taia Global |

Prezent la GCHQ | Prezent la

Interpol | Prezent la InfoSec | Prezent la CyberCamp | Prezent la RSA Europe"

18.11.41 The Deepest of Them All - A Profile of Yavor Kolev - a Bulgarian Law

Enforcement Officer Kidnapper and a Bulgarian Dipshit - An Analysis

(2022-11-03 07:20)

[1]

26297

Psst - where's approximately of $85,000 of my own money which I earned legally throughout

the period 2012-2014? And where approximately 80 % of my health based on my health

pension records which Bulgaria's DANS gave me?

Ask this [2]guy which I told you about in advance circa 2010. The results? We can't wait to see

them when the real Bulgarian Law Enforcement learns about this including the actual illegal

detention and restraint courtesy of Bulgarian Law Enforcement officers in my hometown Troyan,

Bulgaria who stole my personal ID made a copy and locked me in a cell with no explanation

for a period of four months including to lock down my phone with no explanation and no one

knowing about this.

[3]

• Check out the blog post series [4]here

[5]

18.11.42 Joseph Mlodzianowski Joining Dancho Danchev's Blog as Guest Blogger -

Stay tuned! (2022-11-03 10:47)

[1]

26299

Hi, everyone,

This is Dancho and I have some big news. Joseph Mlodzianowski ([2]Twitter; [3]LinkedIn) is

joining my personal blog as an official Guest Blogger starting as of today so stay tuned for

some high-quality security and information security research and articles to be published here

courtesy of him.

Joseph's [4]BIO:

" *Joseph has a long and distinguished history of leading large teams of project, program Man-*

agers, architects, Cybersecurity Engineers and developers in the design, deployment and man-

agement of a number of multi-million dollar commercial and DoD projects. A Network, and Cy-

bersecurity infrastructure expert, published author, Course Developer and Trainer; Joseph has

many certifications including the Cisco CCIE, CNE, CISSP, ITILv4. Joseph worked at the Depart-

ment of Defense, the NSA, CIA and State Department for more then ten years as an operator,

and SME, where he performed CNE/CNA functions and later led large teams to architect and

build many Data Centers, Critical infrastructure and big data systems, all in pursuit of National

Security initiatives. ".

Thank you Joseph for the interest and I hope that you'll soon find the chance to begin contribut-

ing with high-quality security and information security research articles here.

Stay tuned!

18.11.43 Exposing a Rogue Google AdSense Campaign Using Typosquatted Malware

Serving Software Releases - An Analysis (2022-11-03 11:14)

[1]

26300

Dear blog readers,

I wanted to share with everyone the details including the actual technical details behind a what

appears to be a rogue and fraudulent Google AdSense campaign that's using popular software

download keywords for the purpose of serving rogue and bogus potentially malicious software

to unsuspecting users including the actual domain portfolio behind the campaign.

Sample screenshots include:

18.11.45 Exposing a Sample Rock Phish Phishing Campaign's Botnet Hosted Infras-

tructure - An Analysis (2022-11-03 11:20)

[1]

26303

Did you know that a huge percentage of Rock Phish related campaigns are known to have been

hosted on a fast-fluxed botnet infrastructure where the ultimate goal is to make them impossi-

ble to take offline or basically increase the average time it takes for vendors or researchers to

attempt to take the domains offline?

In this post I'll share with everyone a sample portfolio of Rock Phish themed screenshots where

the ultimate goal is to present my findings in the context of providing actionable intelligence on

the fact that on the majority of occasions Rock Phish gang's campaigns continue to be hosted

on a fast-fluxed botnet infrastructure.

Sample screenshots include:

18.11.46 Exposing a Russia-Based Stolen and Compromised Credit Cards Checking

Web Site - An Analysis (2022-11-03 19:15)

[1]

Dear blog readers,

I've decided to share with everyone some screenshots which I took from the infamous back

in 2010 stolen and compromised credit cards checking service hxxp://ccchkr.com which uses

a variety of methods and techniques to check the validity of stolen and compromised credit

cards on a mass scale.

Sample screenshots include:

18.11.47 Profiling a Email Password Harvesting Enabled Malicious Software Release

- An Analysis (2022-11-03 19:23)

[1]

26311

Dear blog readers,

I've decided to share with everyone sample screenshots which I took back in 2010 while doing

research in specific the malicious release's capability to eavesdrop on email communications

initiated from the hosts of the affected victims part of the botnet with some pretty interesting

and sophisticated features where the actual botnet master behind the release has already man-

aged to accumulate some pretty decent stolen and compromised SMTP and POP3 accounting

information.

Sample screenshots include:

18.11.48 Profiling the ZeusEsta Managed ZeuS Crimeware Hosting Service - An Anal-

ysis (2022-11-03 20:25)

[1]

26313

Dear blog readers,

Back in 2009 I came across to a pretty interesting and easy to use sophisticated ZeuS crime-

ware managed hosting service which was basically enticing users into becoming customers of

a managed ZeuS crimeware service which was basically offering them everything they need

to enter the world of cybercrime in specific managed crimeware releases.

Sample URL known to have been involved in the campaign includes:

hxxp://zeuspanel.name - 94.102.56.63

18.11.51 Massive Malware Serving Campaign Abuses Portmap A Web Based Port

Forwarding Solution - An Analysis (2022-11-15 04:52)

[1] [2]

[3]

Dear blog readers,

In this post I've decided to further profile a currently circulating malicious software and njRAT

malware dropping campaign that's using a popular port forwarding solution as a C &C server

with the idea to provide everyone with the necessary situational awareness and technical

details regarding the campaign.

Sample campaign C &C and associated domains analysis:

MD5: d8191eee2d99a00cb664d100ffc73b9c

hxxp://enderop44-36084.portmap.host - 193.161.193.99

26321

URL: hxxp://www.cofo.ga/a/KeyOneA.exe

Botnet C &C: hxxp://cofo.ga - hxxp://52.70.248.161; hxxp://193.161.193.99

Sample screenshots include:

[4]

[5]

26322

Collection	Command and Control	Credential Access	Defense Evasion	Discovery	Execution	Exfiltration	Impact	Initial Access	Lateral Movement	Persistence	Privilege Escalation
			Modify Registry	System Information Discovery						Modify Existing Service Registry Run Keys / Startup Folder

18.11.52 Data Mining and Visualizing My Old GMail Account - An Analysis

(2022-11-16 18:38)

[1]

Dear blog readers,

26327

I've decided to touch base with everyone and share with you a screenshot which basically

demonstrates a data mined visualization of my old GMail account where I'm currently using a

proprietary solution for the purpose of figuring out how different

connections with friends and

colleagues circa 2008-2013 really worked out in terms of achievements and productivity.

Stay tuned!

Comments and Recommendations from Colleagues:
"Dancho Danchev has his pulse on the cyber criminal community. I can think of few people who have his experience, skills and understanding when it comes to cyber intelligence and understanding the cyber threat. I cannot recommend Dancho enough."
"I have been working in the security space for many years and for a very large part of that have been following the excellent research work that Dancho has been doing in identifying cyber criminals and doing complex analysis of highly advanced modern day malware attacks. Dancho is extremely well known in the security industry for the work he has done and continues to do. When we had the opportunity of collaborating with Dancho at Webroot, we didn't hesitate. Dancho has proven to deliver on a continuous basis for us and his work is simply phenomenal. I look forward to working with Dancho for many years to come."
"Dancho is an expert researcher who I've had the pleasure of working with on several hacker investigations for Taia Global clients. I consider Dancho one of the best and most insightful researchers working in InfoSec today."
"Dancho is one of those exceedingly rare security professionals with not only an eye for uncovering the root cause of an attack and the ability to examine it from multiple angles, but also explain his findings in a way that has a meaningful and direct impact on those tasked with defending against such attacks. I admire the depth of his analysis and his dogged determination to track back who the criminal operators are despite the dangers he could be exposed to. Dancho gets two-thumbs-up from me and I'd hire him in a heart-beat if he PageS ever makes it to the USA. In the meantime I'll keep on following his research, reading his blogs and looking forward to collaborating with him on future cyber crime investigations."
"I first knew Dancho when he was fresh out of college but already with a prodigious understanding of information security matters. He became one of the experts in the Security Clinic on ITsecurity.com, a site I founded and was publishing at the time; and he willingly gave free security help and advice to visitors to the site. Since those days I have watched both his career and knowledge grow in leaps and bounds until he is now, without any doubt, one of the world's leading experts on the shady world of cybercrime."
"Dancho is an exceptional information security professional; he continually goes the extra mile for clients and the security community. His knowledge and analysis in core areas as threat intelligence analysis, cybercrime counter intelligence and competitive intelligence research is outstanding. He also manages the most difficult task with ease, that of communicating this in an understandable and meaningful form for the community. Working with Dancho over several years has been highly productive, and beneficial."

18.11.54 Profiling a Typosquatted Google's Gmail Targeted Phishing Campaign Do-

main Portfolio - An OSINT Analysis (2022-11-29 18:38)

[1]

26345

NOTE:

The majority of these typosquatted phishing domains which are also known to have been used

in targeted phishing campaigns are known to have been part of the [2]Void Balaur hacking for

hire vendor of services.

I’ve decided to share with everyone a recently discovered using OSINT typosquatted phishing

domains portfolio which appears to have been widely used in a variety of targeted phishing

campaigns.

Sample domains known to have been involved in the campaign include:

hxxp://my-mail-account-gmail.com

hxxp://security-myaccount-goglemail.com

hxxp://myaccount-mail-my-gmail.com

hxxp://account-mail-my-gmail.com

18.12 December

18.12.1 Exposing a Massive Anti-NSA Chinese Themed Online Influence and Propa-

ganda Campaign - An OSINT Analysis (2022-12-04 03:33)

[1]

26349

China loves the U.S and guess what? Based on my most recent analysis on online influence

and Chinese themed propaganda campaigns I've just intercepted a what appears to be a live

Chinese-themed online influence and propaganda campaign targeting the NSA including the

U.S mass surveillance campaigns internationally including the active use of variety of tags and

automatically registered Twitter accounts.

Although many of the accounts appear to be currently suspended the earliest tweets part of the

campaign date back to July, 2022 and the campaign appears to be currently and still ongoing.

Let's take a deeper look inside the campaign using both publicly obtainable and accessible

Twitter analytics tools including various OSINT techniques and try to shed as much light

into the campaign as possible including to actually attempt to offer as

much actionable

intelligence on the actual Twitter accounts in use including the actual list of rogue and bogus

and automatically registered Twitter accounts known to have been involved in the campaign.

Sample screenshots and images part of the campaign include:

[2]

18.12.2 Happy Holidays! (2022-12-05 19:52)

[1]

26365

Dear blog readers,

It's been a while since I've last posted a high-quality personal message on my personal blog

but the first thing that I wanted to say is big thanks to everyone who's been following and is

following me and continues to follow me and read my research here where the pleasure to

produce high-quality and never-discussed and published before research is all mine and will

continue to be.

What I've been up to? I've been basically multi-tasking on several fronts which I'm doing

my best to continue fighting the good fight in terms of fighting and responding to the latest

underground ecosystem cybercrime-friendly market propositions by actually profiling them and

making sure that my research and analysis reaches all the appropriate parties that also includes

the general public.

In terms of work I'm currently acting as a DNS Threat Researcher at WhoisXML API where the

pleasure to personally thank the team and the CEO for bringing me on board is all mine where

my primary responsibilities include the production of white papers on the topic of cybercrime

and general cybercrime and threat actor type of research.

Some of my current projects include:

• [2]https://disruptive-individuals.com

• [3]https://offensive-warfare.com

• [4]https://cybercrime-forum-dataset.org

• [5]https://osint-marketplace.org

• [6]https://unit-123.org

26366

I've also recently updated the BIO on my Twitter and LinkedIn accounts and I've been also

pretty active on Facebook and Mastodon including Xakep.bg's Discord server where I recently

held a presentation at Cyber Security Talks Bulgaria and I'll soon feature the actual photos and

video from the event. I've also recently claimed my Google Knowledge Panel and believe it or

not Google thinks that I'm a researcher which is great news and I'm honored to also have my

Twitter and LinkedIn accounts featured on the front page so thanks a lot for reading me and for

visiting my blog including to read my research.

Stay tuned!

Dear blog readers,

26369

I've decided to share with everyone part three of my "Exposing a Compilation of Known Ran-

somware Group's Dark Web Onion Web Sites - An OSINT Analysis" compilation of known ran-

somware themed Dark Web onion web sites.

Check out [2]part one and [3]part two here.

Sample list of known and currently active Dark Web onion web sites known to have been

involved in ransomware themed campaigns:

18.12.5 Introducing my "Collaborative Maltego Hacker Database Graph" Project -

Free Access Available (2022-12-11 15:13)

[1]

Dear blog readers,

Do you have Maltego? If so you can quickly grab a free copy of it and join my collaborative

"[2]Maltego Hacker Database Project" initiative where I intend to work on and issue daily up-

dates in the form of personally identifiable cyber attribution details on a huge number of cyber

attackers where the ultimate goal would be improve everyone's situational awareness in the

cyber attribution field.

How to obtain access to the project?

Drop me a line at dancho.danchev@hush.com to request access and I'll shortly send you the

necessary accounting data for the collaborative Maltego hackers

database graph.

Sample screenshots include:

Dear blog readers,

Happy holidays!

Are you an avid reader of this blog and do you enjoy going through my research on a daily

basis and have you been doing so throughout the past decade?

Grab a copy of my free [2]Android application which you can find on Google Play and grab all

the latest updates as soon as I publish something here on Medium Substack Twitter Flickr or

YouTube.

Ransomware-Themed Extortion Email Addresses - Part Six (2022-12-12 18:01)

[1]

Dear blog readers,

I've decided to share with everyone my most recent compilation in the fight against ran-

somware globally which is basically a compilation of known ransomware-themed personal

email address accounts known to have been involved in the actual ransomware recruitment

and funds solicitation process.

Sample list of known ransomware-themed email address accounts known to have been in-

volved in various ransomware themed campaigns include:

18.12.8 Official Complaint Against the Dark City of Troyan, Republic of Bulgaria

and Local Law Enforcement Regarding Dancho Danchev's Disappearance

and Kidnapping and Home Molestation Attempt Circa 2010 - An Analysis

(2022-12-17 10:03)

[1]

26481

Dear blog readers,

This is Dancho and I'm further expanding the last post of the "[2]Dancho Danchev's Disappear-

ance and Kidnapping and Home Molestation Attempt Circa 2010" blog post series with a variety

of personal photos and personally identifiable information.

I wanted to say big thanks to everyone who knew me back then and basically participated in

this. Big "thanks".

Sample photos include:

18.12.9 My Cyber Security Talks Bulgaria Video Presentation - An Analysis

(2022-12-19 23:40)

[1]

Dear blog readers,

I've decided to share with everyone my most recent presentation at

[2]Bulgaria's Cyber Secu-

rity Talks where I had the privilege to present and meet some pretty interesting and educated

folks who I hope that enjoyed listening to my presentation.

Enjoy!

18.12.10 Exposing the "Data Leaks" Paradise - An Analysis (2022-12-20 01:27)

[1]

In a world dominated by a countless number of malicious and fraudulent cyber threat actor

adversaries including the rise of the "penetration testing" crowd whose ultimately goal is to

actually lower down the entry barriers into the World of Information Security potentially re-

sulting in thousands of ethical and unethical penetration testing aware users across the globe

who have the capacity and the potential to target thousands of legitimate Web sites in an

attempt to take advantage of the "low-hanging fruit" it should be clearly noted that through-

out the past couple of years a new generation of wannabe hackers and information security

enthusiasts began to take place namely the rise of the data breach and data leaks commu-

nity within the Information Security Industry whose ultimately goal is to actually obtain access

26508

to compromised and potentially leaked database of confidential records including high-profile

data leaks in the context of government-based leaked data that will be later on eventually

traded and attempted to be taken advantage of in the context of launching targeted phishing

and malware-spreading campaigns potentially affecting hundreds of thousands of users in the

process.

Sample uses of these stolen and compromised databases includes:

- setting the foundation for a successful spear-phishing campaigns

- setting the foundations for successful targeted malware and exploits serving campaigns

- setting the foundations for successful widespread spam and botnet propagation campaigns

- attempting to monetize the stolen database by selling access it to

- attempting to use double layer monetization for the stolen database by attempting to sell

access to it including to the actual owners of the database who might be interested in obtaining

a copy of it

- biased exclusivity and double layer monetization combination where the attacker might only

sell the database to its actual owner and actually get rid of it once they receive the payment

The very notion that cybercriminals including white hat security experts and cybercrime fight-

ers will eventually attempt to obtain access to for instance a compromised cybercrime forum

for the purpose of exposing the personal details of its users that also include to possibly track

down and geolocate including to actually profile and prosecute some of its members should

be definitely considered as an old-fashioned trend in the actual fight against cybercrime online

with more users and researchers joining the fight including the actual cybercriminals who might

take additional measures to actually protect and prevent possible data leaks including various

other OPSEC (Operational Security) type of measures in terms of positioning their cybercrime-

friendly forum community as a invite-only or actually launching it in a a vetted and invite-only

fashion.

What’s should be clearly noted is that with the mainstream media continuing to raise awareness

on the existence of high-profile hacking groups and hackers including the rise of the Anonymous

crowd it should be clearly noted that wannabe and potential hackers would continue trying to

steal the necessary media attention and actual "know-how" from high-profile hacking groups

and individual hackers involved in high-profile data leaks and data breaches.

I believe that on the majority of occasions it's just ransomware that's making the headlines

including its way into corporate networks thanks to the so called initial access brokers who on

the majority of occasions are known to have been also outsourcing their hacking and network

compromise needs to third-parties who would basically do an Attack Surface Reconnaissance

on the Web and will attempt to find a weak spot into the corporate network of the targeted

victim but would also attempt to data mine and harvest publicly accessible and obtainable

email address accounts for the purpose of doing active social engineering reconnaissance that

also includes the attempt to obtain accounting data belonging to these company individuals

including to launch spear phishing attack campaigns against their infrastructure in an attempt

to obtain access to their email address accounts home PCs and networks including related

services ultimately attempting to compromise the security of the targeted network and the

company in question.

Stay tuned!

2023

19.1 January

19.1.1 Happy Holidays From The (Not) Republic of Bulgaria - An Analysis - Part Two

(2023-01-17 10:17)

[1]

Can you slap it? Do you know that your degree of education is proportional with the price

size of your t-shirt which means that we’re not interested in counting that much I mean the

almighty dollar which you can’t behold yourself to all of its mightiness? "Give me a moron and

I’ll beat him" instead of "Give me an IP and I’ll move the earth" type of

mentality? Are you a

retard or are you a moron or are you a dipshit where the word cannot really behold itself to its

almighty awesomeness? Try the two of these as you’re only a low waged moron that cannot

really count anything between one or two which means the actual times you’ll get slapped

26515

by someone who’ll eventually find out and seek your responsibility for your general moronic

attitude. It means that you’re a retard.

Stay tuned!

19.1.2 A Peek Inside a Zunker Botnet C&C Administration Panel - An OSINT Analysis

(2023-01-26 16:40)

[1]

As I've been digging deep inside an old threat intelligence and technical collection archive and

I've decided to share several screenshots worth everyone's while.

The following is basically several sample screenshots courtesy of the Zunker botnet C &C

command and control interface which back in the day used to dominate the threat landscape

including the sophisticated cybercrime ecosystem with some pretty interesting and sophisti-

cated features.

Sample screenshots include:

19.1.4 Exposing Russian Business Network's Mykhaylo Sergiyovich Rytikov's AbdAl-

lah Internet Hizmetleri Bulletproof Hosting Provider on U.S Secret Service's

Most Wanted Cybercriminals List (2023-01-26 16:43)

[1]

26520

I’ve decided to share with everyone some actionable intelligence on one of the Russian

Business Network’s primary franchise networks in Turkey namely AbdAllah Internet Hizmet-

leri which back in the day used to be responsible for some pretty decent bulletproof host-

ing malicious and fraudulent cybercrime activity in particular to offer

actionable intelligence

on [2]Mykhaylo Sergiyovich Rytikov it’s owner who’s currently on U.S Secret Service’s most

wanted cybercriminals list.

19.2.1 A Peek Inside the Zalupko Accounting Data Stealing Malicious Software Bot-

net - An Analysis (2023-02-06 23:08)

[1]

Who would have thought? Takes you back doesn't it? As I've been going deep inside my old

threat intelligence archive circa 2008 I've decided to share with everyone several never

published or released before screenshots of the Zalupko accounting data stealing malicious

software release botnet with the idea to raise everyone's spirit in the field of fighting

cybercrime and doing research and possibly take your research motivation higher.

Sample screenshots include:

19.2.2 A Peek Inside the Xedant Human Emulator Spam Tool - An Analysis

(2023-02-06 23:09)

[1]

26531

Dear blog readers,

In need of a decent example of a sophisticated spam tool that's truly capable to bypass any

web site's anti-spam defense including basically any known CAPTCHA

including to also

automate the process to the point where the actual bad guys behind the infamous Xedant

human emulator are truly capable of causing widespread spam havoc internationally? Think

about the Xedant human emulator tool circa 2008.

Sample screenshots include:

19.2.3 A Peek Inside the Xrumer Spam Tool - An Analysis (2023-02-06 23:09)

[1]

Who would have thought? It’s an unknown period of time within the cybercrime ecosystem

and I’ve decided to share exclusive screenshots of the infamous Xrumer spam tool which

basically used to and continues to dominate the spam marketplace by possessing a variety of

advanced and sophisticated features making it easy for everyone to enter the world of spam

globally.
